# West Virginia Investment Management Board Notes to Financial Statements 

## NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (Investment Management Board) was organized on April 25, 1997, as a public corporation created by West Virginia Code § 12-6-1 to provide prudent fiscal administration, investment, and management of certain public pension funds, the Workers Compensation and Pneumoconiosis funds and other funds and the State's operating funds. A Board of Trustees, consisting of thirteen members, governs the Investment Management Board. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints Trustees for a term of six years.

The accompanying financial statements reflect only the investments and investment transactions of the investment pools established by the Investment Management Board and do not reflect any other assets or liabilities of the various pool participants or the Investment Management Board.

A brief description of the individual pools within the fund follows:

S\&P 500 Index Qualified - The objective of this pool is to provide a passive equity index management style. Funds in this pool are invested in the State Street Global Advisors' S\&P 500 Index pool, which invests in common stocks of those companies listed in the Standard \& Poors 500 Index. Only "qualified participants" (as defined by the Internal Revenue Code) may invest in this pool.

S\&P 500 Index Nonqualified - The objective of this pool is to provide a passive equity index management style. Funds in this pool are invested in the State Street Global Advisors' S\&P 500 Index pool which invests in common stocks of those companies listed in the Standard \& Poors 500 Index. This pool exists for participants who are not "qualified" (as defined by the Internal Revenue Code ).

Large Cap Domestic - The pool's objective is to equal or exceed the S\&P 500 Stock Index over a three- to five-year period. Assets of this pool are actively managed by Alliance Capital Management, Chartwell Investment Partners, and Q.E.D. Investments.

Non-Large Cap Domestic - This pool invests in the equities of small- to mid-sized companies and its objective is to equal or exceed the Russell 2500 Index over a three- to five-year period. Assets of this pool are managed by Loomis, Sayles, \& Company, Aronson + Partners, Wellington Management Company, and Dimensional Fund Advisors Inc.

International Qualified - Funds of this pool are invested in Silchester International Investors' Value Equity Group Trust. This pool is expected to produce investment returns that exceed the Morgan Stanley Capital International's Europe Australasia Far East (free) (EAFE) Index by 200 basis points on an annualized basis over rolling three-to five-year periods, net of fees. Only "qualified participants" (as defined by the Internal Revenue Code) may invest in this pool.

International Nonqualified - Funds of this pool are invested in Silchester International Investors' International Value Equity Trust. This pool is expected to produce investment returns that exceed the Morgan Stanley Capital International's EAFE Index by 200 basis points on an annualized basis over rolling three- to five-year periods, net of fees. This pool exists for participants who are not "qualified" (as defined by the Internal Revenue Code ).

International Equity - This pool invests in the equities of international companies. This pool is co-managed by Mastholm Asset Management and TT International Investment Management companies, with a portion of the assets invested in Capital International Inc.'s Emerging Markets Growth Fund. The objective of the International Equity is to exceed Morgan Stanley Capital International's All CountryWorld Free Ex US Index over rolling three- to five-year periods, net of fees.

Short-Term Fixed Income - The main objective of this pool is to maintain sufficient liquidity to fund withdrawals by the participant plans and to invest cash contributions until such time as the money can be transferred to other asset classes without sustaining capital losses. Fischer Francis Trees \& Watts is the advisor to this pool.

Fixed Income - The main objective of this core bond pool is to generate investment income, provide stability and diversification, but not at the expense of total return. This pool is co-managed on an active basis by Western Asset Management Company and Hoisington Investment Management Company.

## NOTE 1. DESCRIPTION OF ENTITY (Continued)

Fixed Income Qualified - The main objective of this core bond pool is to generate investment income, provide stability and diversification, but not at the expense of total return. Barclays Global Investors manages funds for this passive corporate and mortgage domestic fixed income pool. Only "qualified participants" (as defined by the Internal Revenue Code) may invest in this pool.

Fixed Income Nonqualified - The main objective of this core bond pool is to generate investment income, provide stability and diversification, but not at the expense of total return. Barclays Global Investors manages funds for this passive corporate and mortgage domestic fixed income pool. This pool exists for participants who are not "qualified" (as defined by the Internal Revenue Code ).

Statutory Investments - This pool holds investments that the Investment Management Board acquired by directive of the West Virginia State Legislature. Currently, the Public Employee's Retirement System is the sole investor in this pool.

Cash Liquidity - This pool consists of the operating funds of the State, funds held in trust by State agencies, and funds from local governments who desire the opportunity to invest with the State. Its purpose is to provide for the investment of all surplus funds and supply the daily cash needs of the State. The pool is co-managed by Bank One Investment Advisors and Brinson Partners, Inc.

Government Money Market - This pool consists of investors who wish to invest in a pool that restricts its investments to U. S. Government Obligations, select U. S. Government Agency Obligations or repurchase agreements. The pool is managed by Brinson Partners, Inc.

Enhanced Yield - This pool consists of the operating funds of the State that are not immediately needed to fund the State's liquidity requirements. The pool is managed by Bank One Investment Advisors.

Loss Amortization - This pool was created to account for those participant claims on the general operating funds of the State which exceeded the underlying assets of the other pools. This excess of participant claims on net assets over underlying assets occurred as a result of the distributions of earnings to participants in various Investment Management Board investment pools, principally the Unrestricted Pool (predecessor to Cash Liquidity), in excess of the true investment income experience of the pools, principally in 1987 and 1988.

Loans - This pool is comprised of loans made by the State. The $\$ 1$ unit price is utilized for accounting purposes only. The State is the sole participant in this pool.

Participant Directed Accounts - The remaining pools, (Municipal Bond Commission, Department of Transportation, Lottery Defeasance, School Fund, and EDA Insurance), are maintained for individual State agencies with specific investment needs. Each agency has 100 percent ownership of the underlying investments in its' pool and is solely responsible for the investment decisions in accordance with the legal restrictions applicable to those assets. The Board serves in a custodial capacity and has no discretion over the investment decisions for these pools.

The combined net asset value for the pools and accounts at December 31, 2001 is $\$ 7,366,177,380$.

## NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The Investment Management Board is the investment vehicle of the State and its component units, all of which are government entities. The Investments of the Cash Liquidity, the Government Money Market, the Loans, the Municipal Bond Commission, the Department of Transportation, and the EDA Insurance pools are, as permissible under Government Accounting Standards Board (GASB) Statement Number 31, carried at amortized cost. The investements of the remaining pools are carried at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. Commissions on the purchases of securities by the Investment Management Board are generally an unidentified component of the security price quoted by the seller and are included in the investment cost or carrying value.

Governmental Accounting Standards Board (GASB) Statement Number 20, "Accounting and Financial Reporting for Proprietary funds and Other Governmental Entities that use Proprietary Fund Accounting" - The Investment Management Board has elected to follow all Financial Accounting Standard Board Statements and Interpretations, APB Opinions and ARBs, except those that conflict with or contradict GASB pronouncements.

## NOTE 2.

## SIGNIFICANT ACCOUNTING POLICIES ( Continued)

Repurchase Agreements - In connection with transactions in repurchase agreements, it is the Investment Management Board's policy that it's designated custodian take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the Investment Management Board may be delayed or limited.

Foreign Currency - Amounts denominated in or expected to settle in foreign currencies are translated into United States dollars at exchange rates reported by Mellon Bank on the following basis:
a. Market value of investment securities, other assets and liabilities - at the closing rate of exchange at the valuation date.
b. Purchases and sales of investment securities, income and expenses - at the rate of exchange prevailing on the respective dates of such transactions.

The Investment Management Board isolates that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from market prices of securities held.

Reported net realized foreign exchange gains and losses arise from sales of portfolio securities, sales and maturities of short-term securities, sales of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded and the United States dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities including investments in securities at month end, resulting from changes in the exchange rate.

Options - The Investment Management Board held financial option contracts for trading purposes during the period presented in the financial statements. These option contracts give the purchaser of the contract the right to buy (call) or sell (put) the security or index underlying the contract at an agreed upon price (strike price) during or at the conclusion of a specified period of time. The seller (writer) of the contract is subject to market risk, while the purchaser is subject to credit risk and market risk to the extent of the premium paid.

Security Loans - The Investment Management Board through its agent, Mellon Bank, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by collateral of at least $102 \%$ of the market value of the securities loaned. For international securities, the collateral is at least $105 \%$ of the market value of the securities on loan. The Investment Management Board receives a portion of the income from the investment of the collateral. The Investment Magagement Board also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are for the account of the Investment Management Board.

Futures Contracts - The Investment Management Board invests in financial futures contracts to hedge the existing securities of the Fixed Income Pool against fluctuations in fair value caused by changes in prevailing market interest rates. Upon entering into a financial futures contract, the Investment Management Board is required to pledge to the broker an amount of cash, U.S. government securities, or other assets, equal to a certain percentage of the contract amount (initial margin deposit). Futures contracts are marked to market daily with gains and losses being recognized. The variation margin is settled daily until the contracts expire or are closed. Futures contracts involve, to varying degrees, risk of loss in excess of the variation margin disclosed in the Statement of Assets and Liabilities. Losses may arise from the changes in the value of the underlying instrument, illiquidity in the secondary market for the contracts, or if the counterparties do not perform under the terms of the contract. Futures contracts are valued each day at the settlement price established by the board of trade or exchange on which they are traded.

Foreign Exchange Forward Contracts - A foreign exchange forward contract is an agreement between two parties to exchange different currencies at a specified exchange rate at an agreed upon future date. The International Equity pools' investment managers enter into such contracts to hedge the assets and liabilities related to securities denominated in a foreign currency. Risk associated with such contracts include movement in the value of the foreign currency relative to the U. S. dollar and the ability of the counterparty to perform. These contracts have relatively short durations and are valued at the prevailing market exchange rates at month end. An unrealized gain or loss is recorded as the difference between the amount valued at month end and the amount to be received or paid at the expiration date. The unrealized gain or loss is reclassified to realized gain or loss when the contract expires.

Asset-Backed Securities - Certain portfolios invest in various asset-backed securities, mortgage-backed securities, and structured corporate debt. The securities are reported at fair value. The portfolios invest in these securities to enhance yields on investments. Changes in market interest rates affect the cash flows of these securities and may result in changes in fair value. The overall return or yield on these securities depends on the changes in the interest and principal payment pattern and market value of the underlying assets.

## NOTE 2. SIGNIFICANT ACCOUNTING POLICIES ( Continued)

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Interest Income - Interest income is recognized as earned on the accrual method.
Dividend Income - Dividend income is recognized on ex-dividend date.

Amortization - Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security. The amortization of mortgage-backed securities considers the effect of prepayments on the life of the security. Historical prepayment speeds are obtained from market data vendors and are updated annually. The effect of changing prepayment assumptions is reported in the Statement of Operations in the year of the change.

Allowance for Loan Losses - The allowance for loan losses is available to absorb future loan losses. The allowance is increased by provisions charged against operations and reduced by charge-offs (losses), net of recoveries. The provision is based on several factors including: analytical reviews of loan loss experience in relationship to outstanding loans; a continuing review of problem loans and overall portfolio quality, including analysis of the quality of the underlying collateral; and management's judgment on the impact of current and expected economic conditions on the portfolio.

Distributions to Participants - The monthly net income of the Short-Term Fixed Income, the Fixed Income, and the Enhanced Yield pools are declared as dividends and distributed to the participants of the pools on the first day of the following month. Distributions are paid in the form of reinvestments in the pools and have been included in distributions to participants and reinvestment of distributions as presented on the Statement of Changes in Net Assets.

The net income of the Cash Liquidity and Government Money Market pools are declared as dividends and distributed daily to the participants based upon their pro rata participation in the pools. For these pools, the distributions of net investment income and net realized gains are credited to the participants' accounts in the form of dividend reinvestments in the pool and are presented first as distributions to participants, and then as reinvestment of distributions on the Statement of Changes in Net Assets.

The net income of the Loan Pool is determined monthly and distributed to the participant on the last day of the month. Distributions are paid in the form of reinvestments in the pool and have been included in distributions to participants and reinvestment of distributions as presented on the Statement of Changes in Net Assets.

The monthly net income of the Loss Amortization Pool is used to reduce the undistributed net losses recorded in this portfolio.

Expenses - The Investment Management Board's Trustees adopt an annual budget and fee schedule for services to be provided to the respective investment pools. Each investment portfolio is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the investment portfolios based on asset size. Certain investment portfolios cannot be charged expenses or must be charged a reduced expense. The Investment Management Board pays all expenses.

Income Taxes - The Investment Management Board is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the Investment Management Board is not subject to federal or state income taxes.

## NOTE 3. STATUTORY INVESTMENTS

West Virginia Code § 12-6-20(b) enacted by the West Virginia State Legislature in April 1998 committed the Public Employees' Retirement System to invest in the West Virginia Regional Jail and Correctional Facility Authority. Under the terms of this legislation, the investment shall earn a rate of return equal to the annualized rate of return earned by the core fixed-income portfolios of the Public Employees' Retirement System over the previous five years, plus one tenth of one percent. The rate of return shall be calculated quarterly. The Legislature has designated specific funds to repay this obligation. Equal annual payments are to be repaid to ensure the total repayment by August 31, 2023.

## NOTE 4. OPTION CONTRACTS WRITTEN

Transactions in options written during the month ended December 31, 2001 were as follows:

|  | Number of Contracts |  | Premiums <br> Received |
| :---: | :---: | :---: | :---: |
| Options outstanding at November 30, 2001 | 3,933 | \$ | 3,899,455 |
| Options written | 2,424 |  | 1,552,232 |
| Options terminated in closing purchase transactions | $(3,672)$ |  | $(3,149,758)$ |
| Options expired | (838) |  | $(336,080)$ |
| Options exercised | - |  |  |
| Options outstanding at December 31, 2001 | 1,847 |  | 1,965,849 |

## Portfolio Statistics

|  | Cash Liquidity | Government Money Market | Enhanced Yield |
| :---: | :---: | :---: | :---: |
| Weighted Average Days to Maturity | 77 | 86 | 618 |
| Maximum Weighted Average Investment |  |  |  |
| Maturity Term Per Board Guidelines | 90 days | 90 days | 2 years |
| Money Market Yield | 2.70\% | 2.30\% |  |

The money market yield represents the rate of income, net of expenses, earned over the past month and is not intended to indicate future performance. The return is annualized over a 365 -day year, assuming no reinvestment of earnings.
