## Investment Pools

### Notes to Financial Statements

#### NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year that begins July 1 and ends June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB (referred to herein as the Investment Pools) and do not reflect any activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board applicable to investment companies, which is a comprehensive basis of accounting other than U.S. GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Investments Pools. There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or fund unit transactions between U.S. GAAP for investment companies and U.S. GAAP for state and local governments.

A brief description of the individual pools within the fund follows:

**Large Cap Domestic** - The pool's objective is to exceed, net of external investment management fees, the S&P 500 Stock Index over three- to five-year periods. Enhanced Investment Technologies, LLC, and State Street Global Advisors manage assets of this pool.

**Non-Large Cap Domestic** - This pool invests in the equities of small- to mid-sized companies and its objective is to exceed, net of external investment management fees, the Russell 2500 Index over three- to five-year periods. Assets of this pool are managed by Aronson + Johnson + Ortiz, LP and Westfield Capital Management.

**International Qualified** - Funds of this pool are invested in Silchester International Investors' Value Equity Group Trust. This pool is expected to produce investment returns that exceed the Morgan Stanley Capital International's Europe Australasia Far East (EAFE) Index by 200 basis points on an annualized basis over three- to five-year periods, net of external investment management fees. Only "qualified participants" (as defined by the *Internal Revenue Code*) may invest in this pool.

## NOTE 1. DESCRIPTION OF THE ENTITY (Continued)

**International Nonqualified** - Funds of this pool are invested in Silchester International Investors' Value Equity Trust. This pool is expected to produce investment returns that exceed the Morgan Stanley Capital International's EAFE Index by 200 basis points on an annualized basis over three- to five-year periods, net of external investment management fees. This pool exists for participants who are not "qualified" (as defined by the *Internal Revenue Code*).

**International Equity** - This pool invests in the equities of international companies. AXA Rosenberg Investment Management, LLC, Brandes Investment Partners, LLC, LSV Asset Management and Wasatch Advisors Inc., manage the assets of this pool. The objective of the International Equity is to exceed, net of external investment management fees, Morgan Stanley Capital International's All Country World Free Ex US Index over three- to five-year periods.

**Short-Term Fixed Income** - The main objective of this pool is to maintain sufficient liquidity to fund withdrawals by the participant plans and to invest cash contributions until such time as the money can be transferred to other asset classes without sustaining capital losses. JP Morgan Investment Advisor's, Inc., manages this pool. This pool's investment performance, net of external investment management fees, is expected to meet or exceed the Salomon ninety-day T-bill index plus fifteen basis points.

**Fixed Income** - The main objective of this core bond pool is to generate investment income, provide stability and diversification, but not at the expense of total return. Western Asset Management Company, LLP, manages this pool.

**Fixed Income Qualified** - The main objective of this core bond pool is to generate investment income, provide stability and diversification, but not at the expense of total return. Barclays Global Investors manages this pool. Only "qualified participants" (as defined by the *Internal Revenue Code*) may invest in this pool.

**Fixed Income Nonqualified** - The main objective of this core bond pool is to generate investment income, provide stability and diversification, but not at the expense of total return. Barclays Global Investors manages this pool. This pool exists for participants who are not "qualified" (as defined by the *Internal Revenue Code*).

The composite of the Fixed Income, Fixed Income Qualified, and Fixed Income Nonqualified pools is expected to outperform, net of external investment management fees, the Lehman Brothers Universal Index over three- to five-year periods.

**Private Equity** - The private equity pool was established to hold the IMB's investments in various types of private equity funds. Franklin Park Associates, LLC has been retained by the IMB to provide consulting services for this asset class.

**Private Real Estate** - The private real estate pool was established to hold the IMB's investments in private real estate funds. Courtland Partners, Ltd. has been retained by the IMB to provide consulting services for this asset class.

**Hedge Fund** - The hedge fund pool was established to hold the IMB's investments in hedge funds. Albourne America, LLC has been retained by the IMB to provide consulting services for this asset class.

The combined net asset value of the pools at September 30, 2008, is \$9,362,731,000.

## NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

**Basis of Accounting** - The IMB invests funds of the State and its component units, all of which are government entities. The investments of the Short-Term Fixed Income pool are carried at amortized cost. The investments of the remaining pools, except as noted below, are carried at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. Investments in private equity, private real estate, and hedge funds, which are not publicly traded, are carried at estimated fair value as provided by the funds' management. The IMB may, in addition, consider other factors in assessing the fair value of these investments. The IMB believes that the carrying amount of such investments is a reasonable estimate of fair value as of September 30, 2008. Because these investments are not marketable, the estimated value is subject to uncertainty, and therefore, may differ from the value that would have been used had a ready market for the investment existed. Futures and option contracts are valued at the last settlement price established each day by the exchange on which they are traded. Interest rate and credit default swap values are based on market values received from third parties or are determined by valuation models. Investments in other funds are valued at the reported unit values of the individual funds as provided by fund's management. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

**Repurchase Agreements** - In connection with transactions in repurchase agreements, it is the IMB's policy that its designated custodian take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the IMB may be delayed or limited.

**Foreign Currency** - Amounts denominated in or expected to settle in foreign currencies are translated into U.S. dollars at exchange rates reported by the Bank of New York Mellon on the following basis:

- a. Market value of investment securities, other assets and liabilities - at the closing rate of exchange at the valuation date.
- b. Purchases and sales of investment securities, income and expenses - at the rate of exchange prevailing on the respective dates of such transactions.

The IMB isolates that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from market prices of securities held.

Reported net realized foreign exchange gains and losses arise from sales of portfolio securities, sales and maturities of short-term securities, sales of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities including investments in securities at month end, resulting from changes in the exchange rate.

**Option Contracts** - The IMB may purchase or write equity, bond, currency, or index option contracts that have recognized liquidity and are actively traded on major exchanges or are executed with major dealers. These option contracts give the purchaser of the contract the right to buy (call) or sell (put) the security, or settle cash for an index option, underlying the contract at an agreed upon price (strike price) during or at the conclusion of a specified period of time.

Premiums paid upon the purchase of an option contract are recorded as an asset and subsequently adjusted to market value. Upon exercising a purchased option, a gain is recorded equal to the difference between the market value of the underlying instrument and the strike price of the option, less premiums paid. If the option expires unexercised, a loss is recognized in the amount of the premiums paid for the option.

## NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Premiums received when option contracts are written are recorded as a liability and subsequently adjusted to market value. If a written option contract expires unexercised, a gain is recorded equal to the amount of the premiums received. The difference between the premiums received and the amount paid to effect a closing transaction is also recorded as a gain or loss. When a written option is exercised, a loss is recorded equal to the difference between the market value of the underlying instrument and the strike price of the option, less premiums received.

One of the IMB's fixed income managers uses written option contracts to enhance investment returns and reduce portfolio convexity when implied volatility is high. Purchased option contracts are used to increase portfolio convexity when implied volatility is low, to implement certain yield curve strategies, or to hedge sector exposure.

When writing put options, there is risk that a loss may be incurred if the market price of the underlying instrument decreases and the option is exercised. This loss is determined by market conditions and cannot be specifically limited. The risk associated with writing call options is the loss of potential profit if the market price of the security increases and the option is exercised. Purchased put or call options bear the risk of loss of the premium paid if market conditions are not favorable to exercise the option. There may also be risk that the value of the option contract does not correlate perfectly with movements of the underlying instrument due to certain market distortions.

The IMB limits its exposure to credit risk by only buying or selling options traded on major exchanges, or executed with major dealers. There is a risk of the inability to enter into a closing transaction if a liquid secondary market does not exist. The IMB maintains sufficient levels of cash or cash equivalents to meet cash flow obligations.

**Security Loans** - The IMB, through its agent, BNY Mellon Bank, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by initial collateral of at least 102 percent of the market value of the securities loaned. For international securities, the collateral is at least 105 percent of the market value of the securities on loan. Cash collateral received is invested in the Mellon GSL DBT II Collateral Fund. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as securities lending income. The agent fees and broker rebates are reported as expenses. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the various investment pools.

**Futures Contracts** - A futures contract is an agreement between a buyer or a seller and the clearinghouse of a futures exchange in which the parties agree to buy or sell a commodity, financial instrument or index at a specified future date and price. The IMB invests in futures contracts in the Large Cap Domestic pool, the Non-Large Cap Domestic pool and the Fixed Income pool. Upon entering into a financial futures contract, the IMB is required to pledge to the broker an amount of cash, U.S. government securities, or other assets, equal to a certain percentage of the contract amount (initial margin deposit). Cash (variation margin) is received from or paid to the broker for the fluctuations of the underlying securities or index. The IMB records the cash received or paid for the variation margin as a realized gain or loss.

Interest rate futures may be used to enhance portfolio yields, to hedge an existing position, or as an alternative investment of cash. Stock index futures may be used to provide immediate exposure to fluctuations in the market values of the stocks in the underlying index and to provide liquidity for cash flows.

## **NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

The market risk associated with holding interest rate and stock index futures results from changes in the market value of the contractual positions due to changes in the value of the underlying instruments or indices. Hedging risk associated with these futures contracts arises because the value of the futures contracts may not correlate perfectly with changes in the values of the underlying instruments or indices due to market distortions.

Other risks associated with futures contracts are liquidity risk and credit risk. Liquidity risk arises when there is insufficient trading in a particular futures contract. Credit risk arises from the potential inability of counterparties to meet the terms of the contracts. The IMB's managers generally only utilize futures contracts that are traded on major exchanges or are executed with major dealers. The major exchanges assume the risk that a counterparty will not settle and generally require an initial margin deposit of cash or securities.

**Foreign Exchange Forward Contracts** - A foreign exchange forward contract is an agreement between two parties to exchange different currencies at a specified exchange rate at an agreed upon future date. The managers of the International Equity pools and the Fixed Income pool enter into such contracts to hedge the assets and liabilities related to securities denominated in a foreign currency. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. These contracts have relatively short durations and are valued at the prevailing market exchange rates at month end. An unrealized gain or loss is recorded as the difference between the amount valued at month end and the amount to be received or paid at the expiration date. The unrealized gain or loss is reclassified to realized gain or loss when the contract expires.

**Interest Rate Swaps** - Interest rate swaps represent an agreement between counterparties to exchange cash flows based on the difference between two interest rates, applied to a notional principal amount for a specified period. Interest rate swaps do not involve the exchange of principal between the parties. Interest is paid or received periodically.

**Asset-Backed Securities** - Certain portfolios invest in various asset-backed securities, mortgage-backed securities, and structured corporate debt. The securities are reported at fair value. The portfolios invest in these securities to enhance yields on investments. Changes in market interest rates affect the cash flows of these securities and may result in changes in fair value. The overall return or yield on these securities depends on the changes in the interest and principal payment pattern and market value of the underlying assets.

**Investment Transactions** - Investment transactions are accounted for on a trade date basis.

**Use of Estimates** - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

**Investment Gains and Losses** - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

**Interest Income** - Interest income is recognized as earned on the accrual method.

**Dividend Income** - Dividend income is recognized on the ex-dividend date.

## NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

**Amortization** - Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security. The amortization of asset-backed securities considers the effect of prepayments on the life of the security. Historical prepayment speeds are obtained from market data vendors and are updated annually. The effect of changing prepayment assumptions is reported in the Statement of Operations in the year of the change.

**Distributions to Participants** - The net investment income of the Short-Term Fixed Income pool is declared as a dividend and distributed daily to the participants based upon their pro rata participation in the pool. The distributions of net investment income are credited to the participants' accounts in the form of dividend reinvestments in the pool and are presented first as distributions to participants, and then as reinvestment of distributions on the Statement of Changes in Net Assets.

The monthly net investment income of the Fixed Income pool is declared as a dividend on the last day of the month and distributed to the participants of the pool on the first day of the following month. Distributions are paid in the form of reinvestments in the pool and have been included in distributions to participants and reinvestment of distributions as presented on the Statement of Changes in Net Assets.

The remaining pools do not routinely distribute dividends and none of the pools routinely distribute net capital gains. However, on June 30, 2008 the Fixed Income Qualified pool declared a special dividend of realized gains net of operating losses. This dividend was reinvested on July 1, 2008. These dividend payments were made to facilitate participant withdrawals from the pools to fund transfers to other investment classes.

**Expenses** - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to the respective pools. Each pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the pools based on asset size. The IMB pays all expenses on behalf of the pools.

**Income Taxes** - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

## NOTE 3. SECURITIES LENDING

At September 30, 2008, the fair value of securities on loan and the collateral held by the pools of the IMB are as follows:

	Fair Value of Securities on Loan	Collateral Held
Large Cap Domestic	\$ 154,346,274	\$ 159,918,600
Non-Large Cap Domestic	106,245,125	110,665,000
International Equity	156,872,893	171,667,364
Short Term Fixed Income	13,964,553	14,247,500
Fixed Income	82,709,878	83,875,954
Total	<u>\$ 514,138,723</u>	<u>\$ 540,374,418</u>

Of the collateral held, \$540,375,000 was received as cash. The collateral received as cash is invested in the Mellon GSL DBT II Collateral Fund.

In early October 2008, the IMB was notified that certain securities issued by Sigma Finance, Inc. (Sigma) were transferred from the Mellon GSL DBT II Collateral Fund on October 1, 2008, to the Mellon GSL Reinvestment Trust II (Liquidating Trust). Units of the Liquidating Trust were transferred to the IMB's

securities lending cash collateral account. The value of the units in the Liquidating Trust on an amortized cost basis were \$10,973,960 as calculated by the IMB's proportionate interest in the Mellon GSL DBT II Collateral Fund as of the close of business on September 30, 2008. Sigma was subsequently placed into receivership and the IMB is exposed to a potential loss of the full value of the Sigma investment. In October, the IMB will record a reserve for these potential losses in each investment pool in proportion to its participation in the securities lending program at September 30, 2008.

### NOTE 4. FUTURES CONTRACTS

At September 30, 2008, open positions in futures contracts denominated in US dollars are as follows:

### Portfolio Statistics

September 30, 2008

	<u>Short-Term Fixed Income</u>
Weighted Average Days to Maturity	25
Maximum Weighted Average Investment Maturity Term Per Board Guidelines	60 days
Money Market Yield	2.37%

The money market yield represents the rate of income, net of expenses, earned over the past month and is not intended to indicate future performance. The return is annualized over a 365-day year, assuming no reinvestment of earnings.
