Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board Large Cap Domestic Equity Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board Large Cap Domestic Equity Pool at June 30, 2016, and the results of its operations and changes in its net assets for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Large Cap Domestic Equity Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool's objective is to exceed, net of external investment management fees, the S&P 500 Stock Index over three- to five-year periods. Assets are managed by INTECH Investment Management, LLC (INTECH) and State Street Global Advisors (SSgA).

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 5 for further discussion and presentation of the reporting requirements under ASC 820.

Fair value of the Pool's portfolio securities is determined as follows:

- Equity securities are valued at the last sale price or official closing price reported in the market in which they are primarily traded.

Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

- Open-end regulated investment companies or other commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator.
- Futures contracts are valued at the last settlement price established each day by the exchange on which they are traded.
- Fixed income securities are valued according to prices furnished by independent pricing services to the Pool's custodian. These services determine the security prices by a number of methods including, but not limited to, dealer quotes, live market trading levels when available, live feeds of trade execution data, spreads over U.S. Treasury securities, and other models and formulae appropriate to the specific security type.
- Repurchase agreements and time deposits are valued at amortized cost, provided such amount approximates fair value.

Investments for which the fair value cannot be determined by one of the above listed processes are valued at fair value as determined in accordance with the IMB's established procedures.

Repurchase Agreements - In connection with transactions in repurchase agreements, it is the IMB's policy that its designated custodian or mutual third party take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the IMB may be delayed or limited.

Security Loans - The IMB, through its lending agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by collateral based on the market value of the securities loaned. The required collateral percentage varies based on the type of collateral received. The required percentage for cash collateral and non-cash collateral consisting of debt obligations and securities issued by the United States Government or its agencies or instrumentalities is at least 102 percent of the market value of the securities loaned. The required percentage of non-cash collateral consisting of equity securities is at least 107 percent of the market value of the securities loaned. Cash collateral received is invested in repurchase agreements, money market mutual funds, and time deposits. Such investments, except for repurchase transactions, are made at the risk of the Pool and, as such, the Pool is liable for investment losses. The lending agent contractually indemnifies the IMB for any repurchase agreement investment losses. Investments made with cash are reported at fair value on the Statement of Assets and Liabilities. Securities loaned remain on the Statement of Assets and Liabilities and Schedule of Investments. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as net securities lending income. The IMB also continues to receive dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations as a change in unrealized appreciation or depreciation on investments.

Futures Contracts - A futures contract is an agreement between a buyer or a seller and the clearinghouse of a futures exchange in which the parties agree to buy or sell a commodity, financial instrument or index at a specified future date and price. Upon entering into a financial futures contract, the IMB is required to pledge to the broker an amount of cash, U.S. government securities, or other assets, equal to a certain percentage of the contract amount (initial margin deposit). Cash (variation margin) is received from or paid to the broker on a daily basis for the fluctuations of the underlying securities or index. The IMB records futures at fair market value as determined by the exchange on which they are traded. Gains or losses on open futures positions are unrealized. These gains or losses become realized when the position is closed.

Stock index futures may be used to provide immediate exposure to fluctuations in the market values of the stocks in the underlying index and to provide liquidity for cash flows.

The market risk associated with holding stock index futures results from changes in the market value of the contractual positions due to changes in the value of the underlying instruments or indices. Investment risk associated with these futures contracts arises because the value of the futures contracts may not correlate perfectly with changes in the values of the underlying instruments or indices due to market distortions.

Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Other risks associated with futures contracts are liquidity risk and credit risk. Liquidity risk arises when there is insufficient trading in a particular futures contract. Credit risk arises from the potential inability of counterparties to meet the terms of the contracts. The IMB's managers generally only utilize futures contracts that are traded on major exchanges or are executed with major dealers. The major exchanges assume the risk of a counterparty default and generally require an initial margin deposit of cash or securities.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The Pool is exposed to credit risk from certain investments made with cash collateral for securities loaned. This risk is limited by requiring minimum ratings on debt instruments. Long-term debt instruments must be rated A or better by Moody's or Standard & Poor's at the time of purchase. Short-term debt instruments must be rated P-1 by Moody's or A-1 by Standard & Poor's at the time of purchase.

Investment Type	Moody's	S&P	Fair Value	Percent of Total Investments
Foreign corporate bonds	A	A	\$ 3,156	0.1%
Foreign government bonds	Aa	A	10	0.0
Money market mutual funds	Aaa	AAA	132,987	3.6
Time deposits	P-1	A-1	105,546	2.8
U.S. corporate bonds	A	A	12,246	0.3
U.S. Government agency bonds	Aaa	AA	3,335	0.1
U.S. Government agency MBS	Aaa	AA	109,742	2.9
U.S. Treasury bonds	Aaa	AA	32,119	0.9
Total rated investments			399,141	10.7
Common stock			3,322,262	89.3
Total investments			\$ 3,721,403	100.0%

This table includes investments received as collateral for repurchase agreements with a fair value of \$332,025 as compared to the amortized cost of the repurchase agreements of \$314,482.

Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one company. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized to a minimum of 102 percent and the collateral is held in the name of the IMB. All remaining securities are held by the IMB's custodian in the name of the IMB.

Interest Rate Risk

The Pool is exposed to interest rate risk from certain investments made with cash collateral for securities loaned. The weighted average maturity for investments made with cash collateral for securities loaned is not to exceed 90 days. The following table provides the weighted average maturities (WAM) for applicable investments made with cash collateral for securities loaned as of June 30, 2016.

Investment Type	Fair Value	WAM (days)
Repurchase agreements	\$ 314,482	2
Time deposits	105,545	1
Total	\$ 420,027	1

Foreign Currency Risk

The Pool is exposed to no or minimal foreign currency risk.

Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 4. DERIVATIVE FINANCIAL INSTRUMENTS

Futures contracts are the only derivative financial instruments held in the Pool. These derivative financial instruments are not designated as hedging instruments under ASC 815; they are used to provide immediate exposure to fluctuations in the market values of the stocks in the underlying index and to provide liquidity for cash flows. The primary underlying risk exposure managed by using these derivative financial instruments is market risk. See Note 2 for discussion on the risks associated with investing in these derivatives.

The table below presents the fair value of the derivative financial instruments recorded in the Statement of Assets and Liabilities as of June 30, 2016:

Derivative Type	Asset Derivatives		Liability Derivatives	
	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location	Fair Value
Equity contracts	Unrealized appreciation on futures contracts	\$ 3,026		\$ -

The table below presents the impact of the derivative financial instruments recorded in the Statement of Operations for the year ended June 30, 2016:

Derivative Type	Statement of Operations Location	Realized Gain (Loss)	Statement of Operations Location	Change in Unrealized Appreciation (Depreciation)
Equity contracts	Net realized loss from futures contracts	\$ (773)	Change in unrealized appreciation (depreciation) on futures contracts	\$ 3,229

The Pool's open futures contracts outstanding at June 30, 2016, as disclosed in Note 7, is indicative of the volume of futures activity for the year ended June 30, 2016.

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 5. FAIR VALUE MEASUREMENTS (continued)

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2016:

Assets	Level 1	Level 2	Level 3	Total
Common stock	\$ 3,150,846	\$ -	\$ -	\$ 3,150,846
Futures contracts	3,026	-	-	3,026
Investments made with cash collateral for securities loaned	110,454	420,027	-	530,481
Money market mutual funds	22,533	-	-	22,533
Total	<u>\$ 3,286,859</u>	<u>\$ 420,027</u>	<u>\$ -</u>	<u>\$ 3,706,886</u>

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2016.

NOTE 6. SECURITIES LENDING

The following table presents the amounts of various accounts related to securities lending at June 30, 2016.

	Fair Value
Securities on loan	\$ 798,386
Collateral received:	
Cash	\$ 530,481
Non-cash	297,962
Total collateral received	<u>\$ 828,443</u>

The Bank of New York Mellon (BNYM), as agent for the IMB, loans the IMB's securities to various counterparties. These transactions are executed under Master Securities Lending Agreements (MSLA) which permit BNYM under certain circumstances, such as defaults, to offset amounts payable to the same counterparty against amounts to be received and thus create one single net payment due to or from the counterparty. The amounts listed in the above table represent all securities loaned which are subject to a MSLA on a net payment basis. The IMB has elected not to offset the fair value of the securities on loan against the liability for the return of the collateral on the Statement of Assets and Liabilities.

Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 7. FUTURES CONTRACTS

At June 30, 2016, open positions in futures contracts were as follows:

<u>Expiration</u>	<u>Open Contracts</u>	<u>Position</u>	<u>Notional Value at June 30, 2016</u>	<u>Notional Value Upon Entering Contract</u>	<u>Unrealized Appreciation (Depreciation)</u>
Sept 2016	1,049 S&P 500	Long	<u>\$ 109,631</u>	<u>\$ 106,605</u>	<u>\$ 3,026</u>

At June 30, 2016, the Pool had pledged cash of \$2,607 to cover margin requirements on open futures contracts.

NOTE 8. INVESTMENT ADVISORY FEES

The IMB has approved investment advisory agreements with INTECH and SSgA to manage the investments of the Pool. These agreements provide for quarterly payments, based on average end of month assets under management, to the investment advisors. The IMB makes these payments and the Pool transfers funds to the IMB to facilitate the payments.

The fees paid to INTECH consist of a base fee of 0.05 percent annually of the net assets under management and a performance incentive fee that is earned when the actual investment return exceeds the return of the S&P 500 over rolling three-year periods. The maximum fee allowable under the agreement is 0.70 percent annually of the net assets under management. The effective fee rate earned by INTECH for the year ended June 30, 2016, was 0.22 percent.

The fees paid to SSgA include a base fee of 0.02 percent annually on the first \$50 million of net assets under management and a base fee of 0.01 percent annually on the assets over \$50 million. The effective fee rate earned by SSgA for the year ended June 30, 2016, was 0.01 percent.

NOTE 9. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance (a):	
Net asset value at June 30, 2015	\$ 22.54

NOTE 10. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool at June 30, 2016.

<u>Participant</u>	<u>Account Value</u>
Teachers' Retirement System	\$ 1,386,945
Public Employees' Retirement System	1,208,724
Workers' Compensation Old Fund	157,082
West Virginia Retiree Health Benefit Trust Fund	130,999
State Police Death, Disability and Retirement Fund	121,456
Revenue Shortfall Reserve Fund - Part B	46,537
Deputy Sheriff's Retirement System	37,009
Judges' Retirement System	35,736
State Police Retirement System	29,775
Coal Workers' Pneumoconiosis Fund	29,399
Public Employees Insurance Agency	20,772
West Virginia Department of Environmental Protection Agency	19,089
Board of Risk and Insurance Management	15,710
Emergency Medical Services Retirement System	12,643
West Virginia Prepaid Tuition Trust Fund	12,169
Wildlife Endowment Fund	11,736
Workers' Compensation Self-Insured Employer Security Risk Pool	6,496
Workers' Compensation Self-Insured Employer Guaranty Risk Pool	3,968
West Virginia Department of Environmental Protection Trust	2,013
Berkeley County Development Authority	1,307
Workers' Compensation Uninsured Employers' Fund	1,298
Municipal Police Officers' and Firefighters' Retirement System	642
Municipal Policemen's or Firemen's Pension and Relief Funds	285
Total	<u>\$ 3,291,790</u>

NOTE 11. SUBSEQUENT EVENTS

The IMB has performed an evaluation of events subsequent to June 30, 2016, through September 9, 2016, the date the Pool's financial statements were available for issuance. The IMB has determined that there were no significant subsequent events which have not been recognized in the Pool's financial statements that require disclosure.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board Non-Large Cap Domestic Equity Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board Non-Large Cap Domestic Equity Pool at June 30, 2016, and the results of its operations and changes in its net assets for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

Non-Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment-related operations of the IMB's Non-Large Cap Domestic Equity Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool invests in the equities of small- to mid-sized companies and its objective is to exceed, net of external investment management fees, the Russell 2500 Index over three- to five-year periods. Assets are managed by AJO and Westfield Capital Management (Westfield).

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 4 for further discussion and presentation of the reporting requirements under ASC 820.

Non-Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value of the Pool's portfolio securities is determined as follows:

- Equity securities are valued at the last sale price or official closing price reported in the market in which they are primarily traded.
- Open-end regulated investment companies or other commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator.
- Fixed income securities are valued according to prices furnished by independent pricing services to the Pool's custodian. These services determine the security prices by a number of methods including, but not limited to, dealer quotes, live market trading levels when available, live feeds of trade execution data, spreads over U.S. Treasury securities, and other models and formulae appropriate to the specific security type.
- Repurchase agreements and time deposits are valued at amortized cost, provided such amount approximates fair value.

Investments for which the fair value cannot be determined by one of the above listed processes are valued at fair value as determined in accordance with the IMB's established procedures.

Repurchase Agreements - In connection with transactions in repurchase agreements, it is the IMB's policy that its designated custodian or mutual third party take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the IMB may be delayed or limited.

Security Loans - The IMB, through its lending agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by collateral based on the market value of the securities loaned. The required collateral percentage varies based on the type of collateral received. The required percentage for cash collateral and non-cash collateral consisting of debt obligations and securities issued by the United States Government or its agencies or instrumentalities is at least 102 percent of the market value of the securities loaned. The required percentage of non-cash collateral consisting of equity securities is at least 107 percent of the market value of the securities loaned. Cash collateral received is invested in repurchase agreements, money market mutual funds, and time deposits. Such investments, except for repurchase transactions, are made at the risk of the Pool and, as such, the Pool is liable for investment losses. The lending agent contractually indemnifies the IMB for any repurchase agreement investment losses. Investments made with cash are reported at fair value on the Statement of Assets and Liabilities. Securities loaned remain on the Statement of Assets and Liabilities and Schedule of Investments. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as net securities lending income. The IMB also continues to receive dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations as a change in unrealized appreciation or depreciation on investments.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Non-Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The Pool is exposed to credit risk from investments made with cash collateral for securities loaned. This risk is limited by requiring minimum ratings on debt instruments. Long-term debt instruments must be rated A or better by Moody's or Standard & Poor's at the time of purchase. Short-term debt instruments must be rated P-1 by Moody's or A-1 by Standard & Poor's at the time of purchase.

The following table provides information on the weighted average credit ratings of the Pool's investments as of June 30, 2016.

Investment Type	Moody's	S&P	Fair Value	Percent of Total Investments
Foreign corporate bonds	A	A	\$ 2,198	0.2%
Foreign government bonds	Aa	A	7	0.0
Money market mutual funds	Aaa	AAA	88,686	7.7
Time deposits	P-1	A-1	73,468	6.4
U.S. corporate bonds	A	A	8,524	0.7
U.S. Government agency bonds	Aaa	AA	2,322	0.2
U.S. Government agency MBS	Aaa	AA	76,389	6.6
U.S. Treasury bonds	Aaa	AA	22,357	1.9
Total rated investments			273,951	23.7
Common stock			880,130	76.3
Total investments			\$ 1,154,081	100.0%

This table includes investments received as collateral for repurchase agreements with a fair value of \$231,116 as compared to the amortized cost of the repurchase agreements of \$218,904.

Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one company. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Non-Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

Custodial Credit Risk

At June 30, 2016, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized to a minimum of 102 percent and the collateral is held in the name of the IMB. All remaining securities are held by the IMB's custodian in the name of the IMB.

Interest Rate Risk

The Pool is exposed to interest rate risk from certain investments made with cash collateral for securities loaned. The weighted average maturity for investments made with cash collateral for securities loaned is not to exceed 90 days. The maturity of floating rate notes is assumed to be the next interest reset date. The following table provides the weighted average maturities (WAM) for applicable investments made with cash collateral for securities loaned as of June 30, 2016.

Investment Type	Fair Value	WAM (days)
Repurchase agreements	\$ 218,904	2
Time deposits	73,468	1
Total	<u>\$ 292,372</u>	<u>1</u>

Foreign Currency Risk

The Pool is exposed to no or minimal foreign currency risk.

NOTE 4. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Non-Large Cap Domestic Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 4. FAIR VALUE MEASUREMENTS (continued)

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2016:

Assets	Level 1	Level 2	Level 3	Total
Common stock	\$ 760,811	\$ -	\$ -	\$ 760,811
Investments made with cash collateral for securities loaned	76,886	292,372	-	369,258
Money market mutual fund	11,800	-	-	11,800
Total	<u>\$ 849,497</u>	<u>\$ 292,372</u>	<u>\$ -</u>	<u>\$ 1,141,869</u>

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2016.

NOTE 5. SECURITIES LENDING

The following table presents the amounts of various accounts related to securities lending at June 30, 2016.

Securities on loan	<u>Fair Value</u> \$ 422,464
Collateral received:	
Cash	\$ 369,258
Non-cash	62,214
Total collateral received	<u>\$ 431,472</u>

The Bank of New York Mellon (BNYM), as agent for the IMB, loans the IMB's securities to various counterparties. These transactions are executed under Master Securities Lending Agreements (MSLA) which permit BNYM under certain circumstances, such as defaults, to offset amounts payable to the same counterparty against amounts to be received and thus create one single net payment due to or from the counterparty. The amounts listed in the above table represent all securities loaned which are subject to a MSLA on a net payment basis. The IMB has elected not to offset the fair value of the securities on loan against the liability for the return of the collateral on the Statement of Assets and Liabilities.

NOTE 6. INVESTMENT ADVISORY FEES

The IMB has approved investment advisory agreements with AJO and Westfield to manage the investments of the Pool. These agreements provide for quarterly payments, based on average end of month assets under management, to the investment advisors. The IMB makes these payments and the Pool transfers funds to the IMB to facilitate the payments.

The fees paid to AJO consist of a base fee of 0.05 percent annually of the net assets under management and a performance incentive fee that is earned when the actual investment return exceeds the return of the Russell 2500 Value index over rolling three-year periods. The maximum fee allowable under the agreement is 1.25 percent annually of the net assets under management. The effective fee rate earned by AJO for the year ended June 30, 2016, was 0.15 percent.

The fees paid to Westfield include a base fee of 0.10 percent annually of net assets under management and a performance incentive fee that is earned when the actual investment return exceeds the return of the Russell 2500 Growth index over rolling three-year periods. The maximum fee allowable under the agreement is 1.00 percent annually of the net assets under management. The effective fee rate earned by Westfield for the year ended June 30, 2016, was 0.10 percent.

Non-Large Cap Domestic Equity Pool

Total	\$ 782,111

Non-Large Cap Domestic Equity Pool

Notes to Financial Statements *(Amounts in thousands, except share data)*

NOTE 9. SUBSEQUENT EVENTS

The IMB has performed an evaluation of events subsequent to June 30, 2016, through September 9, 2016, the date the Pool's financial statements were available for issuance. The IMB has determined that there were no significant subsequent events which have not been recognized in the Pool's financial statements that require disclosure.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board International Qualified Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board International Qualified Pool at June 30, 2016, and the results of its operations and changes in its net assets for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's International Qualified Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool invests in The Silchester International Investors International Value Equity Group Trust (Silchester). The Pool's objective is to produce investment returns that exceed the Morgan Stanley Capital International's Europe Australasia Far East Index by 200 basis points on an annualized basis over three- to five-year periods, net of external investment management fees. Only "qualified participants" (as defined by the *Internal Revenue Code*) may invest in the Pool.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 4 for further discussion and presentation of the reporting requirements under ASC 820.

Commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator. Investments for which the fair value cannot be determined are valued at fair value in accordance with the IMB's established procedures.

International Qualified Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool. In addition to these direct and allocated expenses, the Pool bears certain expenses indirectly, such as fees of the investment fund in which the Pool invests that are reflected in the reported net asset value of such fund.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

NOTE 3. INVESTMENT RISK DISCLOSURES

The Pool invests in a collective trust fund that invests in equities denominated in foreign currencies. The value of this investment at June 30, 2016, was \$1,208,025. This investment, although denominated in U.S. dollars, is exposed to foreign currency risk through the underlying investments. The Pool is not exposed to credit risk, interest rate risk, custodial credit risk, or concentration of credit risk.

NOTE 4. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

International Qualified Pool

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 4. FAIR VALUE MEASUREMENTS (continued)

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The investment in Silchester is valued using the net asset value per share practical expedient. As Silchester is the only investment in the Pool, a fair value hierarchy table is not presented.

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2016.

NOTE 5. INVESTMENT ADVISORY FEES

The IMB has approved an investment advisory agreement with Silchester to manage the investments of the Pool. The Pool pays these advisory fees, based on end of month assets under management, by redeeming shares from the commingled fund managed by Silchester.

The fees paid to Silchester are based on a descending scale of fee rates ranging from 1.0 percent annually on the first \$25 million of assets under management to 0.55 percent annually on assets between \$50 million and \$75 million. For assets greater than \$75 million the fee rate is 0.50 percent. The effective fee rate earned by Silchester for the year ended June 30, 2016, was 0.51 percent.

NOTE 6. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance (a):	
Net asset value at June 30, 2015	\$ 62.51
Income from investment operations:	
Net investment loss	(0.32)
Net realized and unrealized loss on investment transactions	(4.58)
Total from investment operations	(4.90)
Net asset value at June 30, 2016	\$ 57.61
Total Return (b)	-7.8%
Supplemental Data:	
Ratio to average net assets (c):	
Expenses	0.54%
Net investment loss	-0.54%
Portfolio turnover rate	0.00%

- (a) Calculation based on the average shares outstanding
- (b) Return data is net of fees for the full fiscal year
- (c) All ratios are for the fiscal year and do not reflect the Pool's proportionate share of income and expenses of the underlying investee fund.

NOTE 7. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool at June 30, 2016.

<u>Participant</u>	<u>Account Value</u>
Teachers' Retirement System	\$ 594,432
Public Employees' Retirement System	512,339
State Police Death, Disability and Retirement Fund	52,215
Deputy Sheriff's Retirement System	15,596
Judges' Retirement System	15,247
State Police Retirement System	12,443
Emergency Medical Services Retirement System	5,314
Municipal Police Officers' and Firefighters' Retirement System	269
Municipal Policemen's or Firemen's Pension and Relief Funds	122
Total	\$ 1,207,977

NOTE 8. SUBSEQUENT EVENTS

The IMB has performed an evaluation of events subsequent to June 30, 2016, through September 9, 2016, the date the Pool's financial statements were available for issuance. The IMB has determined that there were no significant subsequent events which have not been recognized in the Pool's financial statements that require disclosure.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board International Nonqualified Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board International Nonqualified Pool at June 30, 2016, and the results of its operations and changes in its net assets for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's International Nonqualified Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool invests in The Silchester International Investors International Value Equity Trust (Silchester). The Pool's objective is to produce investment returns that exceed the Morgan Stanley Capital International's Europe Australasia Far East Index by 200 basis points on an annualized basis over three- to five-year periods, net of external investment management fees. The Pool exists for participants who are not "qualified" (as defined by the *Internal Revenue Code*).

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 4 for further discussion and presentation of the reporting requirements under ASC 820.

Commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator. Investments for which the fair value cannot be determined are valued at fair value in accordance with the IMB's established procedures.

International Nonqualified Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool. In addition to these direct and allocated expenses, the Pool bears certain expenses indirectly, such as fees of the investment fund in which the Pool invests that are reflected in the reported net asset value of such fund.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

NOTE 3. INVESTMENT RISK DISCLOSURES

The Pool invests in a collective trust fund that invests in equities denominated in foreign currencies. The value of this investment at June 30, 2016, was \$141,311. This investment, although denominated in U.S. dollars, is exposed to foreign currency risk through the underlying investments. The Pool is not exposed to credit risk, interest rate risk, custodial credit risk, or concentration of credit risk.

NOTE 4. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

International Nonqualified Pool

Notes to Financial Statements *(Amounts in thousands, except share data)*

NOTE 4. FAIR VALUE MEASUREMENTS (continued)

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The investment in Silchester is valued using the net asset value per share practical expedient. As Silchester is the only investment in the Pool, a fair value hierarchy table is not presented.

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2016.

NOTE 5. INVESTMENT ADVISORY FEES

The IMB has approved an investment advisory agreement with Silchester to manage the investments of the Pool. The Pool pays these advisory fees, based on end of month assets under management, by redeeming shares from the commingled fund managed by Silchester.

The fees paid to Silchester are based on a descending scale of fee rates ranging from 1.0 percent annually on the first \$25 million of assets under management to 0.55 percent annually on assets between \$50 million and \$75 million. For assets greater than \$75 million the fee rate is 0.50 percent. The effective fee rate earned by Silchester for the year ended June 30, 2016 was 0.62 percent.

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 6. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance (a):	
Net asset value at June 30, 2015	\$ 57.57
Income from investment operations:	
Net investment loss	(0.35)
Net realized and unrealized loss on investment transactions	(4.25)
Total from investment operations	(4.60)
Net asset value at June 30, 2016	\$ 52.97
Total Return (b)	-8.0%
Supplemental Data:	
Ratio to average net assets (c):	
Expenses	0.65%
Net investment loss	-0.65%
Portfolio turnover rate	0.00%

- (a) Calculation based on the average shares outstanding
- (b) Return data is net of fees for the full fiscal year
- (c) All ratios are for the fiscal year and do not reflect the Pool's proportionate share of income and expenses of the underlying investee fund.

NOTE 7. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool at June 30, 2016.

<u>Participant</u>	<u>Account Value</u>
West Virginia Retiree Health Benefit Trust Fund	\$ 48,963
Workers' Compensation Old Fund	42,953
Revenue Shortfall Reserve Fund - Part B	12,096
Coal Workers' Pneumoconiosis Fund	10,198
Public Employees Insurance Agency	8,533
Board of Risk and Insurance Management	4,892
Wildlife Endowment Fund	4,395
West Virginia Department of Environmental Protection Agency	3,405
West Virginia Prepaid Tuition Trust Fund	3,037
West Virginia Department of Environmental Protection Trust	748
Workers' Compensation Self-Insured Employer Guaranty Risk Pool	721
Berkeley County Development Authority	536
Workers' Compensation Uninsured Employers' Fund	498
Workers' Compensation Self-Insured Employer Security Risk Pool	331
Total	\$ 141,306

NOTE 8. SUBSEQUENT EVENTS

The IMB has performed an evaluation of events subsequent to June 30, 2016, through September 9, 2016, the date the Pool's financial statements were available for issuance. The IMB has determined that there were no significant subsequent events which have not been recognized in the Pool's financial statements that require disclosure.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board International Equity Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board International Equity Pool at June 30, 2016, and the results of its operations and changes in its net assets for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

International Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's International Equity Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

This Pool invests in the equities of international companies. Assets are managed by Acadian Asset Management, LLC (Acadian), Axiom International Investors, LLC (Axiom), Brandes Investment Partners, L.P. (Brandes), LSV Asset Management (LSV), and Oberweis Asset Management, Inc (Oberweis). The objective of the Pool is to exceed, net of external investment management fees, Morgan Stanley Capital International's All Country World Free Ex US Index over three- to five-year periods.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 4 for further discussion and presentation of the reporting requirements under ASC 820.

International Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value of the Pool's portfolio securities is determined as follows:

- Equity securities are valued at the last sale price or official closing price reported in the market in which they are primarily traded.
- Open-end regulated investment companies or other commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator.
- Equity securities that trade in non-U.S. markets are valued in U.S. dollars using period end spot market exchange rates as supplied by the Pool's custodian.
- Fixed income securities are valued according to prices furnished by independent pricing services to the Pool's custodian. These services determine the security prices by a number of methods including, but not limited to, dealer quotes, live market trading levels when available, live feeds of trade execution data, spreads over U.S. Treasury securities, and other models and formulae appropriate to the specific security type.
- Repurchase agreements and time deposits are valued at amortized cost, provided such amount approximates fair value.

Investments for which the fair value cannot be determined by one of the above listed processes are valued at fair value as determined in accordance with the IMB's established procedures.

Foreign Currency - Amounts denominated in or expected to settle in foreign currencies are translated into U.S. dollars at exchange rates reported by the Pool's custodian, Bank of New York Mellon, on the following basis:

- Market value of investment securities, other assets and liabilities - at the closing rate of exchange at the valuation date.
- Purchases and sales of investment securities, income and expenses - at the rate of exchange prevailing on the respective dates of such transactions.

The IMB isolates that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from market prices of securities held.

Reported net realized foreign exchange gains and losses arise from sales of portfolio securities, sales and maturities of short-term securities, sales of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities including investments in securities at month end, resulting from changes in the exchange rate.

Repurchase Agreements - In connection with transactions in repurchase agreements, it is the IMB's policy that its designated custodian or mutual third party take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the IMB may be delayed or limited.

Security Loans - The IMB, through its lending agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for international securities is secured by collateral based on the market value of the securities loaned. The required collateral percentage varies based on the type of collateral received. The required percentage for cash collateral and non-cash collateral consisting of debt obligations and securities issued by the United States Government or its agencies or instrumentalities is 105 percent unless the foreign securities loaned are denominated and payable in U.S. Dollars, then the collateral shall be at least 102 percent of the market value of the securities loaned. The required percentage of non-cash collateral consisting of equity securities is at least 107 percent of the market value of the securities loaned. Cash collateral received is invested in repurchase agreements, money market mutual funds, and time deposits. Such investments, except for repurchase transactions, are made at the risk of the Pool and, as such, the Pool is liable for investment losses. The lending agent contractually indemnifies the IMB for any repurchase agreement investment

International Equity Pool

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

losses. Investments made with cash are reported at fair value on the Statement of Assets and Liabilities. Securities loaned remain on the Statement of Assets and Liabilities and Schedule of Investments. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as net securities lending income. The IMB also continues to receive dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations as a change in unrealized appreciation or depreciation on investments.

Foreign Currency Contracts - A foreign currency contract is an agreement between two parties to exchange different currencies at a specified exchange rate at an agreed upon future date. The managers, as listed in Note 1, enter into such contracts to correspond to investment transactions trading in foreign currencies. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. These contracts have relatively short durations and are valued at the prevailing market exchange rates at month end. An unrealized gain or loss is recorded as the difference between the amount valued at month end and the amount to be received or paid at the settlement date. The unrealized gain or loss is reclassified to realized gain or loss when the contract settles.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for U.S. federal or state income taxes is required as of June 30, 2016.

In certain foreign countries the Pool's dividend income and capital gains may be taxable. Taxes on dividend income are generally withheld from the payments and as a result there is no provision recorded for these taxes. In certain cases there may be a full or partial reclaim available for the withheld taxes. Capital gains taxes, if any, on sales of securities may be assessed and paid concurrent with the sale or upon the filing of a return with the taxing authority. In countries where the IMB is liable for capital gains taxes, the IMB will estimate and accrue a capital gains tax liability for unrealized gains on securities held in such countries. The outstanding reclaims and accrued capital gains taxes are reported on the Statement of Assets and Liabilities. Dividend income is reported net of withheld taxes on the Statement of Operations. Net realized gain (loss) from investments and net change in unrealized appreciation (depreciation) on investments are reported net of capital gains taxes on the Statement of Operations.

International Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The Pool is exposed to credit risk from investments made with cash collateral for securities loaned. This risk is limited by requiring minimum ratings on debt instruments. Long-term debt instruments must be rated A or better by Moody's or Standard & Poor's at the time of purchase. Short-term debt instruments must be rated P-1 by Moody's or A-1 by Standard & Poor's at the time of purchase.

Investment Type	Moody's	S&P	Fair Value	Percent of Total Investments
Foreign corporate bonds	A	A	\$ 1,127	0.0%

U.S. Treasury bonds	Aaa	AA	11,478	0.4
Total rated investments			<u>165,102</u>	<u>5.4</u>
Common stock			2,797,848	92.4
Preferred stock			68,037	2.2
Rights			217	0.0
Total investments			<u>\$ 3,031,204</u>	<u>100.0%</u>

This table includes investments received as collateral for repurchase agreements with a fair value of \$118,650 as compared to the amortized cost of the repurchase agreements of \$112,380.

Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one company. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized to a minimum of 102 percent and the collateral is held in the name of the IMB. All remaining securities are held by the IMB's custodian in the name of the IMB.

Interest Rate Risk

The Pool is exposed to interest rate risk from certain investments made with cash collateral for securities loaned. The weighted average maturity for investments made with cash collateral for securities loaned is not to exceed 90 days. The following table provides the weighted average maturities (WAM) for applicable investments made with cash collateral for securities loaned as of June 30, 2016.

International Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 4. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price). ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2016:

Assets	Level 1	Level 2	Level 3	Total
Common stock	\$ 2,736,592	\$ -	\$ -	\$ 2,736,592
Foreign currency contracts	-	68	-	68
Investments made with cash collateral for securities loaned	39,472	150,096	-	189,568
Preferred stock	68,037	-	-	68,037
Rights	217	-	-	217
Money market mutual fund	30,520	-	-	30,520
Total	<u>\$ 2,874,838</u>	<u>\$ 150,164</u>	<u>\$ -</u>	<u>\$ 3,025,002</u>
Liabilities	Level 1	Level 2	Level 3	Total
Foreign currency contracts	<u>\$ -</u>	<u>\$ (63)</u>	<u>\$ -</u>	<u>\$ (63)</u>

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2016.

NOTE 5. SECURITIES LENDING

The following table presents the amounts of various accounts related to securities lending at June 30, 2016.

	Fair Value
Securities on loan	<u>\$ 343,560</u>
Collateral received:	
Cash	\$ 189,568
Non-cash	184,110
Total collateral received	<u>\$ 373,678</u>

International Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 5. SECURITIES LENDING (continued)

The Bank of New York Mellon (BNYM), as agent for the IMB, loans the IMB's securities to various counterparties. These transactions are executed under Master Securities Lending Agreements (MSLA) which permit BNYM under certain circumstances, such as defaults, to offset amounts payable to the same counterparty against amounts to be received and thus create one single net payment due to or from the counterparty. The amounts listed in the above table represent all securities loaned which are subject to a MSLA on a net payment basis. The IMB has elected not to offset the fair value of the securities on loan against the liability for the return of the collateral on the Statement of Assets and Liabilities.

NOTE 7. INVESTMENT ADVISORY FEES

The IMB has approved investment advisory agreements with Acadian, Axiom, Brandes, LSV, and Oberweis to manage the investments of the Pool. These agreements provide for quarterly payments, based on average end of month assets under management, to the investment advisors. The IMB makes these payments and the Pool transfers funds to the IMB to facilitate the payments.

The fees paid to Acadian are based on a descending scale of fee rates ranging from 0.70 percent annually on the first \$100 million of assets under management and 0.50 percent annually for assets greater than \$100 million. The effective fee rate earned by Acadian for the year ended June 30, 2016, was 0.57 percent.

The fees paid to Axiom are based on a descending scale of fee rates ranging from 1.0 percent annually on the first \$25 million of assets under management to 0.70 percent annually on assets between \$125 million and \$175 million. For assets greater than \$175 million the fee rate is 0.60 percent annually. The effective fee rate earned by Axiom for the year ended June 30, 2016, was 0.73 percent.

The fees paid to Brandes are based on a descending scale of fee rates ranging from 0.95 percent annually on the first \$25 million of assets under management to 0.80 percent annually on assets between \$50 million and \$150 million. For assets greater than \$150 million the fee rate is 0.70 percent annually. The effective fee rate earned by Brandes for the year ended June 30, 2016, was 0.74 percent.

The fees paid to LSV are based on a descending scale of fee rates ranging from 0.75 percent annually on the first \$25 million of assets under management to 0.55 percent annually on assets between \$50 million and \$100 million. For assets greater than \$100 million the fee rate is 0.45 percent annually. The effective fee rate earned by LSV for the year ended June 30, 2016, was 0.46 percent.

The fees paid to Oberweis are based on a descending scale of fee rates ranging from 1.0 percent annually on the first \$50 million of assets under management to 0.90 percent annually on assets between \$50 million and \$100 million. For assets greater than \$100 million the fee rate is 0.80 percent annually. The effective fee rate earned by Oberweis for the year ended June 30, 2016, was 0.88 percent.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board Short-Term Fixed Income Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board Short-Term Fixed Income Pool at June 30, 2016, and the results of its operations and changes in its net assets for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

Short-Term Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Short-Term Fixed Income Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The main objective of the Pool is to maintain sufficient liquidity to fund withdrawals by the participant plans and to invest cash contributions until such time as the money can be transferred to other asset classes without sustaining capital losses. JP Morgan Investment Advisors, Inc. (JPM) manages the Pool. The Pool's investment objective, net of external investment management fees, is to meet or exceed the Citigroup ninety-day T-bill Index plus fifteen basis points.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 4 for further discussion and presentation of the reporting requirements under ASC 820.

Short-Term Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value of the Pool's portfolio securities is determined as follows:

- All securities are valued at amortized cost provided such amount approximates fair value. The basic premise underlying the use of the amortized cost method of valuation is that high-quality, short-term debt securities held until maturity will eventually return to their amortized cost value, regardless of any current disparity between the amortized cost value and market value, and would not ordinarily be expected to fluctuate significantly in value. The Pool values its securities at amortized cost so long as the deviation between the amortized cost and current market value remains minimal and results in the computation of a share price that represents fairly the current net asset value per share of the fund.

Repurchase Agreements - In connection with transactions in repurchase agreements, it is the IMB's policy that its designated custodian or mutual third party take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the IMB may be delayed or limited.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method. Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The net investment income of the Pool is declared as a dividend and distributed daily to the participants based upon their pro rata participation in the Pool. The distributions of net investment income are credited to the participants' accounts in the form of dividend reinvestments in the Pool and are presented first as distributions to participants, and then as reinvestment of distributions on the Statement of Changes in Net Assets. The Pool does not routinely distribute dividends of net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

Short-Term Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The IMB limits the exposure to credit risk in the Pool by requiring all corporate bonds to be rated AA or higher. Commercial paper must be rated A-1 by Standard & Poor's and P-1 by Moody's. Additionally, the Pool must have at least 15 percent of its assets in United States Treasury issues. The following table provides information on the weighted average credit ratings of the Pool's investments as of June 30, 2016.

Investment Type	Moody's	S&P	Carrying Value	Percent of Total Investments
Commercial paper	P-1	A-1	\$ 52,734	14.9%
Money market mutual fund	Aaa	AAA	82,161	23.2
U.S. Government agency bonds	P-1	A-1	130,482	37.0
U.S. Treasury bonds	Aaa	AA	88,046	24.9
Total investments			<u>\$ 353,423</u>	<u>100.0%</u>

This table includes U.S. Treasury notes received as collateral for a repurchase agreement with a fair value of \$13,260 as compared to the amortized cost of the repurchase agreement of \$13,000.

Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one corporate name. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016, the Pool held no investments that were subject to custodial credit risk. Repurchase agreements are collateralized at 102 percent and the collateral is held in the name of the IMB. All remaining investments are held by the IMB's custodian in the name of the IMB.

Interest Rate Risk

The weighted average maturity of the investments of the Pool is not to exceed 60 days. The maturity of floating rate notes is assumed to be the next interest rate reset date. The following table provides the weighted average maturities (WAM) for the applicable asset types in the Pool as of June 30, 2016.

Investment Type	Carrying Value	WAM (days)
Commercial paper	\$ 52,734	22
Money market mutual fund	82,161	N/A
Repurchase agreement	13,000	1
U.S. Government agency bonds	130,482	55
U.S. Treasury bond	74,786	28
Total applicable investments	<u>\$ 353,163</u>	<u>39</u>

Foreign Currency Risk

The Pool has no investments that are subject to foreign currency risk.

Short-Term Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 4. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investments in accordance with ASC 820 fair value hierarchy levels as of June 30, 2016:

Assets	Level 1	Level 2	Level 3	Total
Commercial paper	\$ -	\$ 52,734	\$ -	\$ 52,734
Money market mutual fund	82,161	-	-	82,161
Repurchase agreement	-	13,000	-	13,000
U.S. Government agency bonds	-	130,482	-	130,482
U.S. Treasury bonds	-	74,786	-	74,786
Total	\$ 82,161	\$ 271,002	\$ -	\$ 353,163

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2016.

NOTE 5. INVESTMENT ADVISORY FEES

The IMB has approved an investment advisory agreement with JPM to manage the investments of the Pool. This agreement provides for quarterly payments, based on average daily assets under management, to the investment advisor. The IMB makes these payments and the Pool transfers funds to the IMB to facilitate the payments.

The fees paid to JPM are based on a two-tier scale of fee rates that are 0.05 percent annually on the first \$300 million of assets under management and 0.04 percent annually for assets greater than \$300 million. The effective fee rate earned by JPM for the year ended June 30, 2016, was 0.05 percent.

NOTE 6. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance (a):

Net asset value at June 30, 2015	\$	1.00
Income from investment operations:		
Net investment income (b)		-
Net realized gain (loss) on investment transactions (b)		-
Total from investment operations		-
Less distributions from net investment income (b)		-
Net asset value at June 30, 2016	\$	1.00

Total Return (c) 0.2%

Supplemental Data:

Ratio to average net assets (d):		
Expenses		0.09%
Net investment income		0.16%
Weighted average days to maturity		39
Maximum weighted average investment maturity per Board guidelines		60 days
Money market yield (e)		0.30%

- (a) Calculation based on the average shares outstanding
- (b) Per share amount is less than \$0.01, amount is rounded for reporting purposes
- (c) Return data is net of fees for the full fiscal year
- (d) All ratios are for the fiscal year
- (e) The money market yield represents the rate of income, net of expenses, earned over the past month divided by average shares outstanding and is not intended to indicate future performance. The return is annualized over a 365-day year, assuming no reinvestment of earnings.

NOTE 7. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool at June 30, 2016. The balances do not include undistributed gains. To the extent the Pool has undistributed realized gains or accumulated realized losses, the net asset value of the Pool may be higher or lower than the total below.

<u>Participant</u>	<u>Account Value</u>
Teachers' Retirement System	\$ 104,030
Revenue Shortfall Reserve Fund	75,030
Workers' Compensation Old Fund	43,590
State Police Death, Disability and Retirement Fund	13,286
Coal Workers' Pneumoconiosis Fund	10,886
Public Employees' Retirement System	7,511
Board of Risk and Insurance Management	6,641
Workers' Compensation Self-Insured Employer Security Risk Pool	1,913
West Virginia Department of Environmental Protection Agency	1,808
Workers' Compensation Self-Insured Employer Guaranty Risk Pool	1,240
Workers' Compensation Uninsured Employers' Fund	1,093
West Virginia Prepaid Tuition Trust Fund	1,003
State Police Retirement System	894
Deputy Sheriff's Retirement System	775
Emergency Medical Services Retirement System	407
Judges' Retirement System	371
Municipal Police Officers' and Firefighters' Retirement System	121
Public Employees Insurance Agency	103
Wildlife Endowment Fund	78
West Virginia Retiree Health Benefit Trust Fund	67
Revenue Shortfall Reserve Fund - Part B	24
Berkeley County Development Authority	5
Municipal Policemen's or Firemen's Pension and Relief Funds	3
Total	<u>\$ 270,879</u>

NOTE 8. SUBSEQUENT EVENTS

The IMB has performed an evaluation of events subsequent to June 30, 2016, through September 9, 2016, the date the Pool's financial statements were available for issuance. The IMB has determined that there were no significant subsequent events which have not been recognized in the Pool's financial statements that require disclosure.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board Total Return Fixed Income Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board Total Return Fixed Income Pool at June 30, 2016, and the results of its operations and changes in its net assets for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

Total Return Fixed Income Pool

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Total Return Fixed Income Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The main objective of this Pool is to earn superior returns with low volatility by actively investing in the extended fixed income markets. Dodge & Cox (DAC), Franklin Templeton Investments (FTI), and Western Asset Management Company (Western) manage the Pool. The Pool's investment objective, net of external investment management fees, is to meet or exceed the Barclays Capital Universal Index.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 5 for further discussion and presentation of the reporting requirements under ASC 820.

Total Return Fixed Income Pool

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value of the Pool's portfolio securities is determined as follows:

- Fixed income securities are valued according to prices furnished by independent pricing services to the Pool's custodian. These services determine the security prices by a number of methods including, but not limited to, dealer quotes, live market trading levels when available, live feeds of trade execution data, spreads over U.S. Treasury securities, and other models and formulae appropriate to the specific security type.
- Open-end regulated investment companies or other commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator.
- Futures and option contracts are valued at the last settlement price established each day by the exchange on which they are traded.
- Credit default, interest rate, and currency swap values are based on market values received from third parties or are determined by valuation models.
- Foreign currency forward contracts are valued at the difference between the forward contract amount and the month-end forward exchange rate.
- Repurchase agreements and time deposits are valued at amortized cost, provided such amount approximates fair value.

Investments for which the fair value cannot be determined by one of the above listed processes are valued at fair value as determined in accordance with the IMB's established procedures.

Foreign Currency - Amounts denominated in or expected to settle in foreign currencies are translated into U.S. dollars at exchange rates reported by the Bank of New York Mellon on the following basis:

- Market value of investment securities, other assets and liabilities - at the closing rate of exchange at the valuation date.
- Purchases and sales of investment securities, income and expenses - at the rate of exchange prevailing on the respective dates of such transactions.

The IMB isolates that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from market prices of securities held.

Reported net realized foreign exchange gains and losses arise from sales of portfolio securities, sales and maturities of short-term securities, sales of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities including investments in securities at month end, resulting from changes in the exchange rate.

Option Contracts - The IMB may purchase or write bond, currency, or index option contracts that have recognized liquidity and are actively traded on major exchanges or are executed with major dealers. These option contracts give the purchaser (seller) of the contract the right to buy (call) or sell (put) the security, or settle cash for an index option, underlying the contract at an agreed upon price (strike price) during or at the conclusion of a specified period of time.

Premiums paid upon the purchase of an option contract are recorded as an asset and subsequently adjusted to market value. Upon exercising a purchased option, a gain or loss is recorded equal to the difference between the market value of the underlying instrument and the strike price of the option, minus premiums paid. If the option expires unexercised, a loss is recognized in the amount of the premiums paid for the option.

Total Return Fixed Income Pool

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Premiums received when option contracts are written are recorded as a liability and subsequently adjusted to market value. If a written option contract expires unexercised, a gain is recorded equal to the amount of the premiums received. The difference between the premiums received and the amount paid to effect a closing transaction is also recorded as a gain or loss. When a written option is exercised, a gain or loss is recorded equal to the difference between the market value of the underlying instrument and the strike price of the option, minus premiums received.

Written option contracts are used to enhance investment returns and reduce portfolio convexity when implied volatility is high. Purchased option contracts are used to increase portfolio convexity when implied volatility is low, to implement certain yield curve strategies, or to hedge sector exposure.

When writing put options, there is risk that a loss may be incurred if the market price of the underlying instrument decreases and the option is exercised. This loss is determined by market conditions and cannot be specifically limited. The risk associated with writing call options is the loss of potential profit if the market price of the security increases and the option is exercised. Purchased put or call options bear the risk of loss of the premium paid if market conditions are not favorable to exercise the option. There may also be risk that the value of the option contract does not correlate perfectly with movements of the underlying instrument due to certain market distortions.

The IMB limits its exposure to credit risk by only buying or selling options traded on major exchanges, or executed with major dealers. There is a risk of the inability to enter into a closing transaction if a liquid secondary market does not exist. The IMB maintains sufficient levels of cash or cash equivalents to meet cash flow obligations.

Repurchase Agreements - In connection with transactions in repurchase agreements, it is the IMB's policy that its designated custodian or mutual third party take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the IMB may be delayed or limited.

Security Loans - The IMB, through its lending agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for international and domestic securities is secured by collateral based on the market value of the securities loaned. The required collateral percentage varies based on the type of collateral received and the type of security loaned. For U.S. securities, the required percentage of cash collateral and non-cash collateral consisting of debt obligations and securities issued by the United States Government or its agencies or instrumentalities is at least 102 percent of the market value of the securities loaned plus accrued income. For international securities, the required collateral is at least 105 percent of the market value of the securities on loan unless the foreign securities loaned are denominated and payable in U.S. Dollars, then the collateral shall be at least 102 percent of the market value of the securities loaned. Cash collateral received is invested in repurchase agreements, money market mutual funds, and time deposits. Such investments, except for repurchase transactions, are made at the risk of the Pool and, as such, the Pool is liable for investment losses. The lending agent contractually indemnifies the IMB for any repurchase agreement investment losses. Investments made with cash are reported at fair value on the Statement of Assets and Liabilities. Securities loaned remain on the Statement of Assets and Liabilities and Schedule of Investments. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as net securities lending income. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations as a change in unrealized appreciation or depreciation on investments.

Futures Contracts - A futures contract is an agreement between a buyer or a seller and the clearinghouse of a futures exchange in which the parties agree to buy or sell a commodity, financial instrument or index at a specified future date and price. Upon entering into a financial futures contract, the IMB is required to pledge to the broker an amount of cash, U.S. government securities, or other assets, equal to a certain percentage of the contract amount (initial margin deposit). Cash (variation margin) is received from or paid to the broker for the fluctuations of the underlying securities or index. The IMB records futures at fair market value. Gains or losses on open futures positions are unrealized. These gains or losses become realized when the position is closed.

Total Return Fixed Income Pool

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Interest rate futures may be used to enhance portfolio yields, manage portfolio duration, or as an alternative investment of cash.

The market risk associated with holding interest rate futures results from changes in the market value of the contractual positions due to changes in the value of the underlying instruments or indices. Investment risk associated with these futures contracts arises because the value of the futures contracts may not correlate perfectly with changes in the values of the underlying instruments or indices due to market distortions.

Other risks associated with futures contracts are liquidity risk and credit risk. Liquidity risk arises when there is insufficient trading in a particular futures contract. Credit risk arises from the potential inability of counterparties to meet the terms of the contracts. The IMB's managers generally only utilize futures contracts that are traded on major exchanges or are executed with major dealers. The major exchanges assume the risk of a counterparty default and generally require an initial margin deposit of cash or securities.

Foreign Currency Forward Contracts - A foreign currency forward contract is an agreement between two parties to exchange different currencies at a specified exchange rate at an agreed upon future date. The IMB enters into such contracts to take advantage of the relative changes in currency exchange rates. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. These contracts are valued at the prevailing market exchange rates at month end. An unrealized gain or loss is recorded as the difference between the amount valued at month end and the amount to be received or paid at the expiration date. The unrealized gain or loss is reclassified to realized gain or loss when the contract expires.

Credit Default Swaps - Credit default swaps are agreements between counterparties to transfer the credit risk of referenced debt securities. The buyer of the credit default swap gains protection against a negative credit event such as a default or credit rating downgrade and the seller assumes the credit risk and is obligated to pay upon the occurrence of such an event. Fair values are based on market values received from third parties or are determined by valuation models. Credit default swap agreements are marked-to-market daily and the change, if any, is recorded as unrealized gain or loss. Upfront payments received or made by the Pool on credit default swap agreements are amortized over the expected life of the agreement. Periodic payments received or paid are recorded as interest income. Payments received or made as a result of a credit event or termination of the contract are recognized, net of a proportional amount of the upfront payment, as realized gains or losses.

In accordance with its principal investment strategy, the Pool enters into credit default swaps as a seller of protection primarily to gain exposure similar to the high yield bond market. Credit default swaps are instruments which allow for the full or partial transfer of third party credit risk, with respect to a particular entity or entities, from one counterparty to the other. A seller of credit default swaps is selling credit protection or assuming credit risk with respect to the underlying entity or entities. If a credit event occurs, as defined under the terms of the swap agreement, the Pool will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. The Notional Principal reflects the maximum potential amount the Pool could be required to pay as a seller of credit protection if a credit event occurs. As the seller of protection, the Pool receives periodic premium payments from the counterparty and may also receive or pay an upfront premium adjustment to the stated periodic premium.

The quoted market prices and resulting market values for credit default swap agreements on securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative had the notional amount of the swap agreement been closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

Total Return Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Interest Rate Swaps - Interest rate swaps represent agreements between counterparties to exchange cash flows based on the difference between two interest rates, applied to a notional principal amount for a specified period. Interest rate swaps do not involve the exchange of principal between the parties. Interest is paid or received periodically. Fair values are based on market values received from third parties or are determined by valuation models.

Currency Swaps - Currency swaps represent agreements between counterparties to exchange principal and interest payments in one currency for principal and interest payments of another currency. Fair values are based on market values received from third parties or are determined by valuation models.

Asset-Backed Securities - The Pool invests in various asset-backed securities, mortgage-backed securities, and structured corporate debt. The securities are reported at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. The Pool invests in these securities to enhance yields on investments. Changes in market interest rates affect the cash flows of these securities and may result in changes in fair value. The overall return or yield on these securities depends on the changes in the interest and principal payment pattern and market value of the underlying assets.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method. Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security. The amortization of asset-backed securities considers the effect of prepayments on the life of the security. Historical prepayment speeds are obtained from market data vendors and are updated annually. The effect of changing prepayment assumptions is reflected in the Statement of Operations in the year of the change. Interest income also includes paydown gains and losses on mortgage-backed securities, collateralized mortgage obligations, and asset-backed securities.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The monthly net investment income of the Pool is declared as a dividend on the last day of the month and distributed to the participants of the Pool on the first day of the following month. Distributions are paid in the form of reinvestments in the Pool and have been included in distributions to participants and reinvestment of distributions as presented on the Statement of Changes in Net Assets. The Pool does not routinely distribute dividends of net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool. In addition to these direct and allocated expenses, the Pool bears certain expenses indirectly, such as fees of other investment funds in which the Pool invests that are reflected in the reported net asset value of such funds.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

Total Return Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The IMB limits the exposure to credit risk in the Pool by maintaining at least an average rating of investment grade as defined by the Nationally Recognized Statistical Rating Organizations. The following table provides the weighted average credit ratings of the rated assets in the Pool as of June 30, 2016.

Investment Type	Moody's	S&P	Fair Value	Percent of Total Investments
Bank loan	B	B	\$ 936	0.0%
Corporate asset backed issues	A	A	36,980	1.7
Corporate CMO	Ba	BB	27,879	1.3
Corporate preferred securities	Ba	BB	10,472	0.5
Foreign asset backed issues	A	A	11,726	0.5
Foreign corporate bonds	Baa	BBB	293,586	13.6
Foreign government bonds	Ba	BB	217,700	10.1
Money market mutual funds	Aaa	AAA	66,469	3.1
Municipal bonds	A	A	40,081	1.9
Time deposits	P-1	A-1	20,028	0.9
U.S. corporate bonds	Baa	BBB	542,373	25.2
U.S. Government agency bonds	Aaa	AA	3,332	0.2
U.S. Government agency CMO	Aaa	AA	64,627	3.0
U.S. Government agency CMO interest- only	Aaa	AA	6,519	0.3
U.S. Government agency MBS	Aaa	AA	275,666	12.8
U.S. Government agency TBA	Aaa	AA	637	0.0
U.S. Treasury bonds	Aaa	AA	107,797	5.0
U.S. Treasury inflation-protected securities	Aaa	AA	26,550	1.2
Total rated investments			1,753,358	81.3
Common stock			32,528	1.5
Corporate ABS residual			5,385	0.3
Investments in other funds			360,669	16.8
Options contracts purchased			1,192	0.1
Total investments			\$ 2,153,132	100.0%

This table includes investments received as collateral for repurchase agreements with a fair value of \$63,005 as compared to the amortized cost of the repurchase agreements of \$59,675.

Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one corporate name. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized at 102 percent and the collateral is held in the name of the IMB. Investments in commingled funds are held in an account in the name of the IMB. All remaining securities are held by the IMB's custodian in the name of the IMB.

Total Return Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

Interest Rate Risk

The IMB monitors interest rate risk of the Pool by evaluating the effective duration of the investments in the Pool. The following table provides the weighted average effective duration for the various asset types in the Pool as of June 30, 2016.

Investment Type	Fair Value	Effective Duration (years)
Bank loan	\$ 936	0.1
Corporate asset backed issues	36,980	1.8
Corporate ABS residual	5,385	N/A
Corporate CMO	27,879	1.9
Corporate preferred securities	10,472	0.1
Foreign asset backed issues	11,726	2.4
Foreign corporate bonds	292,987	6.6
Foreign government bonds	217,698	6.0
Investment in other funds	360,669	2.9
Money market mutual funds	66,469	N/A
Municipal Bonds	40,081	10.4
Options contracts purchased	1,192	N/A
Repurchase agreements	59,675	0.0
Time deposits	20,028	0.0
U.S. corporate bonds	540,049	8.3
U.S. Government agency bonds	2,699	3.3
U.S. Government agency CMO	64,627	0.9
U.S. Government agency CMO interest-only	6,519	34.0
U.S. Government agency MBS	254,842	1.7
U.S. Government agency TBA	637	0.0
U.S. Treasury bonds	101,702	3.0
U.S. Treasury inflation-protected securities	26,550	19.5
Total investments	<u>\$ 2,149,802</u>	<u>5.1</u>

The Pool invests in commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. The cash flows from these securities are based on the payment of the underlying collateral. The effective duration and yield to maturity of these securities are dependent on estimated prepayment assumptions that consider historical experience, market conditions and other criteria. Actual prepayments may vary with changes in interest rates. Rising interest rates often result in a slower rate of prepayments while declining rates tend to lead to faster prepayments. As a result, the fair values of these securities are highly sensitive to interest rate changes. At June 30, 2016, the Pool held \$407,958 of these securities. This represents approximately 19 percent of the value of the Pool's securities.

Foreign Currency Risk

The Pool has foreign government bonds and foreign corporate bonds that are denominated in foreign currencies and are exposed to foreign currency risks. The Pool also has foreign denominated futures contracts, a currency swap, and foreign exchange forward contracts. Refer to Notes 7, 8, and 9, respectively, for details on these contracts. Additionally, the Pool has indirect exposure to foreign currency risk through its ownership interests in certain of the commingled investment pools. Approximately \$82,390, or 23 percent, of the commingled investment pools hold substantially all of their investments in foreign currencies. This represents approximately 4 percent of the value of the Pool's securities. The amounts at fair value (in U.S. dollars) of investments and cash denominated in foreign currencies as of June 30, 2016, are as follows:

Total Return Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

Currency	Investments	Cash	Total	Percent of Total Investments and Cash
Brazil Real	\$ 18,357	\$ 739	\$ 19,096	0.9%
British Pound	(16)	29	13	0.0
Colombian Peso	3,827	-	3,827	0.2
Deutsche Mark	2,242	-	2,242	0.1
Euro Currency Unit	7,012	4,749	11,761	0.5
Ghana Cedi	1,871	308	2,179	0.1
Indian Rupee	3,192	-	3,192	0.1
Japanese Yen	50,390	1,458	51,848	2.4
Kenyan Shilling	2,149	-	2,149	0.1
Mexican Peso	36,421	-	36,421	1.7

South African Rand	4,814	192	5,006	0.2
Turkish Lira	5,094	-	5,094	0.2
Ugandan Shilling	1,919	-	1,919	0.1
Uruguayan Peso	3,759	-	3,759	0.2
Zambian Kwacha	-	311	311	0.0
Total	<u>\$ 150,190</u>	<u>\$ 8,374</u>	<u>\$ 158,564</u>	<u>7.2%</u>

This table excludes investments and cash held by the Pool that are denominated in U.S. dollars. The market value of the U.S. dollar denominated investments and cash is \$2,029,009. This represents approximately 93 percent of the value of the Pool's investments and cash.

NOTE 4. DERIVATIVE FINANCIAL INSTRUMENTS

Derivative financial instruments held in the Pool may include foreign exchange contracts, futures, options, credit default swaps, interest rate swaps, and currency swaps. None of these derivative financial instruments are designated as hedging instruments under ASC 815; they are used to implement portfolio strategy, capture valuation opportunities, and to exploit market inefficiencies. The primary risks managed by using these derivative financial instruments include interest rate, foreign exchange rate, and market price risks. See Note 2 for additional information on the Pool's purpose for entering into derivatives and for discussion on the risks associated with investing in these derivatives.

The Pool, through its investment managers, is a party to International Swap and Derivative Association, Inc. (ISDA) Master Agreements (MA) that may allow the netting of counterparty's obligations against those of the Pool in the event of a default by the counterparty. The Pool is required to disclose the positions held at year-end that were entered into pursuant to agreements that allow for such netting.

Total Return Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 4. DERIVATIVE FINANCIAL INSTRUMENTS (continued)

The table below presents the fair value of the derivative financial instruments recorded in the Statement of Assets and Liabilities as of June 30, 2016:

Assets	Interest Rate Contracts	Credit Contracts	Currency Contracts	Foreign Exchange Contracts	Total
Investments at fair value	\$ 849	\$ 343	\$ -	\$ -	\$ 1,192
Unrealized appreciation on swap contracts	143	252	442	-	837
Unrealized appreciation on futures contracts	5,597	-	-	-	5,597
Unrealized appreciation on foreign currency forward contracts	-	-	-	1,054	1,054
Total	<u>\$ 6,589</u>	<u>\$ 595</u>	<u>\$ 442</u>	<u>\$ 1,054</u>	<u>\$ 8,680</u>
Liabilities	Interest Rate Contracts	Credit Contracts	Currency Contracts	Foreign Exchange Contracts	Total
Options contracts written at fair value	\$ (142)	\$ (293)	\$ -	\$ -	\$ (435)
Unrealized depreciation on swap contracts	(17,920)	(280)	-	-	(18,200)
Unrealized depreciation on futures contracts	(7,013)	-	-	-	(7,013)
Unrealized depreciation on foreign currency forward contracts	-	-	-	(4,747)	(4,747)
Total	<u>\$ (25,075)</u>	<u>\$ (573)</u>	<u>\$ -</u>	<u>\$ (4,747)</u>	<u>\$ (30,395)</u>

At June 30, 2016, the Pool had pledged cash of \$34,940 to cover margin requirements on open derivative contracts and counterparties had deposited in segregated accounts securities with a value of \$642 in connections with open swap contracts.

For financial reporting purposes, the Pool does not offset derivative assets and derivative liabilities that are subject to netting arrangements in the Statement of Assets and Liabilities. The following table presents the Pool's derivative assets and liabilities net of amounts available for offset under a netting provision and net of related collateral pledged or received by the Pool as of June 30, 2016.

Derivative Type	Derivative Assets Subject to a MA	Derivatives Available for Offset	Non-Cash Collateral Received	Cash Collateral Received	Net Amount of Derivative Assets
Foreign currency forwards	\$ 77	\$ (44)	\$ -	\$ -	\$ 33
Swaps	511	(17)	(442)	-	52
Total	<u>\$ 588</u>	<u>\$ (61)</u>	<u>\$ (442)</u>	<u>\$ -</u>	<u>\$ 85</u>
Derivative Type	Derivative Liabilities Subject to a MA	Derivatives Available for Offset	Non-Cash Collateral Pledged	Cash Collateral Pledged	Net Amount of Derivative Liabilities
Foreign currency forwards	\$ (834)	\$ 44	\$ -	\$ 260	\$ (530)
Swaps	(17)	17	-	-	-
Total	<u>\$ (851)</u>	<u>\$ 61</u>	<u>\$ -</u>	<u>\$ 260</u>	<u>\$ (530)</u>

Total Return Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 4. DERIVATIVE FINANCIAL INSTRUMENTS (continued)

The table below presents the impact of the derivative financial instruments recorded in the Statement of Operations for the year ended June 30, 2016:

Realized Gain (Loss) From:	Interest Rate Contracts	Credit Contracts	Currency Contracts	Foreign Exchange Contracts	Total
Investments	\$ (9,490)	\$ (102)	\$ -	\$ -	\$ (9,592)
Futures contracts	(4,446)	-	-	-	(4,446)
Options written	5,278	559	-	-	5,837
Swap contracts	(1,870)	(2,204)	-	-	(4,074)
Foreign currency transactions	-	-	-	(5,438)	(5,438)
Total	<u>\$ (10,528)</u>	<u>\$ (1,747)</u>	<u>\$ -</u>	<u>\$ (5,438)</u>	<u>\$ (17,713)</u>

Net Change in Unrealized Appreciation (Depreciation) From:	Interest Rate Contracts	Credit Contracts	Currency Contracts	Foreign Exchange Contracts	Total
Investments	\$ (528)	\$ (112)	\$ -	\$ -	\$ (640)
Futures contracts	(3,949)	-	-	-	(3,949)
Options written	676	175	-	-	851
Swap contracts	(17,777)	(97)	(24)	-	(17,898)
Translation of assets and liabilities in foreign currency	-	-	4	(6,076)	(6,072)
Total	<u>\$ (21,578)</u>	<u>\$ (34)</u>	<u>\$ (20)</u>	<u>\$ (6,076)</u>	<u>\$ (27,708)</u>

The average volume of financial derivative activity for the year ended June 30, 2016, was as follows:

Average notional value of:	
Foreign currency forward contracts	\$ 123,994
Futures contracts	1,589,079
Option contracts	343,930
Option contracts written	259,335
Swap contracts	826,228

NOTE 5. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 5. FAIR VALUE MEASUREMENTS (continued)

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The table that follows sets forth information about the level within the fair value hierarchy at which the Pool's assets and liabilities are measured at June 30, 2016. All of the Pool's investments in other funds were valued using the net asset value per share practical expedient, as such they have not been categorized in the fair value hierarchy.

Assets	Level 1	Level 2	Level 3	Total
Bank loan	\$ -	\$ 936	\$ -	\$ 936
Corporate asset backed issues	-	36,980	-	36,980

NOTE 6. SECURITIES LENDING

The following table presents the amounts of various accounts related to securities lending at June 30, 2016.

	Fair Value
Securities on loan	\$ 207,311
Collateral received:	
Cash	\$ 100,663
Non-cash	111,325
Total collateral received	\$ 211,988

The Bank of New York Mellon (BNYM), as agent for the IMB, loans the IMB's securities to various counterparties. These transactions are executed under Master Securities Lending Agreements (MSLA) which permit BNYM under certain circumstances, such as defaults, to offset amounts payable to the same counterparty against amounts to be received and thus create one single net payment due to or from the counterparty. The amounts listed in the above table represent all securities loaned which are subject to a MSLA on a net payment basis. The IMB has elected not to offset the fair value of the securities on loan against the liability for the return of the collateral on the Statement of Assets and Liabilities.

NOTE 7. FUTURES CONTRACTS

At June 30, 2016, open positions in futures contracts denominated in U.S. dollars were as follows:

Expiration	Open Contracts	Position	Notional Value at June 30, 2016	Notional Value Upon Entering Contract	Unrealized Appreciation (Depreciation)
Sep 2016	2,092	US Treasury 5 Yr Note Future	\$ 255,567	\$ 251,778	\$ 3,789
Sep 2016	147	US Ultra Bond Future	27,397	25,683	1,714
Dec 2016	(300)	Euro 90 Day Future	(74,494)	(74,314)	(180)
Mar 2017	(1,190)	Euro 90 Day Future	(295,432)	(295,075)	(357)

NOTE 10. INVESTMENT ADVISORY FEES

The IMB has approved investment advisory agreements with DAC, FTI, and Western to manage the investments of the Pool. These agreements provide for quarterly payments, based on average end of month assets under management, to the investment advisors. The IMB makes these payments and the Pool transfers funds to the IMB to facilitate the payments.

The fees paid to DAC are based on a descending scale of fee rates ranging from 0.40 percent annually on the first \$10 million of assets under management to 0.12 percent annually on assets between \$125 million and \$700 million. For assets greater than \$700 million the fee rate is 0.10 percent annually. The effective fee rate earned by DAC for the year ended June 30, 2016, was 0.12 percent.

The fees paid to FTI are based on a descending scale of fee rates ranging from 0.70 percent annually on the first \$100 million of assets under management to 0.50 percent annually on assets between \$100 million and \$200 million. For assets greater than \$200 million the fee rate is 0.40 percent annually. The effective fee rate earned by FTI for the year ended June 30, 2016, was 0.62 percent.

The fees paid to Western are based on a descending scale of fee rates ranging from 0.40 percent annually on the first \$500 million of assets under management to 0.10 percent annually on assets between \$1.5 billion and \$2 billion. For assets greater than \$2 billion the fee rate is 0.05 percent annually. The maximum fee allowable under the agreement is 0.25 percent annually of the net assets under management. The effective fee rate earned by Western for the year ended June 30, 2016, was 0.25 percent.

NOTE 11. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance (a):

Net asset value at June 30, 2015	\$	14.53

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board Opportunistic Debt Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations, changes in net assets and cash flows for the period October 1, 2015 (inception date) to June 30, 2016, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board Opportunistic Debt Pool at June 30, 2016, and the results of its operations, changes in its net assets and its cash flows for the period October 1, 2015 (inception date) to June 30, 2016, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

Opportunistic Debt Pool

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The Opportunistic Debt Pool (Pool) began operations on October 1, 2015.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Opportunistic Debt Pool. They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool was established to hold the IMB's investments in middle market direct loans. Assets are managed by Angelo, Gordon & Co. and TCW Asset Management Company. The objective of the Pool is to generate a total net return of 7-9% over a normal market cycle (typically a 5-7 year period), and/or 250 basis points above the return of the Credit Suisse Leveraged Loan Index.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 4 for further discussion and presentation of the reporting requirements under ASC 820.

Opportunistic Debt Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value of the Pool's portfolio securities is determined as follows:

- Investments in direct lending funds are not securities for which market quotations are readily available. The IMB has concluded that the net asset value reported by the underlying funds approximates the fair value of these investments and consequently these investments are carried at net asset value as a practical expedient for fair market value. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds and, consequently, the fair value of the IMB's interests in the funds. Although a secondary market exists for these investments, it is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the reported net asset value. It is therefore reasonably possible that if the IMB were to sell these investments in the secondary market a buyer may require a discount to the reported net asset value, and the discount could be significant. The IMB believes that the net asset value of such investments is a reasonable estimate of fair value as of June 30, 2016.
- Open-end regulated investment companies are valued at the net asset value of the fund as reported by the fund's administrator.

Investments for which the fair value cannot be determined by one of the above listed processes are valued at fair value as determined in accordance with the IMB's established procedures.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on investments in direct lending funds are recognized when the fund has realized its interest in a portfolio holding and we have sufficient information as to the amount and date of the distribution. Gains and losses on the sale of investments in other funds are recognized at the time of sale by the average cost method.

Income from Direct Lending Funds - Income from direct lending funds is recognized when distributed.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool. In addition to these direct and allocated expenses, the Pool bears certain expenses indirectly, such as fees of other investment funds in which the Pool invests that are reflected in the reported net asset value of such funds.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

Opportunistic Debt Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The Pool is exposed to credit risk from investments in unrated direct lending funds. This risk is limited by requiring that underlying fund holdings are at least 90 percent collateralized by one or more assets of the issuer. The Pool also holds shares of a money market fund with the highest credit rating.

Concentration of Credit Risk

Due to being in the infancy stage of the program, the fund is exposed to concentration of credit risk. Approximately 32 percent of committed capital has been called. As the program becomes fully funded, the concentration of credit risk will be mitigated. Each asset manager is restricted from investing more than 10 percent of the capital commitment in a single issuer for investments that are expected to be held longer than one year. At June 30, 2016, the Pool was in compliance with this restriction.

Custodial Credit Risk

At June 30, 2016, the Pool held no securities that were subject to custodial credit risk.

Interest Rate Risk

The Pool is exposed to interest rate risk from investments in direct lending funds. The IMB manages interest rate risk of the Pool by requiring at least 80 percent of the fund holdings that mature in more than one year to have variable or floating interest rate structures.

Foreign Currency Risk

The investments in direct lending funds might be indirectly exposed to foreign currency risk.

NOTE 4. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities with redemption terms that are not short term.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Opportunistic Debt Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 4. FAIR VALUE MEASUREMENTS (continued)

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The table that follows sets forth information about the level within the fair value hierarchy at which the Pool's assets and liabilities are measured at June 30, 2016. All of the Pool's investments in direct lending funds were valued using the net asset value per share practical expedient, as such they have not been categorized in the fair value hierarchy table.

Assets	Level 1	Level 2	Level 3	Total
Money market mutual fund	\$ 100	\$ -	\$ -	\$ 100
Direct lending funds				114,158
Total				\$ 114,258

There were no transfers in or out of Levels 1 and 2 during the period ended June 30, 2016.

NOTE 5. COMMITMENTS

As of June 30, 2016, the IMB has made commitments to two direct lending funds.

Fund Classification	Total Commitment	Funded Commitment	Unfunded Commitment
Direct lending funds	\$ 350,000	\$ 113,111	\$ 236,889

NOTE 6. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance (a):

Net asset value at October 1, 2015 (inception date)	\$ 10.00
Income from investment operations:	
Net investment loss	(0.02)
Net unrealized gain on investment transactions	0.07
Total from investment operations	0.05
Net asset value at June 30, 2016	\$ 10.05

Total Return (b) 0.8%

Supplemental Data:

Ratio to average net assets (c):	
Expenses	0.35%
Net investment income	-0.26%
Portfolio turnover rate	0.00%

- (a) Calculation based on the average shares outstanding
- (b) Return data is net of fees from inception-to-date and is not annualized
- (c) All ratios are from inception-to-date annualized and do not reflect the Pool's proportionate share of income and expenses of the underlying investee funds.

NOTE 7. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool at June 30, 2016.

<u>Participant</u>	<u>Account Value</u>
Teachers' Retirement System	\$ 31,268
Public Employees' Retirement System	27,595
Workers' Compensation Old Fund	24,783
Revenue Shortfall Reserve Fund - Part B	7,195
Revenue Shortfall Reserve Fund	4,344
West Virginia Retiree Health Benefit Trust Fund	3,054
Coal Workers' Pneumoconiosis Fund	2,918
State Police Death, Disability and Retirement Fund	2,745
Public Employees Insurance Agency	2,374
West Virginia Department of Environmental Protection Agency	1,606
Board of Risk and Insurance Management	1,555
Deputy Sheriff's Retirement System	854
Judges' Retirement System	825
State Police Retirement System	689
Workers' Compensation Self-Insured Employer Security Risk Pool	643
West Virginia Prepaid Tuition Trust Fund	635
Workers' Compensation Self-Insured Employer Guaranty Risk Pool	398
Emergency Medical Services Retirement System	292
Wildlife Endowment Fund	274
Workers' Compensation Uninsured Employers' Fund	109
West Virginia Department of Environmental Protection Trust	39
Berkeley County Development Authority	30
Municipal Police Officers' and Firefighters' Retirement System	15
Municipal Policemen's or Firemen's Pension and Relief Funds	6
Total	<u>\$ 114,246</u>

NOTE 8. SUBSEQUENT EVENTS

The IMB has performed an evaluation of events subsequent to June 30, 2016, through October 5, 2016, the date the Pool's financial statements were available for issuance. The IMB has determined that there were no significant subsequent events which have not been recognized in the Pool's financial statements that require disclosure.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board Core Fixed Income Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board Core Fixed Income Pool at June 30, 2016, and the results of its operations and changes in its net assets for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

Core Fixed Income Pool

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Core Fixed Income Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The main objective of this Pool is to generate investment income, provide stability and diversification, but not at the expense of total return. JP Morgan Investment Advisors, Inc. (JPM) manages this Pool. This Pool's investment objective, net of external investment management fees, is to meet or exceed the Barclays Capital U.S. Aggregate Index.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 4 for further discussion and presentation of the reporting requirements under ASC 820.

Core Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value of the Pool's portfolio securities is determined as follows:

- Fixed income securities are valued according to prices furnished by independent pricing services to the Pool's custodian. These services determine the security prices by a number of methods including, but not limited to, dealer quotes, live market trading levels when available, live feeds of trade execution data, spreads over U.S. Treasury securities, and other models and formulae appropriate to the specific security type.
- Open-end regulated investment companies or other commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator.
- Repurchase agreements and time deposits are valued at amortized cost, provided such amount approximates fair value.

Investments for which the fair value cannot be determined by one of the above listed processes are valued at fair value as determined in accordance with the IMB's established procedures.

Repurchase Agreements - In connection with transactions in repurchase agreements, it is the IMB's policy that its designated custodian or mutual third party take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the IMB may be delayed or limited.

Security Loans - The IMB, through its lending agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for international and domestic securities is secured by collateral based on the market value of the securities loaned. The required collateral percentage varies based on the type of collateral received and the type of security loaned. For U.S. securities, the required percentage of cash collateral and non-cash collateral consisting of debt obligations and securities issued by the United States Government or its agencies or instrumentalities is at least 102 percent of the market value of the securities loaned plus accrued income. For international securities, the required collateral is at least 105 percent of the market value of the securities on loan unless the foreign securities loaned are denominated and payable in U.S. Dollars, then the collateral shall be at least 102 percent of the market value of the securities loaned. Cash collateral received is invested in repurchase agreements, money market mutual funds, and time deposits. Such investments, except for repurchase transactions, are made at the risk of the Pool and, as such, the Pool is liable for investment losses. The lending agent contractually indemnifies the IMB for any repurchase agreement investment losses. Investments made with cash are reported at fair value on the Statement of Assets and Liabilities. Securities loaned remain on the Statement of Assets and Liabilities and Schedule of Investments. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as net securities lending income. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations as a change in unrealized appreciation or depreciation on investments.

Asset-Backed Securities - The Pool invests in various asset-backed securities, mortgage-backed securities, and structured corporate debt. The securities are reported at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. The Pool invests in these securities to enhance yields on investments. Changes in market interest rates affect the cash flows of these securities and may result in changes in fair value. The overall return or yield on these securities depends on the changes in the interest and principal payment pattern and market value of the underlying assets.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method. Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security. The amortization of asset-backed securities considers the effect of prepayments on the life of the security. Historical prepayment speeds are obtained from market data vendors and are updated annually. The effect of changing prepayment assumptions is reflected in the Statement of Operations in the year of the change. Interest income also includes paydown gains and losses on mortgage-backed securities, collateralized mortgage obligations, and asset-backed securities.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The monthly net investment income is declared as a dividend on the last day of the month and distributed to the participants of the Pool on the first day of the following month. Distributions are paid in the form of reinvestments in the Pool and have been included in distributions to participants and reinvestment of distributions as presented on the Statement of Changes in Net Assets. The Pool does not routinely distribute dividends of net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

Core Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The IMB limits the exposure to credit risk in the Pool by maintaining at least an average rating of investment grade as defined by the Nationally Recognized Statistical Rating Organizations. The following table provides the weighted average credit ratings of the rated assets in the Pool as of June 30, 2016.

Investment Type	Moody's	S&P	Fair Value	Percent of Total Investments
Corporate asset backed issues	Aa	AA	\$ 71,452	6.7%
Corporate CMO	A	A	58,738	5.5
Corporate CMO interest-only	Ba	AAA	713	0.1
Corporate CMO principal-only	B	AA	200	0.0
Foreign asset backed issues	Aa	AA	1,793	0.2
Foreign corporate bonds	A	A	44,793	4.2
Foreign government bonds	Aa	A	7,252	0.7
Money market mutual funds	Aa	AAA	35,271	3.3
Municipal bonds	Aa	AA	9,782	0.9
Time deposits	P-1	A-1	13,097	1.2
U.S. corporate bonds	A	A	222,175	21.1
U.S. Government agency bonds	Aaa	AA	23,219	2.2
U.S. Government agency CMO	Aaa	AA	129,989	12.3
U.S. Government agency CMO interest-only	Aaa	AA	5,229	0.5
U.S. Government agency CMO principal-only	Aaa	AA	9,002	0.8
U.S. Government agency MBS	Aaa	AA	201,029	19.0
U.S. Treasury bonds	Aaa	AA	204,730	19.3
U.S. Treasury inflation protected security	Aaa	AA	431	0.0
Total rated investments			1,038,895	98.0
Common stock			21,270	2.0
Total investments			\$ 1,060,165	100.0%

This table includes investments received as collateral for repurchase agreements with a fair value of \$41,198 as compared to the amortized cost of the repurchase agreements of \$39,023.

Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one corporate name. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016, the Pool held no securities that were subject to custodial credit risk. Repurchase agreements, when held, are collateralized at 102 percent and the collateral is held in the name of the IMB. All remaining securities are held by the IMB's custodian in the name of the IMB.

Core Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

Interest Rate Risk

The IMB monitors interest rate risk of the Pool by evaluating the effective duration of the investments in the Pool. The following table provides the weighted average effective duration for the various asset types in the Pool as of June 30, 2016.

Investment Type	Fair Value	Effective Duration (years)
Corporate asset backed issues	\$ 71,452	2.1
Corporate CMO	58,738	2.5
Corporate CMO interest-only	713	(17.4)
Corporate CMO principal-only	200	4.2
Foreign asset backed issues	1,793	0.1
Foreign corporate bonds	44,399	5.7
Foreign government bonds	7,251	9.0
Money market mutual funds	35,271	N/A
Municipal bonds	9,782	14.4
Repurchase agreements	39,023	0.0
Time deposits	13,097	0.0
U.S. corporate bonds	220,665	6.3
U.S. Government agency bonds	22,805	3.8
U.S. Government agency CMO	129,989	3.0
U.S. Government agency CMO interest-only	5,229	5.9
U.S. Government agency CMO principal-only	9,002	7.2
U.S. Government agency MBS	187,410	4.4
U.S. Treasury bonds	200,740	8.5
U.S. Treasury inflation protected security	431	3.4
Total investments	<u>\$ 1,057,990</u>	<u>4.9</u>

The Pool invests in commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. The cash flows from these securities are based on the payment of the underlying collateral. The effective duration and yield to maturity of these securities are dependent on estimated prepayment assumptions that consider historical experience, market conditions and other criteria. Actual prepayments may vary with changes in interest rates. Rising interest rates often result in a slower rate of prepayments while declining rates tend to lead to faster prepayments. As a result, the fair values of these securities are highly sensitive to interest rate changes. At June 30, 2016, the Pool held \$464,526 of these securities. This represents approximately 44 percent of the value of the Pool's securities.

Foreign Currency Risk

None of the securities held by the Pool are exposed to foreign currency risk.

Core Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 4. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2016:

Assets	Level 1	Level 2	Level 3	Total
Corporate asset backed issues	\$ -	\$ 71,452	\$ -	\$ 71,452
Corporate CMO	-	58,738	-	58,738
Corporate CMO interest - only	-	713	-	713
Corporate CMO principal - only	-	200	-	200
Foreign asset backed issues	-	1,793	-	1,793
Foreign corporate bonds	-	44,399	-	44,399
Foreign government bonds	-	7,251	-	7,251
Investments made with cash collateral for securities loaned	13,705	52,120	-	65,825
Money market mutual fund	21,566	-	-	21,566
Municipal bonds	-	9,782	-	9,782
U.S. corporate bonds	-	220,665	-	220,665
U.S. Government agency bonds	-	22,805	-	22,805
U.S. Government agency CMO	-	129,989	-	129,989
U.S. Government agency CMO interest-only	-	5,229	-	5,229
U.S. Government agency CMO principal-only	-	9,002	-	9,002
U.S. Government agency MBS	-	187,410	-	187,410
U.S. Treasury bonds	-	200,740	-	200,740
U.S. Treasury inflation protected security	-	431	-	431
Total	<u>\$ 35,271</u>	<u>\$ 1,022,719</u>	<u>\$ -</u>	<u>\$ 1,057,990</u>

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2016.

Core Fixed Income Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 5. SECURITIES LENDING

The following table presents the amounts of various accounts related to securities lending at June 30, 2016.

	Fair Value
Securities on loan	\$ 74,364
Collateral received:	
Cash	\$ 65,825
Non-cash	10,251
Total collateral received	<u>\$ 76,076</u>

The Bank of New York Mellon (BNYM), as agent for the IMB, loans the IMB's securities to various counterparties. These transactions are executed under Master Securities Lending Agreements (MSLA) which permit BNYM under certain circumstances, such as defaults, to offset amounts payable to the same counterparty against amounts to be received and thus create one single net payment due to or from the counterparty. The amounts listed in the above table represent all securities loaned which are subject to a MSLA on a net payment basis. The IMB has elected not to offset the fair value of the securities on loan against the liability for the return of the collateral on the Statement of Assets and Liabilities.

NOTE 6. INVESTMENT ADVISORY FEES

The IMB has approved an investment advisory agreement with JPM to manage the investments of the Pool. This agreement provides for quarterly payments, based on average end of month assets under management, to the investment advisor. The IMB makes these payments and the Pool transfers funds to the IMB to facilitate the payments.

The fees paid to JPM consist of a base fee of 0.075 percent annually of the net assets under management and a performance incentive fee that is earned when the actual investment return exceeds the return of the Barclays Capital US Aggregate index over rolling three-year periods. The maximum fee allowable under the agreement is 0.15 percent annually of the net assets under management. The effective fee rate earned by JPM for the year ended June 30, 2016, was 0.14 percent.

NOTE 7. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance (a):	
Net asset value at June 30, 2015	\$ 11.08

Wildlife Endowment Fund	2,327
Workers' Compensation Uninsured Employers' Fund	913
West Virginia Department of Environmental Protection Trust	333
Berkeley County Development Authority	252
Municipal Police Officers' and Firefighters' Retirement System	135
Municipal Policemen's or Firemen's Pension and Relief Funds	54
Total	<u>\$ 993,047</u>

NOTE 9. SUBSEQUENT EVENTS

The IMB has performed an evaluation of events subsequent to June 30, 2016, through September 9, 2016, the date the Pool's financial statements were available for issuance. The IMB has determined that there were no significant subsequent events which have not been recognized in the Pool's financial statements that require disclosure.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board TIPS Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board TIPS Pool at June 30, 2016, and the results of its operations and changes in its net assets for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's TIPS Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool invests in Treasury Inflation-Protected Securities (TIPS) and its objective is to match the performance of the Barclay's Capital U.S. TIPS Bond Index on an annualized basis over rolling three-year to five-year periods, gross of fees. Assets are managed by State Street Global Advisors (SSgA).

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 4 for further discussion and presentation of the reporting requirements under ASC 820.

TIPS Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value of the Pool's portfolio securities is determined as follows:

- Fixed income securities are valued according to prices furnished by independent pricing services to the Pool's custodian. These services determine the security prices primarily by dealer quotes.
- Open-end regulated investment companies or other commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator.

Investments for which the fair value cannot be determined by one of the above listed processes are valued at fair value as determined in accordance with the IMB's established procedures.

Security Loans - The IMB, through its lending agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by cash collateral and non-cash collateral consisting of debt obligations and securities issued by the United States Government or its agencies or instrumentalities of at least 102 percent of the market value of the securities loaned plus accrued income. Cash collateral received, if any, is invested in repurchase agreements, money market mutual funds, and time deposits. Such investments, except for repurchase transactions, are made at the risk of the Pool and, as such, the Pool is liable for investment losses. The lending agent contractually indemnifies the IMB for any repurchase agreement investment losses. Investments made with cash are reported at fair value on the Statement of Assets and Liabilities. Securities loaned remain on the Statement of Assets and Liabilities and Schedule of Investments. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as net securities lending income. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations as a change in unrealized appreciation or depreciation on investments.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method. Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security. For TIPS, the principal amount is adjusted monthly to keep pace with inflation. Interest is accrued based on the adjusted principal amount. The adjustments to principal due to inflation are reflected as increases or decreases to interest income.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

TIPS Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The IMB limits the exposure to credit risk in the Pool by primarily investing in U.S. Treasury inflation protected securities. The following table provides the weighted average credit ratings of the rated assets in the Pool as of June 30, 2016.

Investment Type	Moody's	S&P	Fair Value	Percent of Total Investments
Money market mutual fund	Aaa	AAA	\$ 127	0.0%
U.S. Treasury inflation-protected securities	Aaa	AA	374,622	100.0
Total investments			<u>\$ 374,749</u>	<u>100.0%</u>

Concentration of Credit Risk

The Pool is restricted from investing more than 5 percent of the value of the Pool in any one corporate name. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016, the Pool held no securities that were subject to custodial credit risk. All securities are held by the IMB's custodian in the name of the IMB.

Interest Rate Risk

The IMB monitors interest rate risk of the Pool by evaluating the real modified duration of the investments in the Pool. The following table provides the weighted average real modified duration for the applicable asset types in the Pool as of June 30, 2016.

Investment Type	Fair Value	Real Modified Duration (years)
Money market mutual fund	\$ 127	N/A
U.S. Treasury inflation-protected securities	374,622	7.9
Total investments	<u>\$ 374,749</u>	<u>7.9</u>

Foreign Currency Risk

None of the securities held by the Pool are exposed to foreign currency risk.

TIPS Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 4. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

The table below summarizes the valuation of the investment securities in accordance with ASC 820 fair value hierarchy levels as of June 30, 2016:

Assets	Level 1	Level 2	Level 3	Total
Money market mutual fund	\$ 127	\$ -	\$ -	\$ 127
U.S. Treasury inflation-protected securities	-	374,622	-	374,622
Total	\$ 127	\$ 374,622	\$ -	\$ 374,749

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2016.

NOTE 5. SECURITIES LENDING

The following table presents the amounts of various accounts related to securities lending at June 30, 2016.

	Fair Value
Securities on loan	\$ 53,761
Collateral received:	
Cash	\$ -
Non-cash	54,862
Total collateral received	\$ 54,862

The Bank of New York Mellon (BNYM), as agent for the IMB, loans the IMB's securities to various counterparties. These transactions are executed under Master Securities Lending Agreements (MSLA) which permit BNYM under certain circumstances, such as defaults, to offset amounts payable to the same counterparty against amounts to be received and thus create one single net payment due to or from the counterparty. The amounts listed in the above table represent all securities loaned which are subject to a MSLA on a net payment basis. The IMB has elected not to offset the fair value of the securities on loan against the liability for the return of the collateral on the Statement of Assets and Liabilities.

TIPS Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 6. INVESTMENT ADVISORY FEES

The IMB has approved an investment advisory agreement with SSgA to manage the investments of the Pool. This agreement provides for quarterly payments, based on average end of month assets under management, to the investment advisor. The IMB makes these payments and the Pool transfers funds to the IMB to facilitate the payments.

The fees paid to SSgA include a base fee of 0.03 percent annually on the first \$200 million of net assets under management and a base fee of 0.02 percent annually on the assets over \$200 million. The effective fee rate earned by SSgA for the year ended June 30, 2016, was 0.02 percent.

NOTE 7. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance (a):

Net asset value at June 30, 2015	\$	10.79
Income from investment operations:		
Net investment income		0.13
Net realized and unrealized gain on investment transactions		0.33
Total from investment operations		0.46
Net asset value at June 30, 2016	\$	11.25

Total Return (b) 4.3%

Supplemental Data:

Ratio to average net assets (c):		
Expenses		0.06%
Net investment income		1.18%
Portfolio turnover rate		20.98%

(a) Calculation based on the average shares outstanding

(b) Return data is net of fees for the full fiscal year

(c) All ratios are for the fiscal year

NOTE 8. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool at June 30, 2016.

<u>Participant</u>	<u>Account Value</u>
Workers' Compensation Old Fund	\$ 132,676
Revenue Shortfall Reserve Fund	130,548
Revenue Shortfall Reserve Fund - Part B	59,019
Coal Workers' Pneumoconiosis Fund	25,066
Public Employees Insurance Agency	17,854
Board of Risk and Insurance Management	13,368
Workers' Compensation Self-Insured Employer Security Risk Pool	5,523
Workers' Compensation Self-Insured Employer Guaranty Risk Pool	3,423
Workers' Compensation Uninsured Employers' Fund	1,096
Total	\$ 388,573

Notes to Financial Statements
(Amounts in thousands, except share data)

NOTE 9. SUBSEQUENT EVENTS

The IMB has performed an evaluation of events subsequent to June 30, 2016, through September 9, 2016, the date the Pool's financial statements were available for issuance. The IMB has determined that there were no significant subsequent events which have not been recognized in the Pool's financial statements that require disclosure.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board TRS Annuity Pool, which comprise the statement of assets and liabilities as of June 30, 2016, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board TRS Annuity Pool at June 30, 2016, and the results of its operations and changes in its net assets for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

TRS Annuity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the TRS Annuity Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool held an investment contract issued by the Variable Annuity Life Insurance Company (VALIC) strictly for the benefit of the Teachers' Retirement System (TRS). On December 10, 2008, the IMB assumed responsibility for this investment as part of the restructuring of the Teachers' Defined Contribution (TDC) plan, a separate retirement plan administered solely by the Consolidated Public Retirement System, whereby certain TDC participants elected to transfer the ownership of their individual TDC retirement accounts to the TRS in exchange for current participation in the TRS defined benefit plan. The final amount transferred under the contract was \$248,293.

The IMB initially requested the immediate redemption of the entire balance but VALIC denied the request, claiming the amounts were subject to withdrawal restrictions. Effective April 23, 2009, the IMB, while reserving its rights under the contract, executed the appropriate forms with VALIC to elect to withdraw funds under the Five Year Equal Annual Installment method. By making this election the guaranteed minimum annual yield of 4.5 percent became the fixed rate for this contract. The first four withdrawals of \$55,058 each occurred on May 4, 2009, 2010, 2011 and 2012. The final withdraw of \$55,191 occurred on May 8, 2013. On that date, all remaining income, net of all management fees, was distributed to TRS and all units of ownership in the Pool were redeemed.

TRS Annuity Pool

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY (continued)

In response to VALIC's denial to allow the IMB to liquidate the contract in its entirety, the IMB sued VALIC and the litigation is ongoing. The case is presently set for trial in September, 2016. The outcome of the litigation is unknown and accordingly the IMB has not accrued any potential revenues from the case. There are ongoing legal fees associated with this litigation and these expenses are accrued to the Pool. The funding for the payment of these expenses results from contributions by the TRS into the TRS Annuity Pool. No other management fees are charged to the Pool and none have been charged since the final withdrawal on May 8, 2013. Amounts recovered pursuant to the litigation, if any, will be recorded in the TRS Annuity Pool and distributed to the TRS. Once the case is resolved the TRS Annuity Pool will be closed.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The investment contract held by this Pool was the sole investment of the Pool and it was fully redeemed on May 8, 2013. However, the Pool is to be kept open so that all on-going expenses associated with the investment contract can be properly reported and charged to the TRS.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or net realized gains.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

NOTE 3. SUBSEQUENT EVENTS

The IMB has performed an evaluation of events subsequent to June 30, 2016, through September 9, 2016, the date the Pool's financial statements were available for issuance. The IMB has determined that there were no significant subsequent events which have not been recognized in the Pool's financial statements that require disclosure.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board Private Equity Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations, changes in net assets and cash flows for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board Private Equity Pool at June 30, 2016, and the results of its operations, changes in its net assets and its cash flows for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

Private Equity Pool

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Private Equity Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool holds investments in private equity funds, a hedge fund, and a commingled investment fund. Franklin Park Associates, LLC has been retained by the IMB to provide consulting services for the private equity funds. The hedge fund is managed by Bridgewater Associates, LP and the commingled investment fund is managed by State Street Global Advisors.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 4 for further discussion and presentation of the reporting requirements under ASC 820.

Private Equity Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value of the Pool's portfolio investments is determined as follows:

- Investments in private equity partnerships and other private funds are not securities for which market quotations are readily available. The IMB has concluded that the net asset value reported by the general partners or fund administrators approximates the fair value of these investments and consequently these investments are carried at net asset value as a practical expedient for fair market value. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds and, consequently, the fair value of the IMB's interests in the funds. Although a secondary market exists for these investments, it is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the reported net asset value. It is therefore reasonably possible that if the IMB were to sell these investments in the secondary market a buyer may require a discount to the reported net asset value, and the discount could be significant. The IMB believes that the net asset value of such investments is a reasonable estimate of fair value as of June 30, 2016.
- Open-end regulated investment companies or other commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator.

Investments for which the fair value cannot be determined by one of the above listed processes are valued at fair value as determined in accordance with the IMB's established procedures.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on investments in partnerships are recognized when the partnership has realized its interest in a portfolio company and we have sufficient information as to the amount and date of the distribution. Gains and losses on the sale of other investments are recognized at the time of sale by the average cost method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Income from Partnerships - Income from private equity partnerships and other private funds is recognized when distributed to the partners.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. Direct investment-related costs include fees charged by external managers that are outside of their respective private equity partnership or other private fund, the custodian bank, legal counsel, and the consultant. Other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool. In addition to these direct and allocated expenses, the Pool bears certain expenses indirectly, such as fees of other investment funds in which the Pool invests that are reflected in the reported net asset value of such funds.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

Private Equity Pool

Notes to Financial Statements

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

NOTE 3. INVESTMENT RISK DISCLOSURES

The Pool holds limited partnerships, shares of a hedge fund, a commingled investment fund, and a money market fund with the highest credit rating. The investments in limited partnerships and the hedge fund might be indirectly exposed to foreign currency risk, credit risk, interest rate risk, and/or custodial credit risk. The commingled investment fund is held in an account in the name of the IMB. The Pool is restricted from investing more than 10 percent of the IMB's total private equity exposure in a single fund. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

NOTE 4. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities with redemption terms that are not short term.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The table that follows sets forth information about the level within the fair value hierarchy at which the Pool's assets and liabilities are measured at June 30, 2016. All of the Pool's investments in private equity partnerships and its investment in a multiple strategy hedge fund were valued using the net asset value per share practical expedient, as such they have not been categorized in the fair value hierarchy table.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board Real Estate Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations, changes in net assets and cash flows for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board Real Estate Pool at June 30, 2016, and the results of its operations, changes in its net assets and its cash flows for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

Real Estate Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Real Estate Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool holds the IMB's investments in real estate investment trusts (REITs) and real estate limited partnerships and funds. Courtland Partners, Ltd. has been retained by the IMB to provide consulting services for the real estate limited partnerships and funds. The REITs are managed by CBRE Clarion Securities, LLC (CBRE) and Security Capital Research & Management Inc. (SCRM).

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 4 for further discussion and presentation of the reporting requirements under ASC 820.

Real Estate Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value of the Pool's portfolio securities is determined as follows:

- Investments in real estate limited partnerships and funds are not securities for which market quotations are readily available. The IMB has concluded that the net asset value reported by the general partners or fund administrators approximates the fair value of these investments and consequently these investments are carried at net asset value as a practical expedient for fair market value. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds and, consequently, the fair value of the IMB's interests in the funds. Although a secondary market exists for these investments, it is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the reported net asset value. It is therefore reasonably possible that if the IMB were to sell these investments in the secondary market a buyer may require a discount to the reported net asset value, and the discount could be significant. The IMB believes that the net asset value of such investments is a reasonable estimate of fair value as of June 30, 2016.
- Equity securities are valued at the last sale price or official closing price reported in the market in which they are primarily traded.
- Equity securities that trade in non-U.S. markets are valued in U.S. Dollars using period end spot market exchange rates as supplied by the Pool's custodian.
- Fixed income securities are valued according to prices furnished by independent pricing services to the Pool's custodian. These services determine the security prices by a number of methods including, but not limited to, dealer quotes, live market trading levels when available, live feeds of trade execution data, spreads over U.S. Treasury securities, and other models and formulae appropriate to the specific security type.
- Open-end regulated investment companies or other commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator.
- Repurchase agreements and time deposits are valued at amortized cost, provided such amount approximates fair value.

Investments for which the fair value cannot be determined by one of the above listed processes are valued at fair value as determined in accordance with the IMB's established procedures.

Repurchase Agreements - In connection with transactions in repurchase agreements, it is the IMB's policy that its designated custodian or mutual third party take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the IMB may be delayed or limited.

Security Loans - The IMB, through its lending agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for international and domestic securities is secured by collateral based on the market value of the securities loaned. The required collateral percentage varies based on the type of collateral received and the type of security loaned. For U.S. securities, the required percentage of cash collateral and non-cash collateral consisting of debt obligations and securities issued by the United States Government or its agencies or instrumentalities is at least 102 percent of the market value of the securities loaned plus accrued income, if applicable. For international securities, the required percentage is 105 percent unless the foreign securities loaned are denominated and payable in U.S. Dollars, then the collateral shall be at least 102 percent of the market value of the securities loaned. Loans of equity securities may also be collateralized by equity securities and the required percentage of non-cash collateral consisting of equity securities is at least 107 percent of the market value of the securities loaned. Cash collateral received is invested in repurchase agreements, money market mutual funds, and time deposits. Such investments, except for repurchase transactions, are made at the risk of the Pool and, as such, the Pool is liable for investment losses. The lending agent contractually indemnifies the IMB for any repurchase agreement investment losses. Investments made with cash are reported at fair value on the Statement of Assets and Liabilities. Securities loaned remain on the Statement of Assets and Liabilities and Schedule of Investments. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its

Real Estate Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

services. The income earned by the IMB is reported in the Statement of Operations as net securities lending income. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations as a change in unrealized appreciation or depreciation on investments.

Foreign Currency - Amounts denominated in or expected to settle in foreign currencies are translated into U.S. dollars at exchange rates reported by the Bank of New York Mellon on the following basis:

- Market value of investment securities, other assets and liabilities - at the closing rate of exchange at the valuation date.
- Purchases and sales of investment securities, income and expenses - at the rate of exchange prevailing on the respective dates of such transactions.

The IMB isolates that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from market prices of securities held.

Reported net realized foreign exchange gains and losses arise from sales of portfolio securities, sales and maturities of short-term securities, sales of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities including investments in securities at month end, resulting from changes in the exchange rate.

Foreign Currency Contracts - A foreign currency contract is an agreement between two parties to exchange different currencies at a specified exchange rate at an agreed upon future date. The managers, as listed in Note 1, enter into such contracts to correspond to investment transactions trading in foreign currencies. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. These contracts have relatively short durations and are valued at the prevailing market exchange rates at month end. An unrealized gain or loss is recorded as the difference between the amount valued at month end and the amount to be received or paid at the settlement date. The unrealized gain or loss is reclassified to realized gain or loss when the contract settles.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on investments in real estate funds are recognized when the real estate fund has realized its interest in a portfolio holding and we have sufficient information as to the amount and date of the distribution. Gains and losses on the sale of other investments are recognized at the time of sale by the average cost method.

Interest Income - Interest income is recognized as earned on the accrual method. Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Income from Partnerships - Income from real estate partnerships is recognized when distributed to the partners.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or net realized gains.

(Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. Direct investment-related costs include fees charged by external managers that are outside of their respective real estate partnership, the custodian bank, legal counsel, and the consultant. Other expenses are allocated to the individual pools based on asset size.

The IMB pays all expenses on behalf of the Pool. In addition to these direct and allocated expenses, the Pool bears certain expenses indirectly, such as fees of other investment funds in which the Pool invests that are reflected in the reported net asset value of such funds.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

In certain foreign countries the Pool's dividend income and capital gains may be taxable. Such taxes are generally withheld from the payments of these types of income and as a result there is no provision recorded for these taxes. In certain cases there may be a full or partial reclaim available for the withheld taxes. The outstanding reclaims are reported on the Statement of Assets and Liabilities. Dividend income is reported net of withheld taxes on the Statement of Operations.

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

NOTE 3. INVESTMENT RISK DISCLOSURES

Credit Risk

The IMB limits the exposure to credit risk in the Pool by maintaining at least an average rating of investment grade as defined by the Nationally Recognized Statistical Rating Organizations. The following table provides the weighted average credit ratings of the rated assets in the Pool as of June 30, 2016.

Investment Type	Moody's	S&P	Fair Value	Percent of Total Investments
Foreign corporate bonds	A	A	\$ 198	0.0%
Foreign government bonds	Aa	A	1	0.0
Money market mutual funds	Aaa	AAA	70,652	4.6
Time deposits	P-1	A-1	6,614	0.4
U.S. corporate bonds	Baa	BBB	8,850	0.6
U.S. Government agency bonds	Aaa	AA	209	0.0
U.S. Government agency MBS	Aaa	AA	6,878	0.4
U.S. preferred stock	Baa	BB	12,767	0.8
U.S. Treasury bonds	Aaa	AA	2,013	0.1
Total rated investments			108,182	6.9
Common stock			119,757	7.8
Real estate limited partnerships and funds			1,314,563	85.3
Total investments			\$ 1,542,502	100.0%

This table includes investments received as collateral for repurchase agreements with a fair value of \$20,809 as compared to the amortized cost of the repurchase agreements of \$19,708.

Real Estate Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES (continued)

Concentration of Credit Risk

The Pool's investments in real estate limited partnerships and funds might be indirectly exposed to concentration of credit risk.

Custodial Credit Risk

At June 30, 2016, the Pool held no securities that were directly subject to custodial credit risk. Repurchase agreements, when held, are collateralized to a minimum of 102 percent and the collateral is held in the name of the IMB. All remaining securities, except for the investments in real estate limited partnerships and funds, are held by the IMB's custodian in the name of the IMB. The investments in real estate limited partnerships and funds might be indirectly exposed to custodial credit risk.

Interest Rate Risk

The IMB monitors interest rate risk of the Pool by evaluating the effective duration of the investments in the Pool. The following table provides the weighted average effective duration for the various asset types in the Pool as of June 30, 2016.

Investment Type	Fair Value	Effective Duration (years)
Common stock	\$ 109,014	N/A
Money market mutual funds	70,652	N/A
Real estate limited partnerships and funds	1,314,563	N/A
Repurchase agreements	19,708	0.0
Time deposits	6,614	0.0
U.S. corporate bonds	8,083	2.5
U.S. preferred stock	12,767	2.2
Total	\$ 1,541,401	1.0

Investments in real estate limited partnerships and funds and common stocks do not have an effective duration.

Foreign Currency Risk

The Pool has real estate investment trusts and real estate limited partnerships and funds that are denominated in foreign currencies and are exposed to foreign currency risks. The amounts at fair value (in U.S. dollars) of investments denominated in foreign currencies as of June 30, 2016, are as follows:

Currency	Investments	Percent of Total Investments
Australian Dollar	\$ 4,949	0.3%
British Pound	3,641	0.2
Canadian Dollar	2,288	0.1
Euro Currency Unit	60,042	3.9
Hong Kong Dollar	4,331	0.3
Japanese Yen	9,529	0.6
Swedish Krona	381	0.0
Total	\$ 85,161	5.4%

This table excludes investments held by the Pool that are denominated in U.S. dollars. The market value of the U.S. dollar denominated investments is \$1,456,240. This represents approximately 95 percent of the value of the Pool's investments.

Real Estate Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 4. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities with redemption terms that are not short term.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The table that follows sets forth information about the level within the fair value hierarchy at which the Pool's assets and liabilities are measured at June 30, 2016. All of the Pool's investments in real estate limited partnerships and funds were valued using the net asset value per share practical expedient, as such they have not been categorized in the fair value hierarchy table.

Assets	Level 1	Level 2	Level 3	Total
Common stock	\$ 109,014	\$ -	\$ -	\$ 109,014
Investments made with cash collateral for securities loaned	6,922	26,322	-	33,244
Money market mutual fund	63,730	-	-	63,730
U.S. corporate bonds	-	8,083	-	8,083
U.S. preferred stock	12,767	-	-	12,767
Total	\$ 192,433	\$ 34,405	\$ -	\$ 226,838
Real estate limited partnerships and funds				1,314,563
Total				\$ 1,541,401

There were no transfers in or out of Levels 1, 2, and 3 during the year ended June 30, 2016.

Real Estate Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 5. SECURITIES LENDING

The following table presents the amounts of various accounts related to securities lending at June 30, 2016.

	Fair Value
Securities on loan	\$ 38,762
Collateral received:	
Cash	\$ 33,244
Non-cash	7,145
Total collateral received	\$ 40,389

The Bank of New York Mellon (BNYM), as agent for the IMB, loans the IMB's securities to various counterparties. These transactions are executed under Master Securities Lending Agreements (MSLA) which permit BNYM under certain circumstances, such as defaults, to offset amounts payable to the same counterparty against amounts to be received and thus create one single net payment due to or from the counterparty. The amounts listed in the above table represent all securities loaned which are subject to a MSLA on a net payment basis. The IMB has elected not to offset the fair value of the securities on loan against the liability for the return of the collateral on the Statement of Assets and Liabilities.

NOTE 6. COMMITMENTS

As of June 30, 2016, the IMB has made commitments to forty-three real estate limited partnerships and funds.

Partnership Classification	Total Commitment	Funded Commitment	Unfunded Commitment
Core funds	\$ 605,000	\$ 550,206	\$ 54,794
Opportunistic funds	542,409	254,448	287,961
Value funds	689,000	368,521	320,479
Total	\$ 1,836,409	\$ 1,173,175	\$ 663,234

NOTE 7. FOREIGN CURRENCY CONTRACTS

At June 30, 2016, open foreign currency contracts are as follows:

Position	Foreign Currency	Trade Date	Settlement Date	Receivable		Payable		Unrealized Appreciation (Depreciation)
				(in foreign currency)	(in U. S. dollars)	(in foreign currency)	(in U. S. dollars)	
Long	Australian Dollar	6/30/2016	7/1/2016	242	\$ 180	\$ 180	-	
Short	British Pound	6/29/2016	7/1/2016		221	165	-	
Short	British Pound	6/30/2016	7/5/2016		133	100	-	
					\$ 534	\$ 534	\$ -	

NOTE 8. INVESTMENT ADVISORY FEES

The IMB has approved investment advisory agreements with CBRE and SCRMM to manage the publicly traded real estate investment trusts of the Pool. These agreements provide for quarterly payments, based on average end of month assets under management, to the investment advisors. The IMB makes these payments and the Pool transfers funds to the IMB to facilitate the payments.

The fees paid to CBRE are based on a descending scale of fee rates ranging from 0.65 percent annually on the first \$50 million of assets under management to 0.55 percent annually on assets between \$50 million and \$100 million. For assets greater than \$100 million, the fee rate is 0.45 percent annually. The effective fee rate earned by CBRE for the year ended June 30, 2016, was 0.62 percent.

Real Estate Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 8. INVESTMENT ADVISORY FEES (continued)

From July 1, 2015, to February 29, 2016, the fees paid to SCRM were based on a descending scale of fee rates ranging from 0.75 percent annually on the first \$50 million of assets under management to 0.65 percent annually on assets between \$50 million and \$100 million. For assets greater than \$100 million the fee rate was 0.60 percent annually. Effective March 1, 2016, the fees paid to SCRM are based on a descending scale of fee rates ranging from 1.00 percent annually on the first \$10 million of assets under management to 0.55 percent annually on assets between \$100 million and \$125 million. For assets greater than \$125 million the fee rate is 0.50 percent annually. The effective fee rate earned by SCRM for the year ended June 30, 2016, was 0.70 percent.

NOTE 9. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance (a):

Net asset value at June 30, 2015	\$	13.00
Income from investment operations:		
Net investment income		0.49
Net realized and unrealized gain on investment and foreign currency transactions		0.90
Total from investment operations		<u>1.39</u>
Net asset value at June 30, 2016	\$	<u>14.39</u>

Total Return (b) 10.8%

Supplemental Data:

Ratio to average net assets (c):		
Expenses		0.40%
Net investment income		3.62%
Portfolio turnover rate		23.57%

- (a) Calculation based on the average shares outstanding
- (b) Return data is net of fees for the full fiscal year
- (c) All ratios are for the fiscal year and do not reflect the Pool's proportionate share of income and expenses of the underlying investee funds.

NOTE 10. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool at June 30, 2016.

<u>Participant</u>	<u>Account Value</u>
Teachers' Retirement System	\$ 713,179
Public Employees' Retirement System	610,902
West Virginia Retiree Health Benefit Trust Fund	64,582
State Police Death, Disability and Retirement Fund	63,514
Deputy Sheriff's Retirement System	18,288
Judges' Retirement System	17,323
State Police Retirement System	14,145
Emergency Medical Services Retirement System	6,096
Wildlife Endowment Fund	5,819
Berkeley County Development Authority	656
Municipal Police Officers' and Firefighters' Retirement System	305
Municipal Policemen's or Firemen's Pension and Relief Funds	137
Total	<u>\$ 1,514,946</u>

NOTE 11. SUBSEQUENT EVENTS

The IMB has performed an evaluation of events subsequent to June 30, 2016, through October 5, 2016, the date the Pool's financial statements were available for issuance. The IMB has determined that there were no significant subsequent events which have not been recognized in the Pool's financial statements that require disclosure.

Report of Independent Auditors

To the Board of Trustees
The West Virginia Investment Management Board

We have audited the accompanying financial statements of The West Virginia Investment Management Board Hedge Fund Pool, which comprise the statement of assets and liabilities, including the schedule of investments, as of June 30, 2016, and the related statements of operations and changes in net assets for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of The West Virginia Investment Management Board Hedge Fund Pool at June 30, 2016, and the results of its operations and changes in its net assets for the year then ended, in conformity with U.S. generally accepted accounting principles, as described in Note 1.

Basis of Accounting

As more fully described in Note 1, these financial statements were prepared in conformity with U.S. generally accepted accounting principles established by the Financial Accounting Standards Board, which is a basis of accounting other than generally accepted accounting principles for state and local governments established by the Government Accounting Standards Board. Our opinion is not modified with respect to this matter.

Hedge Fund Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public body corporate created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB's Hedge Fund Pool (Pool). They do not reflect activity of the other investment pools under the control of the IMB or the Administrative Fund of the IMB, or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

The Pool is considered an investment company under U.S. Generally Accepted Accounting Principles (GAAP) and follows the accounting and reporting guidance applicable to investment companies as defined by the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 946 – Financial Services – Investment Companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool was established to hold the IMB's investments in hedge funds. Albourne America, LLC has been retained by the IMB to provide consulting services for this investment strategy.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Investment Valuation - The IMB reports its investments at fair value in accordance with the FASB's ASC Topic 820 (ASC 820). Refer to Note 4 for further discussion and presentation of the reporting requirements under ASC 820.

Hedge Fund Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair value of the Pool's portfolio securities is determined as follows:

- Investments in hedge funds are not securities for which market quotations are readily available. The IMB has concluded that the net asset value reported by the underlying funds approximates the fair value of these investments and consequently these investments are carried at net asset value as a practical expedient for fair market value. These investments are redeemable with the fund at net asset value under the original terms of the agreements and operations of the underlying fund. However, it is possible that these redemption rights may be restricted or eliminated by the funds in the future in accordance with the underlying fund agreements. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds and, consequently, the fair value of the IMB's interests in the funds. Although a secondary market exists for these investments, it is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the reported net asset value. It is therefore reasonably possible that if the IMB were to sell these investments in the secondary market a buyer may require a discount to the reported net asset value, and the discount could be significant. The IMB believes that the net asset value of such investments is a reasonable estimate of fair value as of June 30, 2016.
- Open-end regulated investment companies or other commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator.

Investments for which the fair value cannot be determined by one of the above listed processes are valued at fair value as determined in accordance with the IMB's established procedures.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investments in other funds are recognized at the time of sale by the average cost method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or net realized gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool. In addition to these direct and allocated expenses, the Pool bears certain expenses indirectly, such as fees of other investment funds in which the Pool invests that are reflected in the reported net asset value of such funds.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from U.S. federal and state taxation. In accordance with FASB ASC 740 Income Taxes, the IMB has considered and assessed the impact of uncertain tax positions and determined that it has no such positions and therefore there is no impact on the Pool's financial statements. Accordingly, no provision for income taxes is required as of June 30, 2016.

Indemnifications - In the normal course of business, the IMB has entered into contracts that provide a variety of indemnifications. Any exposure to the Pool under these arrangements would involve future claims that may be made against the IMB. The Pool's maximum exposure under these arrangements is unknown. No such claims have occurred, nor are they expected to occur therefore the IMB expects the risk of loss to be remote.

Hedge Fund Pool

Notes to Financial Statements (Amounts in thousands, except share data)

NOTE 3. INVESTMENT RISK DISCLOSURES

The Pool holds shares in hedge funds and shares of a money market fund with the highest credit rating. The investments in hedge funds might be indirectly exposed to foreign currency risk, credit risk, interest rate risk, and/or custodial credit risk. The Pool is restricted from investing more than 10 percent of the value of the Pool with any single manager. At June 30, 2016, the Pool was in compliance with this restriction and is not exposed to concentration of credit risk.

NOTE 4. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

ASC 820 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under ASC 820 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities with redemption terms that are not short term.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

U.S. GAAP does not require the Pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. All of the Pool's investments in hedge funds were valued using the net asset value per share practical expedient. As these are the only investments in the Pool, a fair value hierarchy table is not presented.

There were no transfers in or out of Levels 1 and 2 during the year ended June 30, 2016.

NOTE 5. ADVANCE ON INVESTMENT IN OTHER FUND

On June 27, 2016, the IMB funded \$75 million to FCOI II Holdings L.P. As of June 30, 2016, this amount has been recorded as an advance on investment in other fund. The subscription terms of the aforementioned fund requires contributions to be received in advance of the July 1, 2016 subscription day.

Report of Independent Auditors

The Board of Trustees
The West Virginia Investment Management Board

Report on the Financial Statements

We have audited the accompanying financial statements of the West Virginia Investment Management Board Administrative Fund (the Fund), as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the Fund's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the West Virginia Investment Management Board Administrative Fund as of June 30, 2016, and the respective changes in financial position and cash flows thereof for the year then ended in conformity with U.S. generally accepted accounting principles.

Basis of Presentation

As described in Note 1, the financial statements present only the Fund of the West Virginia Investment Management Board and do not include the financial position and results of operations of the West Virginia Investment Management Board for any of their investment pools. These financial statements do not purport to, and do not, present fairly the financial position of the West Virginia Investment Management Board for any of their investment pools at June 30, 2016, and changes in its financial position, and, where applicable, cash flows thereof, for the year ended in conformity with U.S. generally accepted accounting principles. Our opinion is not modified with respect to this matter.

Required Supplementary Information

U.S. generally accepted accounting principles require that management's discussion and analysis on pages i-iii be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Ernst + Young LLP

September 9, 2016

Administrative Fund

Management's Discussion and Analysis

This discussion and analysis of the West Virginia Investment Management Board's (IMB) financial performance provides an overview of the IMB's administrative financial activities for the fiscal year ended June 30, 2016. Please read it in conjunction with the IMB Administrative Fund basic financial statements, which follow this discussion. The IMB operates investment pools and issues separate audited financial statements on the investment pools.

FINANCIAL HIGHLIGHTS

- The IMB is required by law to charge a fee sufficient to cover the cost of providing investment management services. Investment service fee revenues were \$45.5 million, as compared to \$46.4 million for the previous fiscal year. The change primarily results from a decrease in advisor fees attributed to lower assets under management. Average assets of the investment pools managed by the IMB decreased by \$236 million from the previous year.
- Fees paid to outside investment advisors decreased by \$1.5 million over the previous year as a result of a decrease in assets under management. The average expense ratio for investment advisor fees across all pools was 21.6 basis points for the year, as compared to 22.2 basis points for the previous year.
- Custodian bank fees increased by \$43,000 from the previous year, largely as a result of an increase in the amount of international assets under custody and an increase in the number of transactions in foreign markets.
- Fees for professional services increased by \$549,000, primarily attributable to an increase in legal fees related to the ongoing litigation.
- Administrative expenses increased by \$9,000, or 0.2 percent, from the previous year. The expense ratio for administrative expenses was 2.6 basis points of average net assets, which is consistent with the prior year. Salaries increased by \$30,000 from \$2,402,000 to \$2,432,000. In total, administrative expenses were \$1.1 million lower than the expenses included in the fiscal year budget approved by the Board of Trustees.
- Dividend income increased from the prior year.

THE FINANCIAL REPORTS

This financial report consists of three financial statements: the Statement of Net Position; the Statement of Revenues, Expenses, and Changes in Net Position; and the Statement of Cash Flows. These statements include all assets and liabilities of the IMB Administrative Fund using the economic resources measurement focus and the accrual basis of accounting. The accrual basis of accounting takes into account all revenues and expenses regardless of when cash is received or paid. These statements give an overall perspective of the IMB Administrative Fund's financial position and the changes in the financial position during the current fiscal year.

The Statement of Net Position presents the IMB Administrative Fund's assets and liabilities, with the difference between the two reported as net position. The Statement of Revenues, Expenses, and Changes in Net Position describes how the IMB Administrative Fund's net position changed during the fiscal year. The Statement of Cash Flows identifies the sources of cash received by the IMB Administrative Fund and how that cash was used in the IMB Administrative Fund's activities during the year. The ending cash presented in this statement is a significant portion of the IMB Administrative Fund's assets as reported in the Statement of Net Position. This statement also contains a reconciliation of the operating loss as reported in the Statement of Revenues, Expenses, and Changes in Net Position to the cash provided by the IMB Administrative Fund's operating activities during the year.

Administrative Fund

Management's Discussion and Analysis

FINANCIAL ANALYSIS

The IMB Administrative Fund's total assets as of June 30, 2016, were \$12.9 million, and were mostly comprised of cash and cash equivalents and receivables for investment service fees. This was \$312,000 lower than the previous year.

Total liabilities as of June 30, 2016, were \$8.5 million, consisting of invoices payable and accrued liabilities for investment management and consulting fees, custodial fees, and administrative expenses. This was \$321,000 lower than the previous year.

These minor changes can be attributed to fluctuations in the timing of receipts and disbursements made in the normal course of business.

Management's Discussion and Analysis

CAPITAL ASSETS

The IMB Administrative Fund made acquisitions of capital assets totaling \$66,200 during the current fiscal year. The June 30, 2016 work in progress balance of \$24,000 relates to the development of two software solutions that are scheduled to be completed in fiscal year 2017. There were no disposals.

CONTACTING THE IMB

This financial report is designed to provide its readers with a general overview of the IMB Administrative Fund's finances. If you have any questions about this report or need additional information including the audited financial statements of the IMB Investment Pools, contact the IMB at 500 Virginia Street, East, Suite 200, Charleston, WV 25301-2164, or visit us at www.wvimb.org.

Administrative Fund

Notes to Financial Statements

NOTE 1. NATURE OF ORGANIZATION

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated state pension funds, the state's Workers' Compensation and Pneumoconiosis funds, and certain other state government funds. The IMB has established distinct investment pools to efficiently invest the entrusted funds. Separate financial statements are issued for these investment pools. The IMB Administrative Fund's financial statements are included as an internal service fund of the State of West Virginia in the State's financial statements and are presented as a blended component unit.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor, and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other trustees for a term of six years.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

The accounting and reporting policies of the IMB Administrative Fund conform to accounting principles generally accepted in the United States of America. The following is a summary of significant accounting policies.

Cash and Cash Equivalents - Cash and cash equivalents consist of cash held in checking and money market accounts. Management believes the IMB Administrative Fund is not exposed to any significant credit or market risk on cash and cash equivalents. Cash equivalents are maintained with a financial institution in an institutional Treasury Money Market Fund which has an average maturity of less than 90 days.

Fair Value Measurements - GASB has issued Statement No. 72, *Fair Value Measurement and Application*, effective for periods beginning after June 15, 2015. The IMB Administrative Fund adopted this standard, which categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

The IMB Administrative Fund's cash equivalents are invested in an institutional Treasury Money Market fund valued at \$3,852,780 as of June 30, 2016, using quoted market prices (Level 1 inputs).

Capital Assets - Purchased assets, when they meet the thresholds defined in the capitalization policy, are recorded at cost. Threshold requirements are \$2,500 for office equipment, furniture, fixtures, computer hardware, and software, and \$10,000 for buildings, building improvements, land improvements, infrastructure, and leasehold improvements. Land is capitalized irrespective of cost.

Depreciation on purchased assets is provided for over the estimated useful lives of the assets, ranging from three years to ten years using the straight-line method. Leasehold improvements are amortized over the life of the lease.

Revenues and Expenses - The IMB's Board of Trustees adopts an annual budget and fee schedule for services to be provided to the investment pools. Revenues of the IMB Administrative Fund are derived from the allocation of fees to the investment pools per the fee schedule. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. Revenues and expenses are recorded when earned or incurred in accordance with the economic resources measurement focus and the accrual basis of accounting. The carrying value of investment service fees receivable approximates its fair value.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and is exempt from federal and state taxation. Accordingly, the IMB Administrative Fund financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

Administrative Fund

Notes to Financial Statements

NOTE 3. CAPITAL ASSETS

Capital assets activity for the fiscal year ended June 30, 2016 was as follows:

	Beginning Balance	Increases	Decreases	Ending Balance
Capital assets, not being depreciated:				
Work in progress	\$ 7,500	\$ 62,547	\$ (46,047)	\$ 24,000
Total capital assets, not being depreciated	<u>7,500</u>	<u>62,547</u>	<u>(46,047)</u>	<u>24,000</u>
Capital assets, being depreciated:				
Office equipment	455,304	-	-	455,304
Office furniture	218,749	-	-	218,749
Other depreciable property	54,990	66,200	-	121,190
Leasehold improvements	260,360	-	-	260,360
Total capital assets, being depreciated	<u>989,403</u>	<u>66,200</u>	<u>-</u>	<u>1,055,603</u>
Less accumulated depreciation for:				
Office equipment	(409,598)	(21,633)	-	(431,231)
Office furniture	(127,312)	(11,074)	-	(138,386)
Other depreciable property	(31,391)	(18,065)	-	(49,456)
Leasehold improvements	(84,251)	(47,977)	-	(132,228)
Total accumulated depreciation	<u>(652,552)</u>	<u>(98,749)</u>	<u>-</u>	<u>(751,301)</u>
Capital assets, net	<u>\$ 344,351</u>	<u>\$ 29,998</u>	<u>\$ (46,047)</u>	<u>\$ 328,302</u>

Depreciation expense of \$98,749 was charged to the investment management activity and is included in the administrative expenses.

NOTE 4. OPERATING LEASES

On July 9, 2012, the IMB executed an amendment to renew its long-term lease, originally dated August 26, 2002, and previously amended on December 7, 2006, for a period of seven years beginning on January 1, 2013, at a monthly cost of \$18,971. Effective November 1, 2013, the monthly cost increased to \$19,633 based on actual square footage calculations. Under the original and amended lease, beginning on January 1, 2013, and continuing throughout the term, the IMB shall pay as additional rent a portion of the increase in utility costs and taxes over the base year 2012 amounts. The IMB shall receive a refund if the actual amount is less than the base year 2012 amount. Rent expense for the year ended June 30, 2016 totaled \$230,463.

The following is a schedule of future minimum rental payments required under this lease.

Fiscal years ending June 30:

2017	235,599
2018	235,599
2019	235,599
2020	117,800
Total	<u>\$ 824,597</u>

NOTE 5. EMPLOYEE BENEFIT PLANS

Retirement - The IMB provides a defined contribution money purchase pension plan (Pension Plan) covering all of its employees. An employee becomes eligible to participate in the Pension Plan on the earlier of the January 1 or July 1 coinciding with or following the employee's hire date. The Pension Plan is solely funded by the IMB, which contributes 10 percent of each covered employee's salary. Contributions for the year ended June 30, 2016 totaled \$239,061. The plan provides for a five-year vesting schedule with vesting increasing 20 percent per year.

Healthcare - On November 1, 2011, the IMB established the Defined Contribution Medical Plan (the Plan). The Plan is maintained for the exclusive benefit of employees and is a medical reimbursement plan under *Internal Revenue Service Code Section 105(h)*. The Plan identifies the IMB as the Plan Administrator and authorizes the IMB to amend the Plan as needed.

On November 1 of each plan year, the IMB determines an amount to credit each eligible employee that is allocated to a Health Reimbursement Arrangement (HRA) account for each participant. Current annual credits are \$2,500 for single employees and \$5,000 for employees with qualifying spouses or dependents. These credits are to be used to reimburse participants for out-of-pocket medical expenses not covered by any other source. Medical Expenses shall be defined under *Internal Revenue Service Code Section 213(d)*. Any amount remaining in a participant's HRA account at the end of the plan year shall be credited to the participant's account for the following year, in addition to the annual contribution. Upon separation from employment or retirement, a former employee or dependent will not continue to receive the annual credit but may use the remaining continued balance accumulated in the HRA account.

The IMB may at its discretion, through resolution of its Board of Trustees, discontinue funding the annual credits or terminate the Plan at any time without liability for such discontinuance or termination.

Contributions made to the Plan by the IMB for the year ended June 30, 2016 were \$102,883.

NOTE 6. CASH AND INVESTMENT RISK

At June 30, 2016, all of the IMB Administrative Fund's cash equivalents are invested in an institutional Treasury Money Market fund. This investment fund is rated Aaa by Moody's and AAA by Standard & Poor's and has no significant custodial credit risk or interest rate risk. The investment fund invests in U.S. Treasuries and is not exposed to a concentration of credit risk or any foreign currency risk. Cash balances are held in a FDIC insured bank account, the balance of which is below the \$250,000 insurance limit at all times.
