The following terms and abbreviations are used throughout the West Virginia Investment Management Board's Annual Report and are listed here to help with the overall understanding and readability of this document.

Allocation Committee	A three-member committee that includes the Executive Director, the Chief Investment Officer, and the Board named investment consultant, authorized to modify the Strategic Allocation from time to time, subject to the allocation range limits.	
Board	The thirteen-member Board of Trustees that governs the West Virginia Investment Management Board.	
Сар	Abbreviation for "capitalization," referring to the size of the investment market for that particular asset style.	
IMB	The "West Virginia Investment Management Board" including its Trustees, plan Representatives, Committee Members, and staff.	
Neutral Target	The absolute percentage weighting assigned to an asset class or the secondary components within an allocation to which rebalancing should ultimately occur in the absence of an Allocation Committee modification.	
Participant Plan (Participant)	A specific group of assets entrusted to the West Virginia Investment Management Board. Retirement plans, endowments, and insurance trusts, for example, are all Participant Plans.	
Policy Allocation	The allocation between the three major asset classes $-$ global equity, fixed income, and cash $-$ whose purpose is to serve as return generators, or diversifiers, or some combination of both.	
Pool	Refers to the specific investment pool created and operated by the West Virginia Investment Management Board for a specific investment asset class.	
Range Allocation	The Board has placed ranges (Allocation Ranges) around the Strategic Allocation in order to maintain appropriate risk controls. Allocation decisions made by the Allocation Committee are defined as the Range Allocation.	
Strategic Allocation	Represents allocations to secondary components of the three major asset classes defined in the Policy Allocation. For example, large cap, small cap, value, growth, etc. Allocations to these secondary components generally represent longer-term beliefs about the relative attractiveness between different segments within an asset class.	

Introduction

September 10, 2010

Dear Fellow West Virginians:

On behalf of the trustees of the West Virginia Investment Management Board, I am pleased to present the Board's annual financial report for the fiscal year ending June 30, 2010. Please note that additional information about the Investment Management Board may be accessed electronically on its website, www.wvimb.org.

I am pleased to announce that the Investment Management Board's assets returned 16 percent for fiscal year 2010 (using the Public Employees' Retirement System as a proxy for all long-term assets). Unfortunately, this great return in fiscal year 2010 will not be enough to eliminate the need for additional contributions to the retirement systems after the economic turmoil of the previous two fiscal years. It will take several years of returns above the actuarial assumed rate of 7.5 percent to do so. This will be difficult given the many challenges, both known and unknown, the current economic environment presents. It is important to remind ourselves, however, that the time horizon is long-term, and I am confident that the Investment Management Board is structured to deal with the investment challenges it will face.

I wish to thank fellow trustees and the staff of the Investment Management Board for their dedicated service. I am pleased with the Board's professionalism, commitment to its mission, and customer service.

Very truly yours,

Anchin

Joe Manchin III Governor of the State of West Virginia Chairman of the Board of Trustees

September 10, 2010

Dear Trustees:

It is with great pleasure that I submit the Annual Report of the West Virginia Investment Management Board (IMB). The IMB is considered an internal service fund of the State of West Virginia for financial reporting purposes and, as such, the significant financial information contained in this report is also included in the State of West Virginia's comprehensive annual financial report. The information presented in this report is the responsibility of the management of the IMB, and sufficient internal accounting controls exist to provide reasonable assurance regarding the safekeeping of assets and fair presentation of the financial statements, supporting schedules, and statistical tables. The report is also designed to comply with the reporting requirements of Chapter 12, Article 6, Section 6 of the West Virginia Code, as amended. This report is divided into the following sections:

- The Organization section which contains general information regarding trustees and staff, history of the IMB, statutory mandate, administrative mandate, and investment philosophy.
- The Investment Objectives and Financial highlights section, which outlines the more specific objectives and performance of each of the investment pools.
- The Participant Plans section, which contains a brief description of each of the participants whose assets are entrusted to the IMB.
- The Audited Financial Statements, which contains the independent auditor's report, the financial statements and notes thereto, and required supplementary information regarding the investment pools administered by the IMB and the IMB's Administrative Fund.

Please note that the audited financial statements are presented separately for each pool. The separate presentation clarifies that the independent auditor is issuing their audit opinion on each pool individually and not as a collective whole.

As an investment organization, the IMB's constant focus is the performance of its investments as it seeks to satisfy the investment needs of the beneficiaries of the assets entrusted to it. The majority of assets managed by the IMB are for participants with longer time horizons. These include the defined pension plans, employment security plans and other trust assets.

Defined benefit pension plans make up approximately 80% of the Investment Management Board's total assets. For general comparison purposes, the IMB uses the Public Employees Retirement System (PERS) as a proxy for the other systems because of its similarity to other statewide public plans throughout the nation. As of June 30, 2010 the return for PERS was up 16 percent net of expenses for the fiscal year. As you well know, of greater significance is the longer-term performance. In that regard, over the five years ending June 30, 2010, the IMB's return was 3.3 percent versus the policy benchmark of -2.83 percent. Over the ten-year period ending June 30, 2010, the IMB's return was 4.3 percent versus a policy benchmark of 2.9 percent. This represents millions of dollars in value added by trustees and staff. Specifically, for the defined benefit pension plans, the returns for the fiscal year ending June 30, 2010, ranged from 16.1 percent for the Public Safety Retirement System to 15.2 percent for the Teachers' Retirement System. Since asset allocations are virtually the same for each plan, differences in the returns for the various pension plans are a function of the differences in the timing of cash flows into and out of each plan and relative levels of cash equivalent securities necessary to make benefit payments. The Teachers' Retirement System is an exception as it inherited investments in an annuity product when assets of participants were moved from the Teachers' Defined Contribution Plan (managed by the Consolidated Public Retirement Board) to the IMB in December 2008. Other trust assets, including the Wildlife Endowment Fund and Prepaid Tuition Trust Fund have similar asset allocations to the defined benefit pension plans and returned 16 and 17.2 percent respectively.

With regard to employment security assets, the reader will note a significant difference in returns from defined benefit plans. Although the difference in the timing of cash flows is a factor in the differences in the returns of these insurance assets versus other types of assets, the differences in the respective plans' allocation to stocks and hedge funds play a much greater role. For fiscal year 2010, 20 percent of the Coal Workers Pneumoconiosis Fund was allocated to stocks while the Workers' Compensation Old Fund had an allocation of 10 percent. The Coal Workers Pneumoconiosis Fund also had a 20 percent allocation to hedge funds while the Workers' Compensation Old Fund had a zero allocation. The Board of Risk and Insurance Management and Public Employees' Insurance Agency also have allocations commensurate with their needs. As a result, the returns for employment security assets for the fiscal year ending June 30, 2010, range from 0.1 percent for the Workers' Compensation Old Fund.

Herein, the plans, as a group, are generally referred to as "Participant Plans." Specific data on returns and objectives on all participant plans may be found in the pages that follow.

The IMB is partially responsible for adequate funding of the defined benefit pension plans with the expectation that it will return 7.5 percent on the assets entrusted to it. Any time the IMB fails to achieve that return, there is a decrease in the funded liability. Every time the IMB achieves a return greater than 7.5 percent, there is an increase in the funded liability. The turmoil in the capital markets in fiscal year 2009 and the subsequent negative return for IMB assets reduced the funded liability causing an increase in employer contributions and stress on the State's budget. The great performance in fiscal year 2010 improved the funded position, and will help relieve the stress on the State's budget. The performance of fiscal year 2010 and the last quarter of 2009 was a testament to the structure and management of the IMB. It is sometimes said that the greatest risk to an institution like the IMB in times of crisis is that it will panic and abandon its asset allocation. The portfolio that suffered through the market turmoil of 2009 is essentially the same portfolio that produced great relative returns in fiscal year 2009 and great relative and absolute returns in fiscal year 2010. The IMB held firm to its conviction and did not abandon its asset allocation.

While asset allocations remained essentially unchanged, there was one exception, the Revenue Shortfall Reserve Funds. In anticipation of potential future needs, the Revenue Shortfall Reserve Funds' asset allocation has been restructured with a shorter timeframe in mind. As it recovered from the turmoil of fiscal year 2009, the Revenue Shortfall Reserve Fund stock allocation was transitioned to fixed income and Revenue Shortfall Reserve Fund – Part B's stock allocation was reduced in an effort to provide a more liquid source of funds should West Virginia's economy suffer significant deterioration over the next few years.

As an investor, the IMB's capacity to generate return on assets is largely a function of growth in the world capital markets. Diversification helps smooth the volatility in capital markets, but growth is the engine of returns. In this regard, the road ahead is foggy and treacherous. Credit, employment, and income growth in the developed world face many challenges. The emerging markets of the world are better positioned for growth, but will likely experience more volatility. It will be a challenge to achieve the returns expected of the IMB, but staff looks forward to helping trustees cope with the challenges as fiscal year 2011 unfolds.

Sincerely,

H. Craig Slaughter Executive Director

The West Virginia Investment Management Board came into existence in the spring of 1997 after years of hard work modernizing the State's investment management structure. This structural modernization was widely acknowledged as a necessary precursor to the passage of a constitutional referendum to allow investment in stocks. The risks in stocks were perceived to be too great to be managed by anything but a modern, professional entity.

Although the West Virginia Investment Management Board's predecessors, the West Virginia State Board of Investments and the West Virginia Trust Fund, Inc., brought about vast improvements, each had significant shortcomings. However, with the creation of the West Virginia Investment Management Board, the State achieved a balance between control and independence that will allow efficient and prudent investment management of assets well into the future.

The beginning of the modern era in investment management by the State goes back to the late 1970s with the consolidation of investment authority for the State's defined benefit plans, employment security plans, and other assets into a newly created West Virginia State Board of Investments. One of the goals of the legislation was to achieve economies of scale by commingling like assets.

Significantly, this newly created West Virginia State Board of Investments was staffed by the State Treasury and the board itself was made up of the State's Governor, Treasurer, and Auditor.

Although a step in the right direction, the initial West Virginia State Board of Investments lacked proper or sufficient control features. After a few problems in the 1980s, principally involving its short-term pools, the Consolidated Fund, the West Virginia State Board of Investment board was expanded to seven members, adding four members from the private sector including an attorney experienced in financial matters and a Certified Public Accountant.

In the fall of 1990, the Legislature took a huge leap forward by creating a staff for the West Virginia State Board of Investments separate from the staff of the State Treasury. This provided clear accountability to the West Virginia State Board of Investments-something that did not exist previously.

Other very important control features included: (1) a statutory requirement for an Internal Auditor, (2) an annual external audit by a certified public accounting firm, and (3) monthly reporting requirements to government leaders in accordance with generally accepted accounting principles. This last feature dictated that all pools with a weighted average maturity in excess of 90 days must be marked-to-market (carried at market value), something that had not been done in the 1980s.

At the same time, the West Virginia State Board of Investments made its first tepid step towards a diversified portfolio to be invested in stocks domiciled in the United States. Although it made some initial stock purchases in 1993, which were subsequently liquidated at a gain, the statute was challenged and the West Virginia Supreme Court ruled that investing in equities was unconstitutional.

In 1996, in an effort to satisfy the constitutional strictures, the Legislature carved out the pension and employment security funds with long time horizons and placed them in a trust to be managed by a new entity called the West Virginia Trust Fund, Inc. The creation of the trust as a vehicle to allow investment in stocks was also challenged and was struck down, failing to satisfy the constitutional concerns of the State Supreme Court. It did, however, bring about three very important changes. The Legislature, demonstrating impeccable managerial foresight, granted the West Virginia Trust Fund, Inc. control over its own budget. With the same foresight, the Legislature imposed personal fiduciary liability on the West Virginia Trust Fund, Inc. the board and staff. Of no less importance was the creation of representative roles for members of the retirement systems and employment security systems.

The ruling by the State Supreme Court caused the Legislature to combine the West Virginia Trust Fund, Inc., it and the West Virginia State Board of Investments in 1997, forming a new entity, the present day West Virginia Investment Management Board. All of the improvements made in the Board of Investments and the West Virginia Trust Fund, Inc. were incorporated into the new entity. The basic modernization process was complete.

The Legislature, for policy reasons, transferred the Consolidated Fund on July 8, 2005 to a newly created West Virginia Board of Treasury Investments, chaired by the State Treasurer. This was widely perceived as a policy move to ensure direct governmental oversight of State general and special revenue funds. The West Virginia Investment Management Board continues to manage the retirement funds, the employment security funds, and other assets with long time horizons.

Finally, in 2007 the Legislature expanded the investable universe of assets, increasing the allowable allocation to public equity and international securities, while also providing for a significant allocation to real estate and "alternative investments," loosely defined as hedge funds and private equity.

The West Virginia Investment Management Board was created during the 1997 legislative session and is cited as the West Virginia Investment Management Board Act (the Act). The legislative findings of the Act make it clear that the West Virginia Investment Management Board was intended to be a professional, apolitical, financial management organization dedicated to the interests of the State's teachers, public employees and workers in general. The Act was intended to give the West Virginia Investment Management Board "... the authority to develop, implement and maintain an efficient and modern system for the investment and management of the State's money." In order to accomplish this purpose, the Act further stated that the West Virginia Investment Management Board must "... operate as an independent board with its own full-time staff of financial professionals immune to changing political climates...." [West Virginia Code §12-6-1(a)(b)] The Act also mandates that the assets contributed by the public employee and employer to the 401(a) Plans and the assets of the Workers' Compensation Fund and the Coal Workers' Pneumoconiosis Fund, are "declared to be irrevocable trusts, available for no use or purpose other than for the benefit of those public employees...workers, miners and their beneficiaries...." [West Virginia Code $\frac{12-6-1(c)(d)}{1}$ The West Virginia Investment Management Board is further "empowered by this Article to act as Trustee of the irrevocable trusts created by this Article, and to manage and invest other state funds." [West Virginia Code §12-6-1a(f)]

The standard of care mandated by the Statute is that codified in the "Uniform Prudent Investor Act", Article 6C of Chapter 44 of the West Virginia Code. The West Virginia Investment Management Board is further subject to the following requirements:

- (a) Trustees shall discharge their duties with respect to the 401(a) Plans for the exclusive purpose of providing benefits to participants and their beneficiaries;
- (b) Trustees shall diversify fund investments so as to minimize the risk of large losses unless, under the circumstances, it is clearly prudent not to do so;
- (c) Trustees shall defray reasonable expenses of investing and operating the funds under management;
- (d) Trustees shall discharge their duties in accordance with the trust documents and instruments governing the trusts or other funds under the management insofar as the documents and instruments are consistent with provisions of this Article; and
- (e) The duties of the Board apply only with respect to those assets deposited with or otherwise held by it. [West Virginia *Code* §12-6-11]

Governance of the West Virginia Investment Management Board is vested, by statute, in a thirteen-member Board of Trustees. Three members of the Board serve by virtue of their office: the Governor, the Auditor, and the Treasurer. The other ten are appointed by the Governor and confirmed by the Senate. All appointees must have experience in pension management, institutional management or financial markets. In addition, one must be an attorney experienced in finance and investment matters and another must be a Certified Public Accountant. Only six of the ten appointed Trustees may be from the same political party. The Governor serves as Chairman of the Board. A Vice-Chairman is elected by the Trustees. A Secretary, who need not be a member of the Board, is also elected by the Trustees to keep a record of the proceedings of the Board.

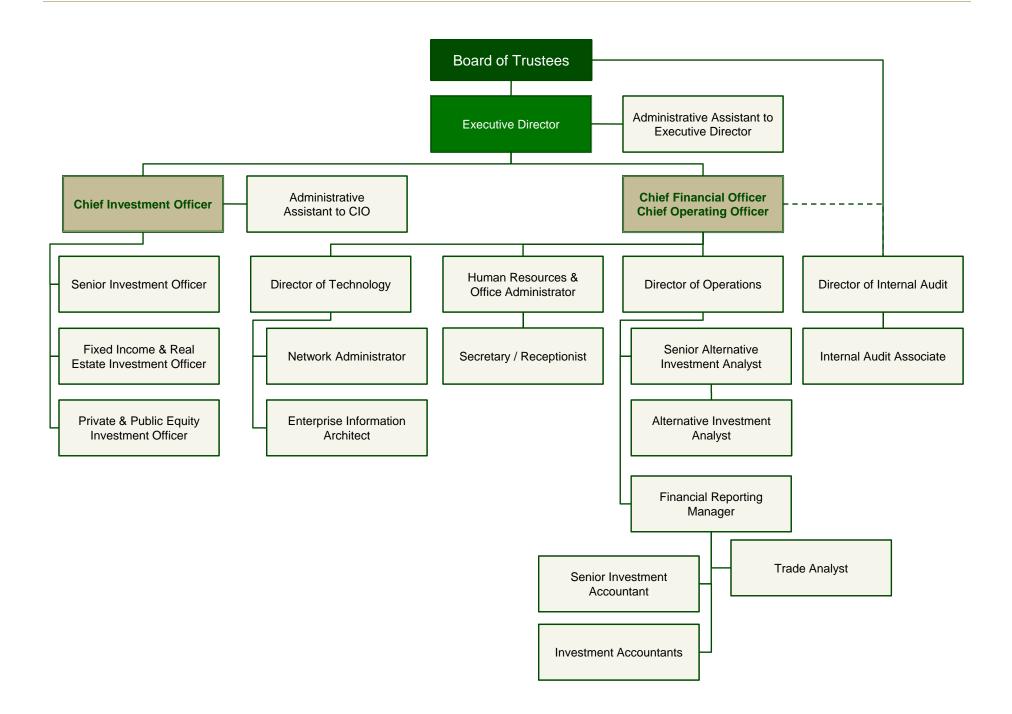

A member of each defined benefit retirement plan is designated by the Consolidated Public Retirement Board to represent the Participant Plans' interests. Likewise, the West Virginia Insurance Commission designates a representative for the Coal Workers' Pneumoconiosis Fund and the Workers' Compensation Old Fund. Each of the Representatives may designate up to three persons to comprise a committee representing their respective plan's beneficiaries. The Representatives and Committee Members do not have a vote but have the right to be heard at the annual meetings of the Board and are subject to the same code of conduct and requirements of confidentiality that apply to the Trustees.

The day-to-day management of the West Virginia Investment Management Board is delegated to the Executive Director who is appointed by the Board and serves at its will and pleasure. The Executive Director acts as an advisor to the Board on all matters.

The staff of the West Virginia Investment Management Board is divided into two principal divisions-Investments and Operations.

The Operations Division is focused on providing the back office support necessary for the organization to function on a dayto-day basis. The Investments Division is structured to devote its time and resources to staying current with new developments and research in the investment field and being prepared to apply this knowledge to the investment of assets for the West Virginia Investment Management Board. See the organization chart on the following page.

Organization Chart

The primary objective of the investment pools is to provide benefits to its participants and beneficiaries. Based on general beliefs about the investment return available from a well-diversified, prudently invested portfolio, the Board has adopted specific investment objectives for each Participant Plan.

In order to achieve a specified real rate of return, the Board relies on the prevailing financial theory, which currently is an investment strategy utilizing an appropriate long-term diversified asset allocation model. A prudently allocated investment program possesses a certain level of diversification, which produces risk reduction. In terms of level of impact, diversification should be considered along the following lines: (1) asset classes (stocks, bonds, cash, non-traditional, etc.), (2) geography/country, (3) industry, and (4) maturity. Asset allocation modeling takes into consideration specific unique circumstances of each Participant Plan, such as size, liquidity needs, and financial condition (funded status) as well as general business conditions. The factors mentioned here are not intended to be limiting; rather, they are outlined as a general indication of the importance of diversification to proper asset allocation. The Board determines the proper allocation among asset classes and managers based on advice and analysis provided by staff and/or external investment consultants.

The Board recognizes that even though its investments are subject to short-term volatility, it is critical that the Board maintain the appropriate time horizon for each Participant Plan. This prevents ad hoc revisions to its philosophy and policies in reaction to either speculation or short-term market fluctuations. In order to preserve this long-term view, the Board has adopted the following formal review schedule:

Agenda Item	Review Schedule
Investment Performance	Quarterly
Investment Policy	Every Year
Policy Asset Allocation	Every Three Years
Strategic Asset Allocation	Every Three Years
Allocation Ranges	Every Three Years
Asset Allocation Review for Each Participant Plan	At Least Every Five Years

The Board may hire investment managers to implement its objectives. These managers will be given specific tactical roles within the overall strategic investment plan. Depending on their assignments, the managers may be judged on some or all of the following: (1) consistency of philosophy, style and key personnel, (2) performance relative to an appropriate index or proxy group, and (3) ability to add incremental value after costs. The Board and staff shall monitor performance and supervise all fund managers.

In determining its philosophy towards risk, the Board considers, in addition to its fiduciary obligations and statutory requirements, each entity's purpose and characteristics, financial condition, liquidity needs, sources and level of contributions, income and general business conditions. Based upon these many factors, the Board identifies whether a more aggressive or more conservative approach is warranted for each Participant Plan.

INVESTMENT OBJECTIVES

"The Board, at its annual meeting...shall review, establish and modify, if necessary, the investment objectives of the individual participant plans, as incorporated in the investment policy statements of the respective trusts so as to provide for the financial security of the trust funds giving consideration to the following: (1) Preservation of Capital; (2) Diversification; (3) Risk Tolerance; (4) Rate of Return; (5) Stability; (6) Turnover; (7) Liquidity; and (8) Reasonable Costs of Fees." [West Virginia Code §12-6-12g]

PARTICIPANT PLANS

The Board's objective is to manage the Participant Plans' moneys in an efficient and economical manner, managing risk as it seeks to achieve the specific goals set out in each Participant Plan's investment program.

Investment Objectives & Financial Highlights

OBJECTIVES

The Short-Term Fixed Income Pool was created to maintain sufficient liquidity to meet the daily disbursements requested by the Plans and to invest any contributions until the time the money is transferred to other asset classes without sustaining capital losses and while earning a small return above inflation. The Pool is structured as a money market fund where the goal is a stable dollar value per share, thus, preserving principal. The risk factors on this pool are low and managed through numerous maturity restrictions, diversification guidelines, and credit limits. The participants are paid on an income basis that includes interest income net of expenses.

MANAGEMENT STRUCTURE

The Short-Term Fixed Income Pool is managed by JPMorgan Investment Advisors, Inc.

FINANCIAL HIGHLIGHTS

Progression of Net Assets (in \$000s)

Net assets - June 30, 2009
Net increase from operations
Income distributions to unitholders
Net increase from unit transactions
Net assets - June 30, 2010

Short-Term Fixed Income		
\$	264,554	
	310	
	(286)	
	25,818	
\$	290,396	

Investment Securities (in \$000s)

Carrying Value	Percent of Securities
\$ 280,418	91.8%
24,999	8.2
\$ 305,417	100.0%

Short-Term Fixed Income

Short-term issues U.S. government agency issues Total

INVESTMENT PERFORMANCE

The IMB calculates total rates of return using the time-weighted rate of return methodology. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals. The actual rate of return is net of investment advisor fees.

	Short-Term Fixed Income		
Period	Actual	Citigroup 90 Day Treasury Bill plus 15 bps	
One-year	0.1%	0.3%	
Three-year	1.8%	1.7%	
Five-year	3.0%	2.9%	
Ten-year	2.8%	2.9%	

EXPENSES

The IMB charges each investment pool for its direct investment-related expenses and an allocated share of other expenses. The Short-Term Fixed Income Pool's expenses for the year, divided by the average net assets, are as follows:

Expense Ratios (in basis points)	Short-Term Fixed Income
Investment advisor fees	5.0
Trustee fees	0.0
Custodian bank fees	0.5
Management fees	2.1
Fiduciary bond fees	0.0
Professional service fees	0.6
Total	8.2

OBJECTIVES

The main objectives for the Fixed Income Pools are to generate investment income, provide stability, and enhance diversification, but not at the expense of total return. The Strategic Allocation for the total Fixed Income Pools, the Neutral Target for the respective allocations to the Core Fixed Income and Total Return Fixed Income Pools, as well as the approved Allocation Ranges within which the Allocation Committee can operate, are outlined below:

Investment Pools	Strategic Allocation	Allocation Range
Core Fixed Income Pool		
Total Return Fixed Income Pool		
Total Fixed Income Pools	20.0%	+/- 5%

Participant Plans	Neutral Target	Allocation Range
All plans except Prepaid Tuition Trust	50% Total Return Income Pool 50% Core Fixed Income Pool	+/- 20% (30% to 70%) +/- 20% (30% to 70%)
Prepaid Tuition Trust	100% Core Fixed Income Pool	N/A

Note: The combined investment in international equity, international fixed income, and international real estate components may not exceed 30 percent of the Participant Plan allocation, as mandated by statute.

MANAGEMENT STRUCTURE

The Fixed Income Pools are managed by the following firms, in accordance with a particular investment style.

Manager	Style
Western Asset Management Company	Total Return Fixed Income
Dodge & Cox	Total Return Fixed Income
JPMorgan Investment Advisors, Inc.	Core Fixed Income
State Street Global Advisors	Core Fixed Income

FINANCIAL HIGHLIGHTS

Separate investment pools have been established for each investment style. Individually, these pools are the Total Return Fixed Income Pool and the Core Fixed Income Pool. These pools are individually reported in the audited financial statements and are presented in the financial highlights as follows:

Progression of Net Assets (in \$000s)	Total Return Fixed Income				Core Fixed Income
Net assets - June 30, 2009	\$	2,229,609	\$ 394,883		
Net increase from operations		303,405	111,117		
Income distributions to unitholders		(55,709)	(31,890)		
Net increase (decrease) from unit transactions		(685,226)	1,080,154		
Net assets - June 30, 2010	\$	1,792,079	\$ 1,554,264		

Investment Securities (in \$000s)	Total Return Fixed Income			Core Fixed Income		
	F	air Value	Percentage of Securities	I	Fair Value	Percentage of Securities
Commingled fixed income pools	\$	441,720	24.6%	\$	488,243	31.3%
Corporate issues		651,750	36.2		286,832	18.4
Municipal bonds		26,929	1.5		273	0.0
Short-term issues		268,245	14.9		53,413	3.4
Option contracts purchased		1,349	0.1		-	0.0
U.S. government agency issues		212,240	11.8		397,830	25.5
U.S. Treasury issues		196,851	10.9		334,152	21.4
Total	\$	1,799,084	100.0%	\$	1,560,743	100.0%

INVESTMENT PERFORMANCE

The IMB calculates total rates of return using the time-weighted rate of return methodology. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals. The actual rate of return is net of investment advisor fees.

	Total Return	n Fixed Income	Core Fi	xed Income
Period	Actual	*Barclays Capital U.S. Universal	Actual	Barclays Capital Aggregate
One-year	16.7%	10.6%	10.8%	9.5%
Three-year	6.2%	7.2%	N/A	N/A
Five-year	5.7%	5.6%	N/A	N/A
Ten-year	7.6%	6.6%	N/A	N/A

*The Total Return Fixed Income Pool benchmark is the Barclays Capital Universal as of April 2008. Prior periods were a custom index.

EXPENSES

The IMB charges each investment pool for its direct investment-related expenses and an allocated share of other expenses. The Fixed Income Pools' expenses for the operating period, divided by the average net assets, are as follows:

Expense Ratios (in basis points)	Total Return Fixed Income	Core Fixed Income
Investment advisor fees	21.4	10.5
Trustee fees	0.1	0.1
Custodian bank fees	0.4	0.5
Management fees	3.5	3.3
Fiduciary bond fees	0.0	0.0
Professional service fees	0.9	0.8
Total	26.3	15.2

This page intentionally left blank

OBJECTIVES

The main objective for the Equity Pools is to provide for long-term growth for all participants. The Equity Pools are comprised of separate strategic asset classes which, when taken in aggregate, enable adequate diversification. The strategic asset classes and the Neutral Target allocations to additional sub-components of the strategic asset classes, as well as the approved Allocation Ranges within which the Allocation Committee can operate, are outlined below:

Category	Strategic Allocation	Allocation Range
U.S. Equity	25.0%	+/- 5% (20% to 30%)
International Equity	25.0%	+/- 5% (20% to 30%)
Total Equity Pool	50.0%	+/- 5% (45% to 55%)

Category	Neutral Target	Allocation Range
U.S. Large Cap vs.	Large = 1 minus Non-Large	0.5 to 2.5 times benchmark
U.S. Non-Large Cap	Non-Large = Russell 2500/Russell 3000	Sum must equal 100
U.S. Non-Large Value vs.	Value vs. Growth	0.5 to 2.5 times benchmark
U.S. Non-Large Growth	Percentage in Russell 2500	Sum must equal 100
International Large vs. International Small vs. Emerging Markets	Large vs. Small vs. Emerging Percentage in MSCI ACWI ex U.S.	0.5 to 2.5 times benchmark Sum must equal 100

* The Neutral Target is established based on the listed indices and is reset, subject to Allocation Committee decisions, based on these index weights every June 30.

Note: The combined investment in international developed equity, international small cap, emerging markets equity, international fixed income, and international real estate components may not exceed 30 percent of the Participant Plan allocation, as mandated by statute.

MANAGEMENT STRUCTURE

The Equity Pools are managed by the following firms, in accordance with a particular investment.

Manager	Style
U.S. Large Cap	
State Street Global Advisors	Index Core
Intech Investment Management, LLC	Quantitative Core
U.S. Non-Large Cap	
Westfield Capital Management	Growth at a Reasonable Price
Aronson + Johnson + Ortiz, LP	Relative Value
International	
Developed Markets	
Silchester International Investors	All County, Value
LSV Asset Management	All Country, Value
Small Capitalization	
Pictet Asset Management Limited	All Country, Growth at a Reasonable Price
Emerging Markets	
Brandes Investment Partners, LLC	Emerging Market, Value
State Street Global Advisors	Emerging Market, Index Core

FINANCIAL HIGHLIGHTS

Separate investment pools have been established for each investment style or to comply with specific legal and accounting requirements. These pools are individually reported in the audited financial statements and are presented in the financial highlights as follows:

Composite	Individual Pools per Audited Financial Statements
U.S. Large Cap	Large Cap Domestic Equity Pool
U.S. Non-Large Cap	Non-Large Cap Domestic Equity Pool
International	International Qualified Pool
	International Nonqualified Pool

OBJECTIVES

The main objective for the Alternative Pools is to provide diversification and risk reduction benefits for its participants' assets. Secondarily, the Pools should provide for long-term growth of its participants' assets.

MANAGEMENT STRUCTURE

The Alternative Pools are comprised of one asset class, Private Equity, and one management style, Hedge Funds. Both are intended to enhance diversification when added to the total portfolio assets.

Private Equity is comprised of the following categories and target range allocations as of June 30, 2010:

Category	Target Range
Corporate Finance	90-100%
Venture Capital	0-10%

Hedge Fund strategies are comprised of the following categories and target range allocations as of June 30, 2010:

Category	Target Range	Maximum
Relative Value	25-55%	60%
Event Driven	20-40%	50%
Long-Short Equity	15-35%	40%
Directional	0-20%	25%

FINANCIAL HIGHLIGHTS

Two separate investment pools have been established to comply with specific legal and accounting requirements. These pools are individually reported in the audited financial statements and in the financial highlights as follows:

Progression of Net Assets (in \$000s)		vate Equity	Hedge Fund		
Net assets - June 30, 2009	\$	582,890	\$	1,112,444	
Net increase from operations		132,436		112,566	
Net increase (decrease) from unit transactions		196,985		(100,980)	
Net assets - June 30, 2010	\$	912,311	\$	1,124,030	

Investment Securities (in \$000s)	Private Equity			Hedge Fund		
	F	air Value	Percent of Securities		Fair Value	Percent of Securities
Investment in other funds	\$	755,609	82.8%	\$	1,112,790	100.0%
Partnerships		129,115	14.2		-	0.0
Short-term issues		27,729	3.0		8	0.0
Total	\$	912,453	100.0%	\$	1,112,798	100.0%

INVESTMENT PERFORMANCE

The IMB calculates total rates of return using the time-weighted rate of return methodology. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals.

Performance returns are not reported for the Private Equity Pool for the first five years of the program (until June 30, 2013), as early returns from an immature program are not meaningful.

For the year ended June 30, 2010, the Hedge Fund Pool returned 10.2 percent, net of external investment management and/or partnership fees and expenses.

EXPENSES

The IMB charges each investment pool for its direct investment-related expenses and an allocated share of other expenses. The Private Equity Pool and Hedge Fund Pool's expenses for the year, divided by the average net assets, are as follows:

Expense Ratio (in basis points)	Private Equity	Hedge Fund	
Investment advisor fees	N/A	N/A	
Trustee fees	0.1	0.1	
Custodian bank fees	0.0	0.0	
Management fees	3.4	3.5	
Fiduciary bond fees	0.0	0.1	
External fees/Fund closing costs	2.5	N/A	
Professional service fees	9.4	4.3	
Total	15.4	8.0	

OBJECTIVES

The main objective for the Real Estate Pool is to provide diversification and risk reduction benefits for its participants' assets. Secondarily, the Pool should provide for long-term growth of its participants' assets.

MANAGEMENT STRUCTURE

The Real Estate Pool is comprised of three categories. The target range allocations as of June 30, 2010 are as follows:

Category	Target Range	Allocation Range
Core	50%	+/- 20% (30% to 70%)
Value-Added	30%	+/- 20% (10% to 50%)
Opportunistic	20%	+/- 10% (10% to 30%)

FINANCIAL HIGHLIGHTS

Progression of Net Assets (in \$000s)	R	Real Estate		
Net assets - June 30, 2009	\$	37,392

Short-term issues		17,088	3.5
Total	\$	491,927	100.0%

INVESTMENT PERFORMANCE

The IMB calculates total rates of return using the time-weighted rate of return methodology. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals.

For the year ended June 30, 2010, the Real Estate Pool returned 5.7 percent, net of external investment management and/or partnership fees and expenses.

EXPENSES

The IMB charges each investment pool for its direct investment-related expenses and an allocated share of other expenses. The Real Estate Pool's expenses for the year, divided by the average net assets, are as follows:

Expense Ratio (in basis points)	Real Estate
Investment advisor fees	2.7
Trustee fees	0.1
Custodian bank fees	1.9
Management fees	3.2
Fiduciary bond fees	0.1
External fees/Fund closing costs	9.2
Professional service fees	13.3
Total	30.5

The Board operates one special purpose pool: TRS ANNUITY POOL

OBJECTIVE

The TRS Annuity Pool (TRSA) holds an investment contract strictly for the benefit of the Teachers' Retirement System (TRS). The IMB assumed responsibility for this investment as part of the restructuring of the Teachers' Defined Contribution (TDC) plan, a separate retirement plan outside of the IMB, whereby certain TDC participants elected to transfer the ownership of their individual TDC retirement accounts to the TRS in exchange for current participation in the TRS defined benefit plan. The contract, issued by the Variable Annuity Life Insurance Company (VALIC), could not be liquidated as part of the restructuring and was transferred in-kind to the IMB on December 10, 2008. The final amount transferred on the contract was \$248,292,529. Effective April 23, 2009, the IMB elected to liquidate this contract and will receive five equal annual payments of \$55,058,102. Payments were received on May 4, 2009 and 2010. Remaining payments will be received on May 4, 2011, 2012, and 2013. The contract and the payments include a guaranteed annual interest yield of 4.5%.

FINANCIAL HIGHLIGHTS

Progression of Net Assets (in \$000s)	TRS Annuity	
Net assets - June 30, 2009 Net increase from operations Net decrease from unit transactions Net assets - June 30, 2010	\$ 198,904 8,425 (54,910) \$ 152,419	
Investment Securities (in \$000s)	TRS A	nnuity
	Fair Value	Percent of Securities

INVESTMENT PERFORMANCE

The IMB calculates total rates of return using the time-weighted rate of return methodology. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals.

For the year ended June 30, 2010, the TRS Annuity Pool returned 4.5 percent.

EXPENSES

The IMB charges each investment pool for its direct investment-related expenses and an allocated share of other expenses. The TRS Annuity Pool's expenses for the operating period, divided by the average net assets, are as follows:

Expense Ratio (in basis points)	TRS Annuity
Investment advisor fees	N/A
Trustee fees	0.1
Custodian bank fees	N/A
Management fees	3.6
Fiduciary bond fees	0.0
Professional service fees	3.8
Total	7.5

Participant Plans

The Deputy Sheriff's Retirement System (DSRS) was created in 1998.

LIQUIDITY NEEDS

The DSRS currently has positive net cash flows.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Preserve the current well-funded position while not subjecting the DSRS to an undue level of risk.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the DSRS. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation
Domestic Equity	30.0%	25.0%
International Equity	30.0%	25.0%
Private Equity	0.0%	10.0%
Fixed Income	40.0%	20.0%
Hedge Fund	0.0%	10.0%
Real Estate	0.0%	10.0%
Cash (included in Fixed Income above)	\$250,000*	

* IMB Staff has authority to change the cash allocation plus or minus 10 percent, as necessary, in consultation with the appropriate representative(s) from the DSRS.

The Judges' Retirement System (JRS) was created in 1949.

LIQUIDITY NEEDS

The JRS currently has positive net cash flows.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Reduce the unfunded liability while maintaining adequate liquidity to satisfy benefit payments while not subjecting the JRS to an undue level of risk.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the JRS. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation
Domestic Equity	30.0%	25.0%

The Public Employees' Retirement System (PERS) was created in 1961.

LIQUIDITY NEEDS

The PERS is expected to have modest liquidity needs of approximately 1.0 percent to 2.0 percent per year for the foreseeable future.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Reduce the unfunded liability while maintaining adequate liquidity to satisfy benefit payments and not subjecting the PERS to an undue level of risk.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the PERS. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation
Domestic Equity	30.0%	25.0%

The State Police Death, Disability and Retirement Fund (SPDDRF) was created in 1925.

LIQUIDITY NEEDS

The SPDDRF is expected to experience an increasingly negative cash flow position in the near future.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Reduce the unfunded liability while maintaining adequate liquidity to satisfy benefit payments while not subjecting the SPDDRF to an undue level of risk.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for SPDDRF. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation
Domestic Equity	30.0%	25.0%

The State Police Retirement System (SPRS) was created in 1994.

LIQUIDITY NEEDS

The SPRS is expected to be in a positive net cash flow position for the foreseeable future.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Reduce the unfunded liability while maintaining adequate liquidity to satisfy benefit payments while not subjecting the SPRS to an undue level of risk.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the SPRS. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation
Domestic Equity	30.0%	25.0%
International Equity	30.0%	25.0%
Private Equity	0.0%	10.0%
Fixed Income	40.0%	20.0%
Hedge Fund	0.0%	10.0%
Real Estate	0.0%	10.0%
Cash (included in Fixed Income above)	\$50,000*	

* IMB Staff has authority to change the cash allocation plus or minus 10 percent, as necessary, in consultation with the appropriate representative(s) from the SPRS.

The Teachers' Retirement System (TRS) was created in 1941. It was closed to new members in 1991, but reopened to firsttime hires as of July 1, 2005. Employees hired from 1991 through June 30, 2005, joined the Teachers Defined Contribution Plan (TDC). In the spring of 2008, more than 78 percent of the participants in the Teachers' Defined Contribution Plan elected to transfer their TDC account balance to the TRS and become participants in the TRS. This transfer occurred in July 2008.

The Teachers' Employers Contribution Collection Account (TECCA) is a holding account for temporary reserve cash. Due to its short-term nature, assets are entirely invested in the Short-Term Fixed Income Pool.

LIQUIDITY NEEDS

The TRS has a very dynamic net cash flow position, which is attributable to: (1) a current positive net cash flow position, and (2) substantial liquidity needs of at least 10 percent per year beginning in plan year 2014.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Reduce the unfunded liability while maintaining adequate liquidity to satisfy benefit payments while not subjecting the TRS to an undue level of risk.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the TRS. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation

The Emergency Medical Services Retirement System (EMSRS) was created by the *Emergency Medical Services Retirement* System Act effective January 1, 2008, under West Virginia Code §16-5V-4. EMSRS members with benefits earned in the Public Employees Retirement System (PERS) transfer their full membership and benefits under PERS to EMSRS on the effective date.

LIQUIDITY NEEDS

The EMSRS is expected to have a positive net cash flow position. Retirements are delayed until fiscal year 2011, resulting in minimal payouts. In fiscal year 2012, cash distributions may commence, but liquidity needs are still expected to be minimal.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 7.5 percent per annum, net of fees.
- Maintain adequate liquidity to satisfy benefit payments and not subject the EMSRS to an undue level of risk.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the EMSRS. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation
Domestic Equity	30.0%	25.0%

INVESTMENT PERFORMANCE

Investment performance for the one-year period ended June 30, 2010 was 15.7 percent. The EMSRS has a target rate of return of 7.5 percent.

The Coal Workers' Pneumoconiosis Fund (CWPF) was formed in 1974 to provide insurance coverage to coal operators for their potential liability under the *Federal Coal Mine Health and Safety Act of 1969*. Upon termination of the West Virginia Workers' Compensation Commission, the assets and liabilities of the CWPF remained with the State for administration of the run-off of the liabilities incurred during the years of operation. Effective January 1, 2006, insurance coverage for liabilities incurred under the *Federal Coal Mine Health and Safety Act of 1969* will be provided by private insurance carriers and is no longer available through the State.

LIQUIDITY NEEDS

The liquidity needs are actuarially determined based on the run-off of liabilities, which are assessed annually.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Exceed the actuarial interest rate assumption of 5.0 percent per annum, net of fees.
- Preserve the current surplus position.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the CWPF. Policy and Strategic Allocations are established on a market value basis.

Formed in January 2006, the Workers' Compensation Old Fund (Old Fund) assumed responsibility for payment of all workers' compensation claims and liabilities incurred by the former West Virginia Workers' Compensation Commission prior to July 1, 2005. After July 1, 2005, workers' compensation claims or liabilities incurred are covered by private insurance carriers.

LIQUIDITY NEEDS

The Old Fund has low liquidity needs through approximately 2015, as expected operating cash inflows exceed expected operating cash outflows. Operating cash inflows will be supplemented by multiple external sources, including statutorily pledged personal income tax and severance tax legislative transfers equal to the amount of any cash shortfall every year until full funding is achieved. For this reason, the Old Fund should maintain a flat to slightly positive net cash flow position until it is fully funded at which time pledged legislative transfers will cease, resulting in a sharp decline in net cash inflows. Liquidity needs for short-term cash, the amount necessary for approximately twelve months' worth of anticipated claims, will continue to be reviewed annually with appropriate staff from the West Virginia Offices of the Insurance Commissioner. Currently, a cash balance is maintained by the Old Fund in an amount equal to 10% of the Old Fund's asset value or \$50 million, whichever is greater, in anticipation of a potential settlement program payout.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Preservation of principal and minimization of volatility, while still achieving some investment earnings growth adjusted for inflation.
- Provide adequate liquidity to meet cash flow requirements.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the Old Fund. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation

The Workers' Compensation Self-Insured Guaranty Risk Pool (Self-Insured Pool) was established on January 1, 2006, for the purpose of paying the workers' compensation claims of defaulted self-insured employers occurring on or after July 1, 2004. It consists of those funds transferred, and any future funds collected, under the authority of Senate Bill 1004.

LIQUIDITY NEEDS

As all current and active self-insured employers are required to provide a bond, security, or other collateral to the West Virginia Offices of the Insurance Commissioner in the event of a deteriorating financial condition, it is anticipated that the liquidity position of this fund should remain stable.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Provide adequate liquidity to meet cash flow requirements.
- Exceed the actuarial rate assumption, which is not expected to exceed 5.0 percent per annum, net of fees, once established.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the Self-Insured Pool. Policy Allocation is established on a market value basis.

The Workers' Compensation Uninsured Employers' Fund (Uninsured Fund) was established January 1, 2006, under Senate Bill 1004 to provide for the benefit of injured workers, whose employers failed to provide mandatory workers' compensation coverage. The Uninsured Fund received initial funding of \$5 million by proclamation of the Governor.

LIQUIDITY NEEDS

During the early years of the Uninsured Fund, the liquidity needs will be high as the cash flows are difficult to predict until the frequency of claim activity is established.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Provide adequate liquidity to meet cash flow requirements.
- Exceed the actuarial rate assumption, which is not expected to exceed 5.0 percent per annum, net of fees, once established.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the Uninsured Fund. Policy Allocation is established on a market value basis.

The Wildlife Endowment Fund was created in 1986 to supplement the Division of Natural Resources' annual budget in support of various statewide projects.

LIQUIDITY NEEDS

The liquidity needs of the Wildlife Endowment Fund will be set on an annual basis and determined by a separate Wildlife Endowment Board as established by the Division of Natural Resources.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Achieve a total rate of return of at least 6.0 percent per annum, net of fees.
- Provide adequate liquidity to meet cash flow requirements.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the Wildlife Endowment Fund. Policy and Strategic Allocations are established on a market value basis.

The West Virginia Prepaid Tuition Trust Fund (Tuition Trust) was established in 1997 with the objective of enhancing and improving higher education in the State. This is accomplished by providing individuals and organizations a means for paying future college tuition and fees in advance at a rate set at current levels.

Effective March 2003, the Tuition Trust was closed to new contracts unless the Legislature authorizes the fund to reopen. The West Virginia Prepaid Tuition Trust Escrow Account (Escrow Account) was created in 2003 in the State Treasury to guarantee payment of existing prepaid tuition plan contracts. The Escrow Account was closed in April 2009 and the residual balance remaining at June 30, 2009 was withdrawn in September 2010.

LIQUIDITY NEEDS

There are rising liquidity needs for the Tuition Trust. Benefits and expenses will exceed receipts from participants' monthly payments on prepaid tuition contracts at an increasing rate in future years.

INVESTMENT OBJECTIVES

The investment objectives are as follows:

- Meet or exceed actuarial interest rate assumption of 7.25 percent per annum, net of fees.
- Generate long-term, net of fee, returns that exceed liquidity needs.
- Build and maintain an actuarial surplus at a level recommended by the actuaries.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the Tuition Trust. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation

The Revenue Shortfall Reserve Fund (Reserve Fund) was created as a result of legislation passed in the 2006 regular legislative session under *West Virginia Code §11B-2-20*. It is to be funded from State surplus revenues accrued, if any, during the most recent fiscal year. The first 50 percent of all such surplus revenues will be deposited into the Reserve Fund within 60 days of the end of each fiscal year. The Reserve Fund is not required to be additionally funded if, or when, its balance meets or exceeds 10 percent of the State's General Revenue Fund budget for the fiscal year just ended. The West Virginia Legislature is authorized and may make an appropriation from the Reserve Fund for revenue shortfalls, for emergency revenue needs caused by acts of God or natural disasters, or for other fiscal needs, as it determines.

LIQUIDITY NEEDS

The Reserve Fund is intended to be co-managed between the IMB and the West Virginia Board of Treasury Investments. A cash account of \$100 million must be invested throughout the life of the Reserve Fund in cash with the West Virginia Board of Treasury Investments. Any assets in excess of \$100 million will be invested with the IMB. The West Virginia State Budget Office will monitor these asset balances and will direct both the IMB and the West Virginia Board of Treasury Investments when the transfer of funds is necessary from one to the other.

Future cash outflows are uncertain. The assets may be withdrawn, in whole or in part, at any time as directed by the West Virginia State Legislature or by executive order. Historically, cash outflows in similar state funds created for similar purposes have had withdrawals reimbursed by the State within each fiscal year.

INVESTMENT OBJECTIVES (for the assets managed by the IMB)

The investment objective is to provide for preservation of principal and minimization of volatility. There is no specifically identified target rate of return, as the Reserve Fund is a perpetual, endowment-like fund with no anticipated or scheduled liabilities.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the Reserve Fund. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation
Domestic Equity	0.0%	0.0%
International Equity	0.0%	0.0%
Private Equity	0.0%	0.0%
Fixed Income	100.0%	100.0%
Hedge Fund	0.0%	0.0%
Real Estate	0.0%	0.0%
Cash	\$0*	

* Statutory cash requirements of \$100 million will be invested by the West Virginia Board of Treasury Investments.

Hedge Fund		21,323	11.9
Total	\$	178,631	100.0%

INVESTMENT PERFORMANCE

The IMB calculates total rates of return using the time-weighted rate of return methodology. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals. A target rate of return has not been set for this plan.

Period	Actual
One-year	18.5%
Three-year	-2.8%

The Revenue Shortfall Reserve Fund - Part B (Reserve Fund - Part B), created by legislation passed in the 2006 regular legislative session under *West Virginia Code §11B-2-20*, was funded using the entire balance of the assets in the former Tobacco Settlement Medical Trust Fund. The West Virginia Legislature is authorized and may make expenditures from the Reserve Fund - Part B for the purposes set forth in *West Virginia Code §4-11A-3* or in instances of revenue shortfalls or fiscal emergencies of an extraordinary nature.

LIQUIDITY NEEDS

The Reserve Fund - Part B is intended to experience no cash outflows, but this is not entirely certain, as the West Virginia Legislature may appropriate a qualified expenditure as noted above. Cash inflows are expected to be minimal and emanate from loan repayments from the Physicians' Mutual Insurance Company [West Virginia Code §33-20F] as well as other insurance tax payments.

INVESTMENT OBJECTIVES

The investment objective is to provide for stable, long-term growth of assets, while seeking to minimize risk of loss. There is no specifically identified rate of return target as the Reserve Fund - Part B is a perpetual, endowment-like fund with no anticipated or scheduled liabilities.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the Reserve Fund - Part B. Policy and Strategic Allocations are established on a market value basis.

INVESTMENT PERFORMANCE

The IMB calculates total rates of return using the time-weighted rate of return methodology. The time-weighted method determines the rate of return exclusive of the effects of participant contributions or withdrawals. A target rate of return has not been set for this plan.

Period	Actual
One-year	16.5%
Three-year	-3.6%

HISTORY

The Board of Risk and Insurance Management (BRIM) is a State entity charged with providing insurance coverage to all State agencies, as well as cities, counties, and non-profit organizations throughout West Virginia under the provisions of Senate Bill 3. BRIM also provides a coal mine subsidence reinsurance program that allows homeowners and businesses to obtain insurance coverage up to \$75,000 for collapses and damage caused by underground coal mines.

LIQUIDITY NEEDS

There are no current liquidity needs for BRIM since cash inflows from operations are currently sufficient to pay claims and expenses. BRIM requires a cash reserve account for collateral purposes amounting to approximately 15 percent of the funds for investment. This amount is invested with the West Virginia Board of Treasury Investments and utilized at BRIM's discretion. BRIM advises the IMB staff of the amounts in this cash reserve account.

INVESTMENT OBJECTIVES

The investment objective is as follows:

• Achieve a total rate of return of at least 4.9 percent per annum, net of fees.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the BRIM. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation
Domestic Equity	10.0%	10.0%
International Equity	10.0%	10.0%

HISTORY

The Public Employees Insurance Agency (PEIA) is a State entity charged with providing health insurance coverage to current and retired public employees.

LIQUIDITY NEEDS

The PEIA projects net cash outflows from operations every year going forward. This anticipated high liquidity requirement within a three-year time horizon indicates a substantial allocation to cash is appropriate. PEIA currently manages part of its 40 percent cash allocation and invests this amount with the West Virginia Board of Treasury Investments. The IMB collaborates with management at PEIA to monitor combined cash levels.

INVESTMENT OBJECTIVES

The investment objective is as follows:

• Achieve a total rate of return of at least 5.4 percent per annum, net of fees.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the PEIA. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation
Domestic Equity	7.5%	7.5%
International Equity	7.5%	7.5%
Private Equity	0.0%	0.0%
Fixed Income	85.0%	65.0%
Hedge Fund	0.0%	20.0%
Real Estate	0.0%	0.0%
Cash	\$0*	

* IMB Staff has authority to change the cash allocation plus or minus 10 percent, as necessary, in consultation with the appropriate representative(s) from the PEIA. Not all cash is invested with the IMB.

HISTORY

The West Virginia Retiree Health Benefit Trust Fund (RHBTF) was created under *West Virginia Code* §5-16D for the purpose of providing for and administering retiree post-employment health care benefits, and the respective revenues and costs of those benefits as a cost sharing multiple employer plan.

LIQUIDITY NEEDS

The RHBTF is expected to have minimal liquidity needs until fiscal year 2011, at which time annual liquidity needs will become high.

INVESTMENT OBJECTIVES

The investment objective is to provide for stable, long-term growth of assets, while seeking to minimize risk of loss. There is no specifically identified rate of return target.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for the RHBTF. Policy and Strategic Allocations are established on a market value basis.

Asset Class	Policy Allocation	Strategic Allocation
Domestic Equity	2.5%	2.5%
International Equity	2.5%	2.5%

INVESTMENT PERFORMANCE

Investment performance for the one-year period ended June 30, 2010 was 14.4 percent. RHBTF has no defined target rate of return.

HISTORY

AccessWV (AWV) is a health plan created by West Virginia statute to provide health insurance to West Virginians who have been unable to find or who have been denied health insurance in the private market because of a medical condition. Only a portion of the plan is invested with the IMB.

LIQUIDITY NEEDS

AWV is expected to have no liquidity needs from the IMB portion until fiscal year 2015.

INVESTMENT OBJECTIVES

The investment objective is to provide for stable, long-term growth of assets, while seeking to minimize risk of loss. There is no specifically identified rate of return target.

ASSET ALLOCATION

Based upon a determination of the appropriate risk tolerance, the Board adopted the following broad asset allocation guidelines for the assets managed for AWV. Policy and Strategic Allocations are established on a market value basis.

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations and changes in net assets for the year then ended for the West Virginia Investment Management Board (WVIMB) Large Cap Domestic Equity Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in note 1, these financial statements were prepared on a basis of accounting following U.S. generally accepted accounting principles established by the AICPA applicable to investment companies which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board Large Cap Domestic Equity Pool as of June 30, 2010, and the results of its operations and changes in net assets for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Large Cap Domestic Equity Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool's objective is to exceed, net of external investment management fees, the S&P 500 Stock Index over three- to fiveyear periods. Assets are managed by Intech Investment Management, LLC, and State Street Global Advisors.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments in equity securities are carried at fair value, which is determined by a third party pricing service based on quoted market prices. The investment in the Dreyfus Cash Management Institutional Fund, a regulated investment company money market mutual fund, is valued at \$1.00 per share. This is a reasonable estimate of the fair value and is the basis for current transactions. Futures contracts are valued at the last settlement price established each day by the exchange on which they are traded. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

Security Loans - The IMB, through its agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by initial collateral of at least 102 percent of the market value

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

of the securities loaned. Cash collateral received is invested in the Mellon GSL Reinvestment Trust and is reported on the Statement of Assets and Liabilities. Securities loaned remain on the Statement of Assets and Liabilities and Schedule of Investments in Securities. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as securities lending income. The agent fees and broker rebates are reported as expenses, and unrealized gains or losses resulting from changes in the value of the investment of cash collateral are reported as part of the net increase or decrease in the fair value of investments. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations as net increase or decrease in the fair value of investments.

Futures Contracts - A futures contract is an agreement between a buyer or a seller and the clearinghouse of a futures exchange in which the parties agree to buy or sell a commodity, financial instrument or index at a specified future date and price. Upon entering into a financial futures contract, the IMB is required to pledge to the broker an amount of cash, U.S. government securities, or other assets, equal to a certain percentage of the contract amount (initial margin deposit). Cash (variation margin) is received from or paid to the broker on a daily basis for the fluctuations of the underlying securities or index. The IMB records futures at fair market value as determined by the exchange on which they are traded. Gains or losses on open futures positions are unrealized. These gains or losses become realized when the position is closed.

Stock index futures may be used to provide immediate exposure to fluctuations in the market values of the stocks in the underlying index and to provide liquidity for cash flows.

The market risk associated with holding stock index futures results from changes in the market value of the contractual positions due to changes in the value of the underlying instruments or indices. Investment risk associated with these futures contracts arises because the value of the futures contracts may not correlate perfectly with changes in the values of the underlying instruments or indices.

Other risks associated with futures contracts are liquidity risk and credit risk. Liquidity risk arises when there is insufficient trading in a particular futures contract. Credit risk arises from the potential inability of counterparties to meet the terms of the contracts. The IMB's managers generally only utilize futures contracts that are traded on major exchanges or are executed with major dealers. The major exchanges assume the risk of a counterparty default and generally require an initial margin deposit of cash or securities.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

The Pool holds equity securities of U.S. companies, exchange traded stock index futures, and money market funds with the highest credit rating. These types of securities are not exposed to credit risk, interest rate risk, custodial credit risk, or foreign currency risk. At June 30, 2010, the Pool, in accordance with West Virginia statutes, did not hold securities of any one issuer in excess of 5 percent of the value of the Pool and is not exposed to concentration of credit risk.

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years beginning after December 15, 2010. This ASU was implemented for fiscal year ended June 30, 2010, and did not have a material impact on the Pool's financial statements.

(Amounts in thousands, except share data)

NOTE 5. DERIVATIVE FINANCIAL INSTRUMENTS

Futures contracts are the only derivative financial instruments held in the Pool. These derivative financial instruments are not designated as hedging instruments under ASC 815; they are used to provide immediate exposure to fluctuations in the market values of the stocks in the underlying index and to provide liquidity for cash flows. The primary risk managed by using these derivative financial instruments is market risk. See Note 2 for additional information on the Pool's purpose for entering into derivatives not designated as hedging instruments and for discussion on the risks associated with investing in these derivatives.

The table below presents the fair value of the derivative financial instruments not designated as hedging instruments recorded in the Statement of Assets and Liabilities as of June 30, 2010:

	Asset Derivatives		Liability De	erivatives
Derivatives not designated as hedging instruments under ASC 815	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location	Fair Value
Equity contracts		\$ -	Unrealized loss on futures contracts	\$ (597)

The table below presents the impact of the derivative financial instruments not designated as hedging instruments recorded in the Statement of Operations for the year ended June 30, 2010:

Derivatives not designated as hedging instruments under ASC 815	Statement of Operations Location		Realized Gain (Loss)		
Equity contracts	Net realized gain from investments	\$	251		

NOTE 6. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

(Amounts in thousands, except share data)

NOTE 6. FAIR VALUE MEASUREMENTS (continued)

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2010:

	Level 1	Level 2	Level 3	Total	
Equity Securities	\$ 1,701,054	\$ -	\$ -	\$ 1,701,054	
Regulated Investment Companies	-	13,810	-	13,810	
Securities Lending Collateral Funds	-	72,732	-	72,732	
Futures	(597)			(597)	
Total	\$ 1,700,457	\$ 86,542	\$ -	\$ 1,786,999	

NOTE 7. SECURITIES LENDING

At June 30, 2010, the fair value of securities on loan was \$76,473, the initial collateral received was \$78,502, and the fair value of collateral held was \$75,108. Of the collateral held, \$76,067 was received as cash and invested in the Mellon GSL DBT II Collateral Fund (Collateral Fund), the Mellon SL DBT II Liquidating Fund (Liquidating Fund), and the Mellon GSL DBT II Liquidating Trust (Liquidating Trust) with a fair value of \$72,732.

In early November 2008, the IMB was notified that certain securities issued by Sigma Finance, Inc. (Sigma) were transferred from the Collateral Fund on October 1, 2008, to the Liquidating Trust. Units of the Liquidating Trust were transferred to the IMB's securities lending cash collateral account. For all of the IMB investment pools that participate in the securities lending program, the value of the units in the Liquidating Trust on an amortized cost basis was \$10,974 as calculated by the IMB's proportionate interest in the Collateral Fund as of the close of business on September 30, 2008. Sigma was subsequently placed into receivership and the IMB is exposed to a potential loss of the full value of the Sigma investment. In October 2008, the IMB recorded a reserve for these potential losses in each investment pool in proportion to its participation in the securities lending program at September 30, 2008. The reserve recorded for the Pool was \$3,248.

Effective April 20, 2009, the assets of the Collateral Fund with maturities greater than one day were transferred to the Liquidating Fund. As securities mature in the Liquidating Fund, the proceeds are transferred to the Collateral Fund. The combined value of the holdings in the Collateral Fund and the Liquidating Fund is used to determine the fair value of reinvested collateral.

Additionally, the distribution of securities lending income has been restricted beginning October 1, 2008. The restriction will remain in place until the actual loss on Sigma is realized. At June 30, 2010 the accumulated undistributed securities lending income was \$1,774.

NOTE 8. FUTURES CONTRACTS

At June 30, 2010, open positions in futures contracts were as follows:

Expiration	Open Contracts	Position	/alue at e 30, 2010]	alue Upon Entering Contract	Net C	mulative Gain (Loss) e Inception
Sept 2010	218 S&P 500	Long	\$ 11,190	\$	11,787	\$	(597)

At June 30, 2010, the Pool had pledged cash of \$1,483 to cover margin requirements on open futures contracts.

(Amounts in thousands, except share data)

NOTE 9. FINANCIAL HIGHLIGHTS

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations and changes in net assets for the year then ended for the West Virginia Investment Management Board (WVIMB) Non-Large Cap Domestic Equity Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in note 1, these financial statements were prepared on a basis of accounting following U.S. generally accepted accounting principles established by the AICPA applicable to investment companies which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board Non-Large Cap Domestic Equity Pool as of June 30, 2010, and the results of its operations and changes in net assets for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment-related operations of the IMB's Non-Large Cap Domestic Equity Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool invests in the equities of small- to mid-sized companies and its objective is to exceed, net of external investment management fees, the Russell 2500 Index over three- to five-year periods. Assets are managed by Aronson + Johnson + Ortiz, LP and Westfield Capital Management.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments in equity securities are carried at fair value, which is determined by a third party pricing service based on quoted market prices. The investment in the Dreyfus Cash Management Institutional Fund, a regulated investment company money market mutual fund, is valued at \$1.00 per share. This is a reasonable estimate of the fair value and is the basis for current transactions. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Security Loans - The IMB, through its agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by initial collateral of at least 102 percent of the market value of the securities loaned. Cash collateral received is invested in the Mellon GSL Reinvestment Trust and is reported on the Statement of Assets and Liabilities. Securities loaned remain on the Statement of Assets and Liabilities and Schedule of Investments in Securities. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as securities lending income. The agent fees and broker rebates are reported as expenses, and unrealized gains or losses resulting from changes in the value of the investment of cash collateral are reported as part of the net increase or decrease in the fair value of investments. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations as net increase or decrease in the fair value of investments.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

The Pool holds equity securities of U.S. companies and money market funds with the highest credit rating. These types of securities are not exposed to credit risk, interest rate risk, custodial credit risk, or foreign currency risk. At June 30, 2010, the Pool, in accordance with West Virginia statutes, did not hold securities of any one issuer in excess of 5 percent of the value of the Pool and is not exposed to concentration of credit risk.

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification (Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by

(Amounts in thousands, except share data)

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS (continued)

nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years beginning after December 15, 2010. This ASU was implemented for fiscal year ended June 30, 2010, and did not have a material impact on the Pool's financial statements.

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.
- Level 3 Unobservable pricing inputs for assets and liabilities.

(Amounts in thousands, except share data)

NOTE 5. FAIR VALUE MEASUREMENTS (continued)

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2010:

	Level 1	<u> </u>	Level 2	Lev	el 3	 Total
Equity Securities	\$ 334,521	\$	-	\$	-	\$ 334,521
Regulated Investment Companies	-		7,466		-	7,466
Securities Lending Collateral Funds	-		89,931		-	 89,931
Total	\$ 334,521	\$	97,397	\$	-	\$ 431,918

NOTE 6. SECURITIES LENDING

At June 30, 2010, the fair value of securities on loan is \$89,979, initial collateral received is \$92,287, and the fair value of collateral held is \$89,931. All of the collateral was received as cash and is invested in the Mellon GSL DBT II Collateral Fund (Collateral Fund), the Mellon SL DBT II Liquidating Fund (Liquidating Fund), and the Mellon GSL DBT II Liquidating Trust (Liquidating Trust).

In early November 2008, the IMB was notified that certain securities issued by Sigma Finance, Inc. (Sigma) were transferred from the Collateral Fund on October 1, 2008, to the Liquidating Trust. Units of the Liquidating Trust were transferred to the IMB's securities lending cash collateral account. For all of the IMB investment pools that participate in the securities lending program, the value of the units in the Liquidating Trust on an amortized cost basis was \$10,974 as calculated by the IMB's proportionate interest in the Collateral Fund as of the close of business on September 30, 2008. Sigma was subsequently placed into receivership and the IMB is exposed to a potential loss of the full value of the Sigma investment. In October, the IMB recorded a reserve for these potential losses in each investment pool in proportion to its participation in the securities lending program at September 30, 2008. The reserve recorded for the Pool is \$2,247.

Effective April 20, 2009, the assets of the Collateral Fund with maturities greater than one day were transferred to the Liquidating Fund. As securities mature in the Liquidating Fund, the proceeds are transferred to the Collateral Fund. The combined value of the holdings in the Collateral Fund and the Liquidating Fund is used to determine the fair value of reinvested collateral.

Additionally, the distribution of securities lending income has been restricted beginning October 1, 2008. The restriction will remain in place until the actual loss on Sigma is realized. At June 30, 2010, the accumulated undistributed securities lending income is \$893.

(Amounts in thousands, except share data)

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations, changes in net assets and cash flows for the year then ended for the West Virginia Investment Management Board (WVIMB) International Qualified Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in note 1, these financial statements were prepared on a basis of accounting following U.S. generally accepted accounting principles established by the AICPA applicable to investment companies which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board International Qualified Pool as of June 30, 2010, and the results of its operations, changes in net assets and cash flows for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's International Qualified Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

Funds are invested in Silchester International Investors' Value Equity Group Trust. The Pool is expected to produce investment returns that exceed the Morgan Stanley Capital International's Europe Australasia Far East (EAFE) index by 200 basis points on an annualized basis over three to five-year periods, net of external investment management fees. Only "qualified participants" (as defined by the *Internal Revenue Code*) may invest in the Pool.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments in other funds are valued at the reported net asset values of the individual funds, provided by the fund's management, as a practical expedient for measuring fair value.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

The Pool invests in a collective trust fund that invests in equities denominated in foreign currencies. The value of this investment at June 30, 2010, was \$695,712. This investment, although denominated in U.S. dollars, is exposed to foreign currency risk through the underlying investments. West Virginia statute limits the amount of international securities to no more than 30 percent of the total assets managed by the IMB. At June 30, 2010 the IMB was in compliance with this limitation. The Pool is not exposed to credit risk, interest rate risk, custodial credit risk, or concentration of credit risk.

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

(Amounts in thousands, except share data)

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS (continued)

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years beginning after December 15, 2010. This ASU was implemented for fiscal year ended June 30, 2010, and did not have a material impact on the Pool's financial statements.

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.
- Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2010:

	Level	1	I	Level 2	Level	3	 Total
Investments in Other Funds	\$	-	\$	695,712	\$	-	\$ 695,712

(Amounts in thousands, except share data)

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations, changes in net assets and cash flows for the year then ended for the West Virginia Investment Management Board (WVIMB) International Nonqualified Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in note 1, these financial statements were prepared on a basis of accounting following U.S. generally accepted accounting principles established by the AICPA applicable to investment companies which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board International Nonqualified Pool as of June 30, 2010, and the results of its operations, changes in net assets and cash flows for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's International Nonqualified Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

Funds are invested in Silchester International Investors' Value Equity Trust. The Pool is expected to produce investment returns that exceed the Morgan Stanley Capital International's EAFE index by 200 basis points on an annualized basis over three- to five-year periods, net of external investment management fees. The Pool exists for participants who are not "qualified" (as defined by the *Internal Revenue Code*).

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments in other funds are valued at the reported net asset values of the individual funds, provided by the fund's management, as a practical expedient for measuring fair value.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

The Pool invests in a collective trust fund that invests in equities denominated in foreign currencies. The value of this investment at June 30, 2010, was \$53,797. This investment, although denominated in U.S. dollars, is exposed to foreign currency risk through the underlying investments. West Virginia statute limits the amount of international securities to no more than 30 percent of the total assets managed by the IMB. At June 30, 2010 the IMB was in compliance with this limitation. The Pool is not exposed to credit risk, interest rate risk, custodial credit risk, or concentration of credit risk.

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in

(Amounts in thousands, except share data)

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS (continued)

and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years beginning after December 15, 2010. This ASU was implemented for fiscal year ended June 30, 2010, and did not have a material impact on the Pool's financial statements.

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2010:

	Leve	11	L	level 2	Leve	13	 Total
Investments in Other Funds	\$	-	\$	53,797	\$	-	\$ 53,797

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations and changes in net assets for the year then ended for the West Virginia Investment Management Board (WVIMB) International Equity Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in note 1, these financial statements were prepared on a basis of accounting following U.S. generally accepted accounting principles established by the AICPA applicable to investment companies which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board International Equity Pool as of June 30, 2010, and the results of its operations and changes in net assets for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

(Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's International Equity Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

This Pool invests in the equities of international companies. Assets are managed by Brandes Investment Partners, LLC, LSV Asset Management, Pictet Asset Management Limited, and State Street Global Advisors. The objective of the Pool is to exceed, net of external investment management fees, Morgan Stanley Capital International's All Country World Free Ex US index over three- to five-year periods.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments in equity securities are carried at fair value, which is determined by a third party pricing service based on quoted market prices. The investment in the Dreyfus Cash Management Institutional Fund, a regulated investment company money market mutual fund, is valued at \$1.00 per share. This is a reasonable estimate of the fair value and is the basis for current transactions. Foreign currency forward contracts are valued at either spot or forward month-end exchange rates. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Foreign Currency – Amounts denominated in or expected to settle in foreign currencies are translated into U.S. dollars at exchange rates reported by the Bank of New York Mellon on the following basis:

- a. Market value of investment securities, other assets and liabilities at the closing rate of exchange at the valuation date.
- b. Purchases and sales of investment securities, income and expenses at the rate of exchange prevailing on the respective dates of such transactions.

The IMB isolates that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from market prices of securities held.

Reported net realized foreign exchange gains and losses arise from sales of portfolio securities, sales and maturities of shortterm securities, sales of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities including investments in securities at month end, resulting from changes in the exchange rate.

Security Loans - The IMB, through its agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for international securities is secured by initial collateral of at least 105 percent of the market value of the securities loaned. Cash collateral received is invested in the Mellon GSL Reinvestment Trust and is reported on the Statement of Assets and Liabilities. Securities loaned remain on the Statement of Assets and Liabilities and Schedule of Investments in Securities. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as securities lending income. The agent fees and broker rebates are reported as expenses, and unrealized gains or losses resulting from changes in the value of the investment of cash collateral are reported as part of the net increase or decrease in the fair value of investments. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations.

Foreign Exchange Forward Contracts - A foreign exchange forward contract is an agreement between two parties to exchange different currencies at a specified exchange rate at an agreed upon future date. The managers enter into such contracts to hedge the assets and liabilities related to securities denominated in a foreign currency. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. These contracts have relatively short durations and are valued at the prevailing market exchange rates at month end. An unrealized gain or loss is recorded as the difference between the amount valued at month end and the amount to be received or paid at the expiration date. The unrealized gain or loss is reclassified to realized gain or loss when the contract expires.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

The Pool is not exposed to credit risk, interest rate risk, or custodial credit risk. At June 30, 2010, the Pool, in accordance with West Virginia statutes, did not hold securities of any one issuer in excess of 5 percent of the value of the Pool. The Pool has both equity securities and cash that are denominated in foreign currencies and are exposed to foreign currency risks. West Virginia statute limits the amount of international securities to no more than 30 percent of the total assets managed by the IMB. At June 30, 2010 the IMB was in compliance with this limitation. The amounts at fair value (in U.S. dollars) of the securities and cash denominated in foreign currencies as of June 30, 2010 are as follows:

Currency	Equit	y Securities	Cash	Total
Australian Dollar	\$	28,001	\$ 8	\$ 28,009

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

This table excludes cash and securities held by the Pool that are denominated in U.S. dollars. The market value of the U.S. dollar denominated cash and securities is \$185,968.

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years beginning after December 15, 2010. This ASU was implemented for fiscal year ended June 30, 2010, and did not have a material impact on the Pool's financial statements.

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

(Amounts in thousands, except share data)

NOTE 5. FAIR VALUE MEASUREMENTS (continued)

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2010:

	Level 1	Level 2	Level 3	Total
Equity Securities	\$ 1,469,624	\$ -	\$ -	\$ 1,469,624
Regulated Investment Companies	-	26,133	-	26,133
Foreign Exchange Forward Contracts	-	4	-	4
Securities Lending Collateral Funds		114,456		114,456
Total	\$ 1,469,624	\$ 140,593	\$ -	\$ 1,610,217

NOTE 6. SECURITIES LENDING

At June 30, 2010, the fair value of securities on loan is \$103,525, initial collateral received is \$118,077, and the fair value of reinvested collateral held is \$114,456. All of the collateral was received as cash and is invested in the Mellon GSL DBT II Collateral Fund (Collateral Fund), the Mellon SL DBT II Liquidating Fund (Liquidating Fund), and the Mellon GSL DBT II Liquidating Trust (Liquidating Trust).

In early November 2008, the IMB was notified that certain securities issued by Sigma Finance, Inc. (Sigma) were transferred from the Collateral Fund on October 1, 2008, to the Liquidating Trust. Units of the Liquidating Trust were transferred to the IMB's securities lending cash collateral account. For all of the IMB investment pools that participate in the securities lending program, the value of the units in the Liquidating Trust on an amortized cost basis was \$10,974 as calculated by the IMB's proportionate interest in the Collateral Fund as of the close of business on September 30, 2008. Sigma was subsequently placed into receivership and the IMB is exposed to a potential loss of the full value of the Sigma investment. In October 2008, the IMB recorded a reserve for these potential losses in each investment pool in proportion to its participation in the securities lending program at September 30, 2008. The reserve recorded for the Pool is \$3,486.

Effective April 20, 2009, the assets of the Collateral Fund with maturities greater than one day were transferred to the Liquidating Fund. As securities mature in the Liquidating Fund, the proceeds are transferred to the Collateral Fund. The combined value of the holdings in the Collateral Fund and the Liquidating Fund is used to determine the fair value of reinvested collateral.

Additionally, the distribution of securities lending income has been restricted beginning October 1, 2008. The restriction will remain in place until the actual loss on Sigma is realized. At June 30, 2010 the accumulated undistributed securities lending income is \$2,896.

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations and changes in net assets for the year then ended for the West Virginia Investment Management Board (WVIMB) Short-Term Fixed Income Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in note 1, these financial statements were prepared on a basis of accounting following U.S. generally accepted accounting principles established by the AICPA applicable to investment companies which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board Short-Term Fixed Income Pool as of June 30, 2010, and the results of its operations and changes in net assets for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Short-Term Fixed Income Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The main objective of the Pool is to maintain sufficient liquidity to fund withdrawals by the participant plans and to invest cash contributions until such time as the money can be transferred to other asset classes without sustaining capital losses. JP Morgan Investment Advisors, Inc. manages the Pool. The Pool's investment performance, net of external investment management fees, is expected to meet or exceed the Salomon ninety-day T-bill index plus fifteen basis points.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments are carried at amortized which approximates fair value. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

Repurchase Agreements - In connection with transactions in repurchase agreements, it is the IMB's policy that its designated custodian take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the IMB may be delayed or limited.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Amortization - Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security.

Distributions to Participants - The net investment income of the Pool is declared as a dividend and distributed daily to the participants based upon their pro rata participation in the Pool. The distributions of net investment income are credited to the participants' accounts in the form of dividend reinvestments in the Pool and are presented first as distributions to participants, and then as reinvestment of distributions on the Statement of Changes in Net Assets.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The IMB limits the exposure to credit risk in the Pool by requiring all corporate bonds to be rated AA or higher. Commercial paper must be rated A1 by Standard & Poor's and P1 by Moody's. Additionally, the Pool must have at least 15 percent of its assets in United States Treasury issues.

The following table provides information on the weighted average credit ratings of the Pool's investments as of June 30, 2010.

Security Type	Moody's	S&P	Carr	ying Value	Percent
U.S. Treasury bills	Aaa	AAA	\$	126,984	41.4%
Agency discount notes	P-1	A-1		89,973	29.3%
Commercial paper	P-1	A-1		38,997	12.7%
U.S. Treasury notes	Aaa	AAA		25,572	8.4%
Agency notes	Aaa	AAA		24,999	8.2%
Money market fund	Aaa	AAA		1	0.0%
Total rated investments			\$	306,526	100.0%

This table includes securities received as collateral for repurchase agreements with a fair value of \$70,971 as compared to the amortized cost of the repurchase agreements of \$69,861.

(Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

Concentration of Credit Risk

West Virginia statutes prohibit the Pool from investing more than 5 percent of its assets in securities issued by a single private corporation or association. At June 30, 2010, the Pool did not have investments in any one private corporation or association that represented more than 5 percent of assets.

Custodial Credit Risk

At June 30, 2010, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements are collateralized at 102 percent and the collateral is held in the name of the IMB. All remaining securities are held by the IMB's custodian in the name of the IMB.

Interest Rate Risk

The weighted average maturity of the investments of the Pool is not to exceed sixty days. The maturity of floating rate notes is assumed to be the next interest rate reset date. The following table provides the weighted average maturities (WAM) for the various asset types in the Short-Term pool as of June 30, 2010.

Security Type	Carrying Value		WAM (days)
Agency discount notes	\$	89,973	48
U.S. Treasury bills		81,586	32
Repurchase agreements		69,861	1
Commercial paper		38,997	11
Agency notes		24,999	41
Money market fund		1	1
Total assets	\$	305,417	28

Foreign Currency Risk

The Pool has no securities that are subject to foreign currency risk.

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

(Amounts in thousands, except share data)

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS (continued)

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years beginning after December 15, 2010. This ASU was implemented for fiscal year ended June 30, 2010, and did not have a material impact on the Pool's financial statements.

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.
- Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2010:

Lev	el 1]	Level 2	Lev	el 3		Total
\$	-	\$	89,973	\$	-	\$	89,973
	-		81,586		-		81,586

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations and changes in net assets for the year then ended for the West Virginia Investment Management Board (WVIMB) Total Return Fixed Income Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in note 1, the West Virginia Investment Management Board is comprised of an Administrative Fund and distinct Investment Pools. These financial statements present only the Administrative Fund of the West Virginia Investment Management Board and do not include the financial position and results of operations of the Investment Pools. Accordingly, these financial statements do not purport to, and do not, present the complete financial position of the West Virginia Investment Management Board as of June 30, 2010, or the changes in its financial position for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board Total Return Fixed Income Pool as of June 30, 2010, and the results of its operations and changes in net assets for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Total Return Fixed Income Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The main objective of this Pool is to earn superior returns with low volatility by actively investing in the extended fixed income markets. Dodge & Cox and Western Asset Management Company (Western) manage the Pool. The Pool's investment performance, net of external investment management fees, is expected to meet or exceed the Barclays Capital US Universal index.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments in debt securities are carried at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. Investments in other funds are valued at the reported net asset values of the individual funds, provided by the fund's management, as a practical expedient for measuring fair value. The investment in the Dreyfus Cash Management Institutional Fund, a regulated investment company money market mutual fund, is valued at \$1.00 per share. This is a reasonable estimate of the fair value and is the basis for current transactions. Futures and option contracts are valued at the last settlement price established each day by the exchange on which they are traded. Interest rate

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

and total return swap values are based on market values received from third parties or are determined by valuation models. Foreign currency forward contracts are valued at the difference between the month-end spot exchange rate and the forward contract amount. Investments in other funds are valued at the net asset value as provided by fund's management. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

Foreign Currency – Amounts denominated in or expected to settle in foreign currencies are translated into U.S. dollars at exchange rates reported by the Bank of New York Mellon on the following basis:

- a. Market value of investment securities, other assets and liabilities at the closing rate of exchange at the valuation date.
- b. Purchases and sales of investment securities, income and expenses at the rate of exchange prevailing on the respective dates of such transactions.

The IMB isolates that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from market prices of securities held.

Reported net realized foreign exchange gains and losses arise from sales of portfolio securities, sales and maturities of shortterm securities, sales of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities including investments in securities at month end, resulting from changes in the exchange rate.

Option Contracts - The IMB may purchase or write equity, bond, currency, or index option contracts that have recognized liquidity and are actively traded on major exchanges or are executed with major dealers. These option contracts give the purchaser (seller) of the contract the right to buy (call) or sell (put) the security, or settle cash for an index option, underlying the contract at an agreed upon price (strike price) during or at the conclusion of a specified period of time.

Premiums paid upon the purchase of an option contract are recorded as an asset and subsequently adjusted to market value. Upon exercising a purchased option, a gain is recorded equal to the difference between the market value of the underlying instrument and the strike price of the option, minus premiums paid. If the option expires unexercised, a loss is recognized in the amount of the premiums paid for the option.

Premiums received when option contracts are written are recorded as a liability and subsequently adjusted to market value. If a written option contract expires unexercised, a gain is recorded equal to the amount of the premiums received. The difference between the premiums received and the amount paid to effect a closing transaction is also recorded as a gain or loss. When a written option is exercised, a loss is recorded equal to the difference between the market value of the underlying instrument and the strike price of the option, minus premiums received.

Written option contracts are used to enhance investment returns and reduce portfolio convexity when implied volatility is high. Purchased option contracts are used to increase portfolio convexity when implied volatility is low, to implement certain yield curve strategies, or to hedge sector exposure.

When writing put options, there is risk that a loss may be incurred if the market price of the underlying instrument decreases and the option is exercised. This loss is determined by market conditions and cannot be specifically limited. The risk associated with writing call options is the loss of potential profit if the market price of the security increases and the option is exercised. Purchased put or call options bear the risk of loss of the premium paid if market conditions are not favorable to exercise the option. There may also be risk that the value of the option contract does not correlate perfectly with movements of the underlying instrument due to certain market distortions.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

The IMB limits its exposure to credit risk by only buying or selling options traded on major exchanges, or executed with major dealers. There is a risk of the inability to enter into a closing transaction if a liquid secondary market does not exist. The IMB maintains sufficient levels of cash or cash equivalents to meet cash flow obligations.

Security Loans - The IMB, through its agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by initial collateral of at least 102 percent of the market value of the securities loaned. For international securities, the collateral is at least 105 percent of the market value of the securities on loan. Cash collateral received is invested in the Mellon GSL Reinvestment Trust and is reported on the Statement of Assets and Liabilities. Securities loaned remain on the Statement of Assets and Liabilities and Schedule of Investments in Securities. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as securities lending income. The agent fees and broker rebates are reported as expenses, and unrealized gains or losses resulting from changes in the value of the investment of cash collateral are reported as part of the net increase or decrease in the fair value of investments. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations.

Futures Contracts - A futures contract is an agreement between a buyer or a seller and the clearinghouse of a futures exchange in which the parties agree to buy or sell a commodity, financial instrument or index at a specified future date and price. Upon entering into a financial futures contract, the IMB is required to pledge to the broker an amount of cash, U.S. government securities, or other assets, equal to a certain percentage of the contract amount (initial margin deposit). Cash (variation margin) is received from or paid to the broker for the fluctuations of the underlying securities or index. The IMB records futures at fair market value. Gains or losses on open futures positions are unrealized. These gains or losses become realized when the position is closed.

Interest rate futures may be used to enhance portfolio yields or as an alternative investment of cash.

The market risk associated with holding interest rate and stock index futures results from changes in the market value of the contractual positions due to changes in the value of the underlying instruments or indices. Investment risk associated with these futures contracts arises because the value of the futures contracts may not correlate perfectly with changes in the values of the underlying instruments or indices due to market distortions.

Other risks associated with futures contracts are liquidity risk and credit risk. Liquidity risk arises when there is insufficient trading in a particular futures contract. Credit risk arises from the potential inability of counterparties to meet the terms of the contracts. The IMB's managers generally only utilize futures contracts that are traded on major exchanges or are executed with major dealers. The major exchanges assume the risk of a counterparty default and generally require an initial margin deposit of cash or securities.

Foreign Exchange Forward Contracts - A foreign exchange forward contract is an agreement between two parties to exchange different currencies at a specified exchange rate at an agreed upon future date. Western enters into such contracts to take advantage of the relative changes in currency exchange rates. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. These contracts are valued at the prevailing market exchange rates at month end. An unrealized gain or loss is recorded as the difference between the amount valued at month end and the amount to be received or paid at the expiration date. The unrealized gain or loss is reclassified to realized gain or loss when the contract expires.

Interest Rate Swaps – Interest rate swaps represent agreements between counterparties to exchange cash flows based on the difference between two interest rates, applied to a notional principal amount for a specified period. Interest rate swaps do not involve the exchange of principal between the parties. Interest is paid or received periodically. Fair values are based on market values received from third parties or are determined by valuation models.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Total Return Swaps – Total return swaps represent agreements in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually an equity index, loans, or bonds. This is owned by the party receiving the set rate payment.

Asset-Backed Securities – The Pool invests in various asset-backed securities, mortgage-backed securities, and structured corporate debt. The securities are reported at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. The Pool invests in these securities to enhance yields on investments. Changes in market interest rates affect the cash flows of these securities and may result in changes in fair value. The overall return or yield on these securities depends on the changes in the interest and principal payment pattern and market value of the underlying assets.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Amortization - Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security. The amortization of asset-backed securities considers the effect of prepayments on the life of the security. Historical prepayment speeds are obtained from market data vendors and are updated annually. The effect of changing prepayment assumptions is reported in the Statement of Operations in the year of the change.

Distributions to Participants - The monthly net investment income of the Pool is declared as a dividend on the last day of the month and distributed to the participants of the Pool on the first day of the following month. Distributions are paid in the form of reinvestments in the Pool and have been included in distributions to participants and reinvestment of distributions as presented on the Statement of Changes in Net Assets.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The IMB limits the exposure to credit risk in the Pool by maintaining at least an average rating of investment grade as defined by the Nationally Recognized Statistical Rating Organizations. The following table provides the weighted average credit ratings of the rated assets in the Pool as of June 30, 2010.

(Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

					Percent of
Security Type	Moody's	S&P	F	air Value	Assets
Corporate bonds and notes	Baa	BBB	\$	572,512	31.8%
Money market funds	Aaa	AAA		268,245	14.9%
Agency mortgage backed securities	Aaa	AAA		200,978	11.2%
U. S. Treasury bonds and notes	Aaa	AAA		165,854	9.2%
Corporate collateralized mortgage obligations	Ba	BB		65,134	3.6%
U. S. Treasury inflation protection bonds	Aaa	AAA		30,997	1.7%
Municipal bonds	Aa	А		26,929	1.5%
Corporate asset backed securities	Aaa	AAA		13,213	0.7%
Agency collateralized mortgage obligations	Aaa	AAA		7,258	0.4%
Agency notes	Aa	А		4,004	0.2%
Corporate preferred securities	NR	NR		891	0.0%
Total rated investments			\$	1,356,015	75.2%

Unrated securities include commingled investment pools valued at \$441,720 and option contract purchased valued at \$1,349. These unrated securities represent 24.8 percent of the fair value of the pool's investments.

Concentration of Credit Risk

West Virginia statutes prohibit the Pool from investing more than 5 percent of its assets in securities issued by a single private corporation or association. At June 30, 2010, the Pool did not have investments in any one private corporation or association that represented more than 5 percent of assets.

Custodial Credit Risk

At June 30, 2010, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized at 102 percent and the collateral is held in the name of the IMB. Investments in commingled funds are held in an account in the name of the IMB. All remaining securities are held by the IMB's custodian in the name of the IMB. Securities lending collateral that is reported in the Statement of Assets and Liabilities is invested in the lending agent's money market fund.

Interest Rate Risk

The IMB monitors interest rate risk of the Pool by evaluating the modified duration of the investments in the Pool. The following table provides the weighted average modified duration for the various asset types in the Pool as of June 30, 2010.

			Modified
Security Type	_	Fair Value	Duration (years)
Corporate bonds and notes	\$	572,512	6.3
Commingled investment pools		441,720	0.5
Money market fund		268,245	0.0
Agency mortgage backed securities		200,978	3.8
U. S. Treasury bonds and notes		165,854	3.9
Corporate collateralized mortgage obligations		65,134	4.8
U. S. Treasury inflation protection bonds		30,997	13.1
Municipal bonds		26,929	17.7
Corporate asset backed securities		13,213	17.5
Agency collateralized mortgage obligations		7,258	5.2
Agency notes		4,004	2.0
Total assets	\$	1,796,844	4.1

(Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

The Pool invests in commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. The cash flows from these securities are based on the payment of the underlying collateral. The modified duration and yield to maturity of these securities are dependent on estimated prepayment assumptions that consider historical experience, market conditions and other criteria. Actual prepayments may vary with changes in interest rates. Rising interest rates often result in a slower rate of prepayments while declining rates tend to lead to faster prepayments. As a result, the fair values of these securities are highly sensitive to interest rate changes. At June 30, 2010, the Pool held \$286,583 of these securities. This represents approximately 16 percent of the value of the Pool's securities.

Foreign Currency Risk

None of the notes, bonds, asset backed securities, mortgage backed securities, collateralized mortgage obligations or money market fund held by the Pool are exposed to foreign currency risk. However, the Pool does have foreign exchange forward contracts. Refer to Note 11 for details on these contracts. Additionally, the Pool has indirect exposure to foreign currency risk through its ownership interests in certain of the commingled investment pools. Approximately \$111,363, or 25 percent, of the commingled investment pools hold substantially all of their investments in foreign currencies. West Virginia statute limits the amount of international securities to no more than 30 percent of the total assets managed by the IMB. At June 30, 2010 the IMB was in compliance with this limitation.

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years

(Amounts in thousands, except share data)

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS (continued)

beginning after December 15, 2010. This ASU was implemented for fiscal year ended June 30, 2010, and did not have a material impact on the Pool's financial statements.

NOTE 5. DERIVATIVE FINANCIAL INSTRUMENTS

Derivative financial instruments held in the Pool include foreign exchange contracts, futures, options, interest rate swaps, and total return swaps. None of these derivative financial instruments are designated as hedging instruments under ASC 815; they are used to implement portfolio strategy, capture valuation opportunities, and to exploit market inefficiencies. The primary risks managed by using these derivative financial instruments include interest rate, foreign exchange rate, and market price risks. See Note 2 for additional information on the Pool's purpose for entering into derivatives not designated as hedging instruments and for discussion on the risks associated with investing in these derivatives.

The table below presents the fair value of the derivative financial instruments not designated as hedging instruments recorded in the Statement of Assets and Liabilities as of June 30, 2010:

	Asset Der	ivatives		Liability Derivatives					
Derivatives not designated	Statement of			Statement of					
as hedging instruments under ASC 815	Assets and Liabilities Location	Fai	ir Value	Assets and Liabilities Location	Fa	air Value			
Fixed Income / Interest rate contracts	Investment securities at fair value	\$	1,349	Option contracts written	\$	(6,707)			
Fixed Income / Interest rate contracts	Unrealized gain on swap contracts		3,846	Unrealized loss on swap contracts		(8,488)			
Fixed Income / Interest rate contracts	Unrealized gain on futures contracts		1,794	Unrealized loss on futures contracts		(6,125)			
Foreign exchange contracts	Unrealized gain on foreign currency exchange contracts		3,791	Unrealized loss on foreign currency contracts		(2,773)			
Total		\$	10,780		\$	(24,093)			

The table below presents the impact of the derivative financial instruments not designated as hedging instruments recorded in the Statement of Operations for the year ended June 30, 2010:

Derivatives not designated as hedging instruments under ASC 815	Statement of Operations Location	Realized Gain (Loss)				
Fixed income / Interest rate contracts	Net realized gain from investments	\$	(13,539)			
Foreign exchange contracts	Net realized gain from foreign currency transactions		1,131			
Total		\$	(12,408)			

(Amounts in thousands, except share data)

NOTE 6. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.
- Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2010:

	Lev	vel 1	Level 2	Le	evel 3	Total		
Agency Collateralized Mortgage								
Obligations	\$	-	\$ 7,258	\$	-	\$	7,258

(Amounts in thousands, except share data)

NOTE 7. SECURITIES LENDING

At June 30, 2010, the fair value of securities on loan was \$68,850, initial collateral received was \$70,260, and the fair value of collateral held was \$68,448. Of the collateral held, \$68,824 was received as cash and was invested in the Mellon GSL DBT II Collateral Fund (Collateral Fund), the Mellon SL DBT II Liquidating Fund (Liquidating Fund), and the Mellon GSL DBT II Liquidating Trust (Liquidating Trust) with a fair value of \$67,040.

In early November 2008, the IMB was notified that certain securities issued by Sigma Finance, Inc. (Sigma) were transferred from the Collateral Fund on October 1, 2008, to the Liquidating Trust. Units of the Liquidating Trust were transferred to the IMB's securities lending cash collateral account. For all of the IMB investment pools that participate in the securities lending program, the value of the units in the Liquidating Trust on an amortized cost basis was \$10,974 as calculated by the IMB's proportionate interest in the Collateral Fund as of the close of business on September 30, 2008. Sigma was subsequently placed into receivership and the IMB is exposed to a potential loss of the full value of the Sigma investment. In October, the IMB recorded a reserve for these potential losses in each investment pool in proportion to its participation in the securities lending program at September 30, 2008. The reserve recorded for the Pool was \$1,703.

Effective April 20, 2009, the assets of the Collateral Fund with maturities greater than one day were transferred to the Liquidating Fund. As securities mature in the Liquidating Fund, the proceeds are transferred to the Collateral Fund. The combined value of the holdings in the Collateral Fund and the Liquidating Fund was used to determine the fair value of reinvested collateral.

Additionally, the distribution of securities lending income has been restricted beginning October 1, 2008. The accumulated undistributed securities lending income will be distributed once the actual loss on Sigma is realized. The accumulated undistributed securities lending income for June 30, 2010 was \$526.

NOTE 8. FUTURES CONTRACTS

Value at Entering Gain (Loss) Expiration Open Contracts Position June 30, 2010 Contract Since Inception				TT 1	Value Upon	Cumulative Net
	Expiration	Open Contracts	Position	Value at June 30, 2010	Entering Contract	Gain (Loss) Since Inception

At June 30, 2010, open positions in futures contracts denominated in U.S. dollars were as follows:

Expiration		Open Contracts	Open Contracts Position			 Contract	Since Inception		
Sep 2010	14	Euro 90 Day Future	Long	\$	3,477	\$ 3,463	\$	14	
Sep 2010	534	US Ultra Bond Future	Long		72,523	70,759		1,764

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations and changes in net assets for the year then ended for the West Virginia Investment Management Board (WVIMB) Core Fixed Income Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in note 1, these financial statements were prepared on a basis of accounting following U.S. generally accepted accounting principles established by the AICPA applicable to investment companies which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board Core Fixed Income Pool as of June 30, 2010, and the results of its operations and changes in net assets for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Core Fixed Income Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The main objective of this Pool is to generate investment income, provide stability and diversification, but not at the expense of total return. JP Morgan Investment Advisors, Inc. and State Street Global Advisors manage this Pool. This Pool's investment performance, net of external investment management fees, is expected to meet or exceed the Barclays Capital US Aggregate index.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments in debt securities are carried at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. Investments in other funds are valued at the reported net asset values of the individual funds, provided by the fund's management, as a practical expedient for measuring fair value. The investment in the Dreyfus Cash Management Institutional Fund, a regulated investment company money market mutual fund, is valued at \$1.00 per share. This is a reasonable estimate of the fair value and is the basis for current transactions. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Asset-Backed Securities – The Pool invests in various asset-backed securities, mortgage-backed securities, and structured corporate debt. The securities are reported at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. The Pool invests in these securities to enhance yields on investments. Changes in market interest rates affect the cash flows of these securities and may result in changes in fair value. The overall return or yield on these securities depends on the changes in the interest and principal payment pattern and market value of the underlying assets.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Amortization - Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security. The amortization of asset-backed securities considers the effect of prepayments on the life of the security. Historical prepayment speeds are obtained from market data vendors and are updated annually. The effect of changing prepayment assumptions is reported in the Statement of Operations in the year of the change.

Distributions to Participants - The monthly net investment income is declared as a dividend on the last day of the month and distributed to the participants of the Pool on the first day of the following month. Distributions are paid in the form of reinvestments in the Pool and have been included in distributions to participants and reinvestment of distributions as presented on the Statement of Changes in Net Assets.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The IMB limits the exposure to credit risk in the Pool by maintaining at least an average rating of investment grade as defined by the Nationally Recognized Statistical Rating Organizations. The following table provides the weighted average credit ratings of the rated assets in the Pool as of June 30, 2010.

(Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

					Percent of
Security Type	Moody's	S&P	1	Fair Value	Assets
U. S. Treasury bonds and notes	Aaa	AAA	\$	334,152	21.4%
Agency collateralized mortgage obligations	Aaa	AAA		245,849	15.7%
Corporate bonds and notes	А	А		153,804	9.9%
Agency mortgage backed securities	Aaa	AAA		138,487	8.9%
Corporate collateralized mortgage obligations	Aa	AAA		122,349	7.9%
Money market funds	Aaa	AAA		53,413	3.4%
Corporate asset backed securities	Aaa	AAA		10,679	.7%
Agency notes	Aaa	AAA		13,494	.9%
Municipal bonds	Aa	А		273	0.0%
Total rated investments			\$	1,072,500	68.8%

Unrated securities include a commingled investment pool valued at \$488,243. This unrated security represents 31.2 percent of the fair value of the pool's investments.

Concentration of Credit Risk

West Virginia statutes prohibit the Pool from investing more than 5 percent of its assets in securities issued by a single private corporation or association. At June 30, 2010, the Pool did not have investments in any one private corporation or association that represented more than 5 percent of assets.

Custodial Credit Risk

At June 30, 2010, the Pool held no securities that were subject to custodial credit risk. All securities are held by the IMB's custodian in the name of the IMB. The investment in a commingled investment pool is held in an account in the name of the IMB.

Interest Rate Risk

The IMB monitors interest rate risk of the Pool by evaluating the modified duration of the investments in the Pool. The following table provides the weighted average modified duration for the various asset types in the Pool as of June 30, 2010.

		Modified Duration
Security Type	 Fair Value	(years)
Commingled investment pools	\$ 488,243	4.3
U. S. Treasury bonds and notes	334,152	5.8
Agency collateralized mortgage obligations	245,849	3.7
Corporate bonds and notes	153,804	5.9
Agency mortgage backed securities	138,487	3.0
Corporate collateralized mortgage obligations	122,349	3.4
Money market funds	53,413	0.0
Corporate asset backed securities	10,679	1.7
Agency notes	13,494	6.0
Municipal bonds	273	12.0
Total assets	\$ 1,560,743	4.4

The Pool invests in commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. The cash flows from these securities are based on the payment of the underlying collateral. The modified duration and yield to maturity of these securities are dependent on estimated prepayment assumptions that consider historical experience, market conditions and other criteria. Actual prepayments may vary with changes in interest rates. Rising interest rates often result in a slower rate of prepayments while declining rates tend to lead to

(Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

faster prepayments. As a result, the fair values of these securities are highly sensitive to interest rate changes. At June 30, 2010, the Pool held \$517,363 of these securities. This represents approximately 33 percent of the value of the Pool's securities.

Foreign Currency Risk

None of the securities held by the Pool are exposed to foreign currency risk.

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years beginning after December 15, 2010. This ASU was implemented for fiscal year ended June 30, 2010, and did not have a material impact on the Pool's financial statements.

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

(Amounts in thousands, except share data)

NOTE 5. FAIR VALUE MEASUREMENTS (continued)

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.
- Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2010:

	Leve	Level 1		Level 2		vel 3	Total
U.S. Treasury bonds and notes	\$	-	\$	334,152	\$	-	\$ 334,152
Agency collateralized mortgage							
obligations		-		245,849		-	245,849
Corporate bonds and notes		-		153,804		-	153,804
Agency mortgage backed securities		-		138,487		-	138,487
Corporate collateralized mortgage							
obligations		-		122,349		-	122,349
Money market funds		-		53,413		-	53,413
Corporate asset backed securities		-		10,679		-	10,679
Agency notes		-		13,494		-	13,494
Commingled funds		-		488,243		-	488,243
Municipal bonds		-		273		-	273
Total	\$	-	\$	1,560,743	\$	-	\$ 1,560,743

(Amounts in thousands, except share data)

NOTE 6. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance:	
Net asset value at June 30, 2009	\$ 10.05
Income from investment operations:	
Net investment income	0.27
Net realized and unrealized gain on investment transactions	 0.72
Total from investment operations	0.99
Less distributions from net investment income	 (0.27)
Net asset value at June 30, 2010	\$ 10.77

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations, changes in net assets and cash flows for the year then ended for the West Virginia Investment Management Board (WVIMB) TRS Annuity Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in note 1, these financial statements were prepared on a basis of accounting following U.S. generally accepted accounting principles established by the AICPA applicable to investment companies which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board TRS Annuity Pool as of June 30, 2010, and the results of its operations, changes in net assets and cash flows for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the TRS Annuity Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool holds an investment contract strictly for the benefit of the Teachers Retirement System (TRS). The IMB assumed responsibility for this investment as part of the restructuring of the Teachers Defined Contribution (TDC) plan, a separate retirement plan outside of the IMB, whereby certain TDC participants elected to transfer the ownership of their individual TDC retirement accounts to the TRS in exchange for current participation in the TRS defined benefit plan. The contract, issued by the Variable Annuity Life Insurance Company (VALIC), could not be liquidated as part of the restructuring, and was transferred in kind to the IMB on December 10, 2008. The final amount transferred on the contract was \$248,293. Effective April 23, 2009, the IMB elected to liquidate this contract and will receive five equal annual payments of \$55,058. Payments were received on May 4, 2009 and May 4, 2010. Remaining payments will be received on May 4, 2011, 2012, and 2013. The contract and the payments include a guaranteed annual interest yield of 4.5%. VALIC is a wholly-owned subsidiary of American International Group, Inc. (AIG), but is not in bankruptcy.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. The VALIC contract is a private contract between the issuer and the IMB and is not a marketable security. It is carried at fair value using a discounted cash flow model based on the underlying cash flows of the contract, implicit rate of return, and estimated credit risk premiums using observable market data. At June 30, 2010 amortized cost approximated fair value.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method.

Distributions to Participants - The Pool does not routinely distribute dividends or net capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The contract issued by the VALIC is not rated by any of the nationally recognized statistical rating agencies. VALIC has received "A" ratings from Moody's, Fitch, and Standard & Poor's.

Concentration of Credit Risk

The contract issued by the VALIC is the only security held by the Pool. Consequently, the Pool is subject to concentration of credit risk.

Custodial Credit Risk

The Pool is not subject to custodial credit risk.

Interest Rate Risk

The investment contract has a guaranteed annual interest yield of 4.5%. The IMB has elected to withdraw funds in equal installments over five years. Under the terms of the election agreement the interest rate became fixed. The Pool is subject to the risk that it could potentially earn a lower than market interest rate in the event market rates increase above the 4.5% contractual rate.

Foreign Currency Risk

The Pool is not subject to foreign currency risk.

(Amounts in thousands, except share data)

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification (Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years beginning after December 15, 2010. This ASU was implemented for fiscal year ended June 30, 2010, and did not have a material impact on the Pool's financial statements.

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

(Amounts in thousands, except share data)

NOTE 5. FAIR VALUE MEASUREMENTS (continued)

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2010:

	Level 1		Level	2	Ι	Level 3	 Total
Annuity Contract	\$	-	\$	-	\$	152,429	\$ 152,429

The reconciliation of the beginning and ending balances of Level 3 investments for the year ended June 30, 2010 was as follows:

	Annuity Contract	
Balance at June 30, 2009	\$	198,915
Net realized gain/(loss)		-
Net change in unrealized appreciation/(depreciation)		-
Purchases		8,572
Sales		(55,058)
Net transfers in/(out) of Level 3		
Balance at June 30, 2010	\$	152,429

NOTE 6. FINANCIAL HIGHLIGHTS

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations, changes in net assets and cash flows for the year then ended for the West Virginia Investment Management Board (WVIMB) Private Equity Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in note 1, these financial statements were prepared on a basis of accounting following U.S. generally accepted accounting principles established by the AICPA applicable to investment companies which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board Private Equity Pool as of June 30, 2010, and the results of its operations, changes in net assets and cash flows for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Private Equity Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool was established to hold the IMB's investments in various types of private equity funds. Franklin Park Associates, LLC has been retained by the IMB to provide consulting services for this asset class.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments, which are not publicly traded, are carried at net asset value as a practical expedient for fair market value. The Pool has \$884,724 of investments in private partnerships and other investment funds which are reported at fair value. For all of these investments, the IMB has concluded that the net asset value reported by the underlying fund approximates the fair value of the investment. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds and, consequently, the fair value of the interests in the funds. Although a secondary market exists for these investments, it is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

reported net asset value. It is therefore reasonably possible that if the IMB were to sell these investments in the secondary market a buyer may require a discount to the reported net asset value, and the discount could be significant. The IMB believes that the carrying amount of such investments is a reasonable estimate of fair value as of June 30, 2010. The investment in the Dreyfus Cash Management Institutional Fund, a regulated investment company money market mutual fund, is valued at \$1.00 per share. This is a reasonable estimate of the fair value and is the basis for current transactions.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investments in other funds are recognized at the time of sale by the average cost method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends or net capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

The Pool holds limited partnerships, shares of an institutional commingled fund and a money market fund with the highest credit rating. The institutional commingled fund is not rated by any of the nationally recognized statistical rating agencies and thus any credit risk cannot be accurately reported. The securities of the Pool are not exposed to credit risk, interest rate risk, or custodial credit risk. There is an indirect exposure to foreign currency risk through certain of the partnerships and the commingled fund. At June 30, 2010 these investments had holdings in foreign currencies of approximately \$319,086 or approximately 35 percent of the total value of the Pool's investments. At June 30, 2010, the Pool, in accordance with West Virginia statutes, did not hold securities of any one issuer in excess of 5 percent of the value of the Pool and is not exposed to concentration of credit risk.

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

(Amounts in thousands, except share data)

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS (continued)

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years beginning after December 15, 2010. This ASU was implemented as of June 30, 2010, and did not have a material impact on the Pool's financial statements.

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.
- Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

(Amounts in thousands, except share data)

NOTE 5. FAIR VALUE MEASUREMENTS (continued)

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2010:

	Lev	Level 1		Level 2		Level 2		Level 3	 Total
Regulated Investment Companies	\$	-	\$	27,729	\$	-	\$ 27,729		
Investments in Other Funds		-		-		755,609	755,609		
Partnerships		-	_	-		129,115	 129,115		
Total	\$	-	\$	27,729	\$	884,724	\$ 912,453		

The reconciliation of the beginning and ending balances of Level 3 investments for the year ended June 30, 2010 was as follows:

	Inv	estment in			
	Ot	her Funds	Partnerships		
Balance at June 30, 2009	\$	\$ 504,143		62,982	
Net realized gain/(loss)		(80,005)		2,711	
Net change in unrealized appreciation		201,472		9,423	
Purchases		819,394		68,724	
Sales		(689,395)		(14,725)	
Net transfers in/(out) of Level 3		-		-	
Balance at June 30, 2010	\$	755,609	\$	129,115	

NOTE 6. COMMITMENTS

The IMB, with the assistance of its consultant, began implementing its plan to invest in private equity partnerships in February 2008. As of June 30, 2010 the IMB had made commitments to eighteen private equity general partnerships totaling \$673,000. The IMB had funded \$141,942 of these commitments at June 30, 2010, leaving unfunded commitments of \$531,058.

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations, changes in net assets and cash flows for the year then ended for the West Virginia Investment Management Board (WVIMB) Private Real Estate Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in note 1, these financial statements were prepared on a basis of accounting following U.S. generally accepted accounting principles established by the AICPA applicable to investment companies which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board Private Real Estate Pool as of June 30, 2010, and the results of its operations, changes in net assets and cash flows for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Private Real Estate Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool was established to hold the IMB's investments in private real estate funds. Courtland Partners, Ltd. has been retained by the IMB to provide consulting services for this asset class. United States Treasury Inflation-Protected Securities (TIPS) were added to the Pool in November 2009, and are managed by State Street Global Advisors. Real Estate Investment Trusts were added to the Pool in February 2010, and are managed by European Investors, Inc. and ING Clarion Real Estate Securities.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments in other funds, which are not publicly traded, are carried at net asset value as a practical expedient for fair market value. The Pool has \$20,599 of such investments in private partnerships and other investment funds which are reported at fair value. For all of these investments, the IMB has concluded that the net asset value reported by the underlying fund approximates the fair value of the investment. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds and, consequently, the fair

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

value of the interests in the funds. Although a secondary market exists for these investments, it is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the reported net asset value. It is therefore reasonably possible that if the IMB were to sell these investments in the secondary market a buyer may require a discount to the reported net asset value, and the discount could be significant. The IMB believes that the carrying amount of such investments is a reasonable estimate of fair value as of June 30, 2010. Foreign currency forward contracts are valued at either spot or forward month-end exchange rates. Investments in equity securities are carried at fair value, which is determined by a third party pricing service based on quoted market prices. Investments in debt securities are carried at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. The investment in the Dreyfus Cash Management Institutional Fund, a regulated investment company money market mutual fund, is valued at \$1.00 per share. This is a reasonable estimate of the fair value and is the basis for current transactions. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

Foreign Currency – Amounts denominated in or expected to settle in foreign currencies are translated into U.S. dollars at exchange rates reported by the Bank of New York Mellon on the following basis:

- a. Market value of investment securities, other assets and liabilities at the closing rate of exchange at the valuation date.
- b. Purchases and sales of investment securities, income and expenses at the rate of exchange prevailing on the respective dates of such transactions.

The IMB isolates that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from market prices of securities held.

Reported net realized foreign exchange gains and losses arise from sales of portfolio securities, sales and maturities of shortterm securities, sales of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities including investments in securities at month end, resulting from changes in the exchange rate.

Foreign Exchange Forward Contracts - A foreign exchange forward contract is an agreement between two parties to exchange different currencies at a specified exchange rate at an agreed upon future date. The managers enter into such contracts to hedge the assets and liabilities related to securities denominated in a foreign currency. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. These contracts have relatively short durations and are valued at the prevailing market exchange rates at month end. An unrealized gain or loss is recorded as the difference between the amount valued at month end and the amount to be received or paid at the expiration date. The unrealized gain or loss is reclassified to realized gain or loss when the contract expires.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investments in other funds are recognized at the time of sale by the average cost method.

Interest Income – Interest income is recognized as earned on the accrual method.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends or net capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The IMB limits the exposure to credit risk in the Pool by maintaining at least an average rating of investment grade as defined by the Nationally Recognized Statistical Rating Organizations. The following table provides the weighted average credit ratings of the rated assets in the Pool as of June 30, 2010.

					Percent of
Security Type	Moody's	S&P	Fa	air Value	Assets
U.S. Treasury Inflation Protection Securities	Aaa	AAA	\$	445,007	90.5%
Money market funds	Aaa	AAA		17,088	3.5%
Total rated investments			\$	462,095	94.0%

Unrated securities include real estate investment trusts valued at \$9,233, investments in limited partnerships valued at \$19,637, and an investment in an institutional commingled fund valued at \$962. These unrated securities represent 6.0 percent of the fair value of the pool's investments.

Concentration of Credit Risk

West Virginia statutes prohibit the Pool from investing more than 5 percent of its assets in securities issued by a single private corporation or association. At June 30, 2010, the Pool did not have investments in any one private corporation or association that represented more than 5 percent of assets.

Custodial Credit Risk

At June 30, 2010, the Pool held no securities that were subject to custodial credit risk. All securities are held by the IMB's custodian in the name of the IMB. The investment in the institutional commingled fund is held in an account in the name of the IMB.

Interest Rate Risk

The IMB monitors interest rate risk of the Pool by evaluating the modified duration of the investments in the Pool. The following table provides the weighted average modified duration for the various asset types in the Pool as of June 30, 2010.

Security Type	Fa	air Value	Modified Duration (years)
U.S. Treasury Inflation Protection Securities	\$	445,007	7.7
Money market fund		17,088	0.0
Total assets	\$	462,095	7.4

(Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

Foreign Currency Risk

The Pool has real estate investment trusts, shares of an institutional commingled fund, and cash that are denominated in foreign currencies and are exposed to foreign currency risks. West Virginia statute limits the amount of international securities to no more than 30 percent of the total assets managed by the IMB. At June 30, 2010 the IMB was in compliance with this limitation. The amounts at fair value (in U.S. dollars) of the securities and cash denominated in foreign currencies as of June 30, 2010 are as follows:

Currency	Investments		Cash		 Total
Australian Dollar	\$	728	\$	-	\$ 728
British Pound		656		-	656
Canadian Dollar		259		-	259
Euro		1,464		5	1,469
Hong Kong Dollar		1,442		-	1,442
Japanese Yen		899		-	899
Norwegian Krone		32		-	32
Singapore Dollar		410		-	410
Swedish Krona		86		-	86
Swiss Franc		21		-	21
Total	\$	5,997	\$	5	\$ 6,002

This table excludes cash and securities held by the Pool that are denominated in U.S. dollars. The market value of the U.S. dollar denominated cash and securities is \$485,930.

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

(Amounts in thousands, except share data)

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS (continued)

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years beginning after December 15, 2010. This ASU was implemented for fiscal year ended June 30, 2010, and did not have a material impact on the Pool's financial statements.

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.
- Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2010:

	L	Level 1 Level 2]	Level 3	Total		
Real Estate Investment Trusts	\$	9,233	\$	-	\$	-	\$	9,233
Regulated Investment Companies		-		17,088	-			17,088
U.S. Treasury Issues		-		445,007	-			445,007
Investments in Other Funds					20,599			20,599
Total	\$	9,233	\$	462,095	\$	20,599	\$	491,927

(Amounts in thousands, except share data)

NOTE 5. FAIR VALUE MEASUREMENTS (continued)

The reconciliation of the beginning and ending balances of Level 3 investments for the year ended June 30, 2010 was as follows:

	Investment in Other Funds		
Balance at June 30, 2009	\$	16,302	
Net realized gain/(loss)		-	
Net change in unrealized depreciation		(484)	
Purchases		4,781	
Sales		-	
Net transfers in/(out) of Level 3		-	
Balance at June 30, 2010	\$	20,599	

NOTE 6. COMMITMENTS

The IMB, with the assistance of its consultant, began implementing its plan to invest in private real estate in February 2008. The IMB committed \$160,000 to five real estate investment funds/partnerships. The IMB had funded \$29,838 of these commitments at June 30, 2010, leaving unfunded commitments of \$130,162.

NOTE 7. FOREIGN CURRENCY FORWARD CONTRACTS

At June 30, 2010, open foreign currency forward contracts are as follows:

				Recei	vable	Pay	able	Unrealized
	Foreign	Inception	Expiration	(in foreign	(in U. S.	(in foreign	(in U. S.	appreciation
Position	Currency	Date	Date	currency)	dollars)	currency)	dollars)	(depreciation)
Long	Singapore Dollar	6/29/2010	7/2/2010	2	1		1	-
Long	Canadian Dollar	6/29/2010	7/6/2010	4	4		4	-
Long	Canadian Dollar	6/29/2010	7/6/2010	12	11		11	-
				-	\$ 16		\$ 16	\$-

The contracts listed above were initiated to correspond to transactions in securities trading in foreign currencies. The fair value, gains and losses, and risks are not material the Pool.

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of assets and liabilities, including the schedule of investments in securities, as of June 30, 2010, and the related statements of operations, changes in net assets and cash flows for the year then ended for the West Virginia Investment Management Board (WVIMB) Hedge Fund Pool. These financial statements are the responsibility of WVIMB management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of WVIMB's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As described in note 1, these financial statements were prepared on a basis of accounting following U.S. generally accepted accounting principles established by the AICPA applicable to investment companies which is a comprehensive basis of accounting other than U.S. generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board Hedge Fund Pool as of June 30, 2010, and the results of its operations, changes in net assets and cash flows for the year then ended on the comprehensive basis of accounting described in the preceding paragraph and in note 1.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Hedge Fund Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool was established to hold the IMB's investments in hedge funds. Albourne America, LLC has been retained by the IMB to provide consulting services for this asset class.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments in other funds, which are not publicly traded, are carried at net asset value as a practical expedient for fair market value. The Pool has \$1,112,790 of investments in such alternative investment funds which are reported at fair value. For all of these investments, the IMB has concluded that the net asset value reported by the underlying fund approximates the fair value of the investment. These investments are redeemable with the fund at net asset value under the original terms of the agreements and operations of the underlying fund. However, it is possible that these redemption rights may be restricted or eliminated by the funds in the future in accordance with the underlying fund agreements. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds and, consequently, the fair value of the interests in the funds. Although a secondary market exists for these

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

investments, it is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the reported net asset value. It is therefore reasonably possible that if the redemption rights in the funds were restricted or eliminated and the IMB were to sell these investments in the secondary market a buyer may require a discount to the reported net asset value, and the discount could be significant. The IMB believes that the carrying amount of such investments is a reasonable estimate of fair value as of June 30, 2010. The investment in the Dreyfus Cash Management Institutional Fund, a regulated investment company money market mutual fund, is valued at \$1.00 per share. This is a reasonable estimate of the fair value and is the basis for current transactions.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investments in other funds are recognized at the time of sale by the average cost method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends or net capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. INVESTMENT RISK DISCLOSURES

The Pool holds shares in various commingled institutional funds and shares of a money market fund with the highest credit rating. The commingled institutional funds are not rated by any of the nationally recognized statistical rating agencies and thus any credit risk cannot be accurately reported. The Pool is not exposed to interest rate risk, custodial credit risk, or concentration of credit risk. The Pool is indirectly exposed to foreign currency risk as certain of the funds have investments denominated in foreign currencies. At June 30, 2010, approximately \$393,329 or 35 percent, of the market value of the funds were held in foreign currencies.

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2009, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 168 (Accountings Standards Codification (ASC) 105-10), *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, (ASC 105-10). ASC 105-10 replaces SFAS 162 and establishes the FASB Accounting Standards Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. While not intended to change GAAP, the Codification significantly changes the way in which the accounting literature is organized. The Codification became the exclusive authoritative reference on September 30, 2009.

(Amounts in thousands, except share data)

NOTE 4. RECENT ACCOUNTING PRONOUNCEMENTS (continued)

In June 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No.109*, (ASC 740-10). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation was implemented as of July 1, 2009 and did not have an impact on the Pool's financial statements.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities (an amendment to FASB Statement No. 133)*, (ASC 815-10). ASC 815-10 requires companies with derivative instruments to disclose information that should enable financial statement users to understand how and why a company uses derivative instruments, how derivative instruments and related hedged items are accounted for under ASC 815-10 and related interpretations, and how derivative instruments and related hedged items affect a company's financial position, financial performance and cash flows. The required disclosures include the fair value of derivative instruments and their gains and losses in tabular format, information about credit-risk-related contingent features in derivative agreements, counterparty credit risk and a company's strategies and objectives for using derivative financial instruments. ASC 815-10 also requires entities to disclose information that would enable users of its financial statements to understand the volume of its derivative activity. This ASC was implemented as of July 1, 2009. The adoption of this standard did not have a material impact on the financial condition or operations of the Pool.

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-6, *Improving Disclosures about Fair Value Measurements*. This amends ASC 820 to clarify existing requirements regarding disclosures of inputs and calculation techniques and levels of disaggregation. This ASU also requires the following new disclosures; (1) significant transfers in and out of Levels 1 and 2 and the reasons that such transfers were made; and (2) additional disclosures in the reconciliation of Level 3 activity, including information on a gross basis for purchases, sales, issuances and settlements. This ASU is required in annual reporting periods beginning after December 15, 2009, except for the disclosures about Level 3 purchases, sales, issuances, and settlements in the roll forward activity for fair value measurements, which will be effective for fiscal years beginning after December 15, 2010. This ASU was implemented for fiscal year ended June 30, 2010, and did not have a material impact on the Pool's financial statements.

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.
- Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Administrative Fund

Management's Discussion and Analysis

This discussion and analysis of the West Virginia Investment Management Board's (IMB) financial performance provides an overview of the IMB's administrative financial activities for the fiscal year ended June 30, 2010. Please read it in conjunction with the IMB Administrative Fund basic financial statements, which follow this discussion. The IMB operates investment pools and issues separate audited financial statements on the investment pools.

FINANCIAL HIGHLIGHTS

- The IMB is required by law to charge a fee sufficient to cover the cost of providing investment management services. Investment service fee revenues were \$28 million as compared to \$24 million for the previous fiscal year. The change primarily results from an increase in fees charged to cover investment advisor fees. This increase can be attributed to higher assets under management. Net assets of the investment pools managed by the IMB increased by \$1.5 billion from the previous year.
- Fees paid to outside investment advisors increased by \$3.2 million over the previous year as a result of an increase in assets under management. The average expense ratio for investment advisor fees across all pools was 19.8 basis points for the year as compared to 20.2 basis points for the previous year.
- Custodian bank fees increased by \$261,000 from the previous year largely as a result of the increase in assets and the addition of public REITS held in international markets in the Private Real Estate pool.
- Fees for professional services increased by \$225,000. This increase is attributable to higher consulting fees and legal fees related to shareholder litigation actions.
- Administrative expenses increased by \$424,000, or 13.7 percent from the previous year. The expense ratio for administrative expenses was 3.3 basis points of average net assets as compared to 3.6 basis points for the previous year. Increased personnel costs accounted for the majority of the increase. Total salary expense for the fiscal year ended June 30, 2010 was \$1,839,000 as compared to \$1,641,000 for the prior fiscal year. In total, administrative fees were \$752,000 lower than the expenses included in the fiscal year budget approved by the Board of Trustees.
- Dividend income for the year decreased by \$27,000. This decrease is primarily a result of the decrease in market interest rates.

THE FINANCIAL REPORTS

This financial report consists of three financial statements: the Statement of Net Assets; the Statement of Revenues, Expenses, and Changes in Net Assets; and the Statement of Cash Flows. These statements include all assets and liabilities of the IMB Administrative Fund using the economic resources measurement focus and the accrual basis of accounting. The accrual basis of accounting takes into account all revenues and expenses regardless of when cash is received or paid. These statements give an overall perspective of the IMB Administrative Fund's financial position and the changes in the financial position during the current fiscal year.

The Statement of Net Assets presents the IMB Administrative Fund's assets and liabilities, with the difference between the two reported as net assets. The Statement of Revenues, Expenses, and Changes in Net Assets describe how the IMB Administrative Fund's net assets changed during the fiscal year. The Statement of Cash Flows identifies the sources of cash received by the IMB Administrative Fund and how that cash was used in the IMB Administrative Fund's activities during the year. The ending cash presented in this statement is a significant portion of the IMB Administrative Fund's assets as reported in the Statement of Net Assets. This statement also contains a reconciliation of the operating profit as reported in the Statement of Revenues, Expenses, and Changes in Net Assets to the cash provided by the IMB Administrative Fund's operating activities during the year.

Management's Discussion and Analysis

FINANCIAL ANALYSIS

The IMB Administrative Fund's total assets as of June 30, 2010, were \$9.8 million, and were mostly comprised of cash and cash equivalents and receivables for investment service fees. This was \$0.8 million higher than the previous year.

Total liabilities as of June 30, 2010, were \$5.5 million, consisting of invoices payable and accrued liabilities for investment management and consulting fees, custodial fees, and administrative expenses. This was \$0.8 million higher than the previous year.

The increases in assets and liabilities can be attributed to higher fees payable to investment advisors. This in turn results in higher receivables from the investment portfolios.

Table 1 Net Assets and Assets Under Management (In thousands)	2010	2009

CAPITAL ASSETS

The IMB Administrative Fund made no acquisitions of capital assets during the current fiscal year. Also, there were no disposals of capital assets.

Management's Discussion and Analysis

CONTACTING THE IMB

This financial report is designed to provide its readers with a general overview of the IMB Administrative Fund's finances. If you have any questions about this report or need additional information including the audited financial statements of the IMB Investment Pools, contact the IMB at 500 Virginia Street, East, Suite 200, Charleston, WV 25301-2164, or visit us at www.wvimb.org.

KPMG LLP BNY Mellon Center Suite 2500 500 Grant Street Pittsburgh, PA 15219-2598

Independent Auditors' Report

Board of Trustees West Virginia Investment Management Board:

We have audited the accompanying statement of net assets of the West Virginia Investment Management Board Administrative Fund (the Fund), an internal service fund of the State of West Virginia, as of June 30, 2010, and the related statements of revenues, expenses, and changes in net assets and cash flows for the year then ended. These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in note 1, the West Virginia Investment Management Board is comprised of an Administrative Fund and distinct Investment Pools. These financial statements present only the Administrative Fund of the West Virginia Investment Management Board and do not include the financial position and results of operations of the Investment Pools. Accordingly, these financial statements do not purport to, and do not, present the complete financial position of the West Virginia Investment Management Board as of June 30, 2010, or the changes in its financial position for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the West Virginia Investment Management Board Administrative Fund as of June 30, 2010, and the changes in its net assets and its cash flows for the year then ended in conformity with generally accepted accounting principles.

The information in the Management's Discussion and Analysis section on pages i through iii is not a required part of the basic financial statements but is supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted primarily of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

NOTE 1. NATURE OF ORGANIZATION

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by West Virginia Code §12-6-1 to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds. The IMB has established distinct investment pools to efficiently invest the entrusted funds. Separate financial statements are issued for these investment pools. The IMB Administrative Fund's financial statements are included as an internal service fund of the State of West Virginia in the State's financial statements.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor, and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other trustees for a term of six years.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies of the IMB Administrative Fund conform to accounting principles generally accepted in the United States of America. The following is a summary of significant accounting policies.

Cash and Cash Equivalents - Cash and cash equivalents consist of cash held in checking and money market accounts. Management believes the IMB Administrative Fund is not exposed to any significant credit or market risk on cash and cash equivalents. Cash equivalents are maintained with a financial institution in an institutional Treasury Money Market Fund which has an average maturity of less than 90 days.

Property & Equipment - Purchased equipment is recorded at cost. Donated equipment is recorded at estimated fair value at date of donation. Depreciation on purchased and donated assets is provided for over the estimated useful lives of the assets ranging from three years to five years using the straight-line method. Leasehold improvements are amortized over the life of the lease.

Revenues and Expenses - The IMB's Board of Trustees adopts an annual budget and fee schedule for services to be provided to the investment pools. Revenues of the IMB Administrative Fund are derived from the allocation of fees to the investment pools per the fee schedule. Each investment pool is charged for its direct investment- related cost and for its allocated share of other expenses. Revenues and expenses are recorded when earned or incurred in accordance with the economic resources measurement focus and the accrual basis of accounting. The carrying value of investment service fees receivable approximates its fair value.

Government Accounting Standards Board (GASB) Statement Number 20, "Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting" - The IMB Administrative Fund applies all applicable GASB pronouncements, and has elected to apply only those Financial Accounting Standards Board (FASB) Statements and Interpretations, Accounting Principles Board Opinions, and Accounting Research Bulletins issued on or before November 30, 1989 that do not conflict with or contradict GASB Pronouncements.

Use of Estimates – The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and is exempt from federal and state taxation. Accordingly, the IMB Administrative Fund financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. CAPITAL ASSETS

Capital assets activity for the fiscal year ended June 30, 2010 was as follows:

	Beginning			Ending
	Balance	Increases	<u>Decreases</u>	Balance
Capital assets, being depreciated:				
Office equipment	\$ 586,849	\$ -	\$ -	\$ 586,849
Office furniture	115,231	-	-	115,231
Leasehold improvements	45,492	-	-	45,492
Total capital assets, being depreciated	747,572	-	-	747,572
Less accumulated depreciation for:				
Office equipment	(551,117)	(12,360)	-	(563,477)
Office furniture	(115,231)	-	-	(115,231)
Leasehold improvements	(45,492)	-	-	(45,492)
Total accumulated depreciation	(711,840)	(12,360)	-	(724,200)
Capital assets, net	\$ 35,732	\$ (12,360)	\$ -	\$ 23,372

Depreciation expense of \$12,360 was charged to the investment management activity and is included in the administrative expenses.

NOTE 4. OPERATING LEASES

On August 26, 2002, the IMB entered into a long-term lease for office space for a term of five years. The lease commenced on January 1, 2003, and the monthly rent expense for years one through three was \$14,747. For years four through five, the monthly rent expense was \$15,523. On December 7, 2006, the IMB executed an amendment to renew its long-term lease for a period of five years beginning on January 1, 2008 at a monthly cost of \$15,523. Under the original and amended lease, beginning on January 1, 2004, and continuing throughout the term, the IMB shall pay as additional rent a portion of the increase in utility costs and taxes over the base year 2003 amounts. Rent expense for the period July 1, 2009 to June 30, 2010 totaled \$192,359. The IMB may extend the lease for an additional three years at the then existing fair market rental rate by giving notice to the landlord seven months previous to the expiration of the lease.

The following is a schedule of future minimum rental payments required under this lease:

Fiscal Years ending June 30:

2011-2012	\$ 186,280 per year
Thereafter	\$ 93,140

NOTE 5. EMPLOYEE BENEFIT PLAN

The IMB provides a defined contribution money purchase pension plan covering all of its employees. An employee becomes eligible to participate in the plan on the earlier of the January 1 or July 1 coinciding with or following the employee's hire date. The IMB contributes 10 percent of each covered employee's salary. Contributions for the period from July 1, 2009 to June 30, 2010 totaled \$179,726. The plan provides for a five-year vesting schedule with vesting increasing 20 percent per year.

NOTE 6. CASH AND INVESTMENT RISK

At June 30, 2010, all of the IMB Administrative Fund's cash equivalents are invested in an institutional Treasury Money Market fund. This investment fund is rated Aaa by Moody's and AAA by Standard & Poor's and has no significant custodial credit risk or interest rate risk. The investment fund invests in U.S. Treasuries and is not exposed to a concentration of credit risk or any foreign currency risk. Cash balances are held in a FDIC insured bank account, the balance of which is below the \$250,000 insurance limit at all times.
