NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB Large Cap Domestic Equity Pool (Pool) and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool's objective is to exceed, net of external investment management fees, the S&P 500 Stock Index over three- to fiveyear periods. Assets are managed by Intech Investment Management, LLC, and State Street Global Advisors.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments are carried at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. Futures contracts are valued at the last settlement price established each day by the exchange on which they are traded. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

FAS 157 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.
- Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Security Loans - The IMB, through its agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by initial collateral of at least 102 percent of the market value of the securities loaned. Cash collateral received is invested in the Mellon GSL Reinvestment Trust. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as securities lending income. The agent fees and broker rebates are reported as expenses, and unrealized gains or losses resulting from changes in the value of the investment of cash collateral are reported as part of the net increase or decrease in the fair value of investments. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations.

Futures Contracts - A futures contract is an agreement between a buyer or a seller and the clearinghouse of a futures exchange in which the parties agree to buy or sell a commodity, financial instrument or index at a specified future date and price. Upon entering into a financial futures contract, the IMB is required to pledge to the broker an amount of cash, U.S. government securities, or other assets, equal to a certain percentage of the contract amount (initial margin deposit). Cash (variation margin) is received from or paid to the broker for the fluctuations of the underlying securities or index. The IMB records the cash received or paid for the variation margin as a realized gain or loss.

Interest rate futures may be used to enhance portfolio yields, to hedge an existing position, or as an alternative investment of cash. Stock index futures may be used to provide immediate exposure to fluctuations in the market values of the stocks in the underlying index and to provide liquidity for cash flows.

The market risk associated with holding interest rate and stock index futures results from changes in the market value of the contractual positions due to changes in the value of the underlying instruments or indices. Hedging risk associated with these futures contracts arises because the value of the futures contracts may not correlate perfectly with changes in the values of the underlying instruments or indices.

Other risks associated with futures contracts are liquidity risk and credit risk. Liquidity risk arises when there is insufficient trading in a particular futures contract. Credit risk arises from the potential inability of counterparties to meet the terms of the contracts. The IMB's managers generally only utilize futures contracts that are traded on major exchanges or are executed with major dealers. The major exchanges assume the risk of a counterparty default and generally require an initial margin deposit of cash or securities.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Use of Estimates - The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

	Level I	Level II	Level	III	Total
Equity Securities	\$1,885,271,873	\$ -	\$	-	\$ 1,885,271,873
Regulated Investment Companies	9,930,870	-		-	9,930,870
Cash	337,500	-		-	337,500
Securities Lending Collateral Funds	-	74,760,634		-	74,760,634
Futures	-	154,978		-	154,978
Total	\$1,895,540,243	\$ 74,915,612	\$	-	\$1,970,455,855

NOTE 4. SECURITIES LENDING

At July 31, 2009, the fair value of securities on loan was \$76,533,153, the initial collateral received was \$78,916,296, and the fair value of reinvested collateral held was \$74,760,634. All of the collateral held was received as cash and invested in the Mellon GSL DBT II Collateral Fund (Collateral Fund), the Mellon SL DBT II Liquidating Fund (Liquidating Fund), and the Mellon GSL DBT II Liquidating Trust (Liquidating Trust).

In early November 2008, the IMB was notified that certain securities issued by Sigma Finance, Inc. (Sigma) were transferred from the Mellon GSL DBT II Collateral Fund on October 1, 2008, to the Liquidating Trust. Units of the Liquidating Trust were transferred to the IMB's securities lending cash collateral account. For all of the IMB investment pools that participate in the securities lending program, the value of the units in the Liquidating Trust on an amortized cost basis was \$10,973,960 as calculated by the IMB's proportionate interest in the Mellon GSL DBT II Collateral Fund as of the close of business on September 30, 2008. Sigma was subsequently placed into receivership and the IMB is exposed to a potential loss of the full value of the Sigma investment. In October, the IMB recorded a reserve for these potential losses in each investment pool in

proportion to its participation in the securities lending program at September 30, 2008. The reserve recorded for the Pool was \$3,247,638.

Effective April 20, 2009, the assets of the Collateral Fund with maturities greater than one day were transferred to the Liquidating Fund. As securities mature in the Liquidating Fund, the proceeds are transferred to the Collateral Fund. The combined value of the holdings in the Collateral Fund and the Liquidating Fund is used to determine the fair value of reinvested collateral.

Additionally, the distribution of securities lending income has been restricted beginning October 1, 2008. At July 31, 2009 the accumulated undistributed securities lending income was \$1,554,647, the other accumulated undistributed income was \$226,275,709, and the total accumulated undistributed income was \$227,830,356.

NOTE 5. FUTURES CONTRACTS

At July 31, 2009, open positions in futures contracts were as follows:

			Value at	Value Upon Entering	Cumulative Net Gain (Loss)
Expiration	Open Contracts	Position	July 31, 2009	Contract	Since Inception
Sep 2009	25 S&P 500	Long	\$ 3,691,500	\$ 3,536,522	\$ 154,978

At July 31, 2009, the Pool had pledged cash of \$337,500 to cover initial margin requirements on open futures contracts. The net variation margin receivable of \$8,250 represents one day's settlement on open futures contracts.

NOTE 6. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance:	
Net asset value at June 30, 2009	\$ 8.69
Income from investment operations:	
Net investment income	0.01
Net realized and unrealized loss on investment transactions	 0.65
Total from investment operations	0.66
Net asset value at July 31, 2009	\$ 9.35
Time-weighted Total Return *	7.7%
Supplemental Data:	
Net assets, end of period (\$000's)	\$ 1,910,629
Ratio to average net assets:	
Expenses **	0.12%
Net investment income **	1.84%
Portfolio turnover rate	6.59%

* Return data is net of fees for the fiscal year-to-date and is not annualized

** All ratios are for the fiscal year-to-date annualized

NOTE 7. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool.

<u>Participant</u>	Account Value
Teachers' Retirement System	\$ 785,177,895
Public Employees' Retirement System	733,673,351
Workers' Compensation Old Fund	92,567,405
Public Safety Death, Disability and Retirement Fund	82,879,020
Revenue Shortfall Reserve Fund B	56,400,434
Revenue Shortfall Reserve Fund	40,494,432
Coal Workers' Pneumoconiosis Fund	20,469,446
Judges' Retirement System	20,161,160
Prepaid Tuition Trust Fund	19,355,138
Death, Disability and Retirement Fund for Deputy Sheriffs	17,613,844
Board of Risk and Insurance Management	9,560,684
State Police Retirement System	9,164,764

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB Non-Large Cap Domestic Equity Pool (Pool) and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool invests in the equities of small- to mid-sized companies and its objective is to exceed, net of external investment management fees, the Russell 2500 Index over three- to five-year periods. Assets are managed by Aronson + Johnson + Ortiz, LP and Westfield Capital Management.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments are carried at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

FAS 157 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Security Loans - The IMB, through its agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by initial collateral of at least 102 percent of the market value of the securities loaned. Cash collateral received is invested in the Mellon GSL Reinvestment Trust. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as securities lending income. The agent fees and broker rebates are reported as expenses, and unrealized gains or losses resulting from changes in the value of the investment of cash collateral are reported as part of the net increase or decrease in the fair value of investments. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

	Level I	Level II	Leve	el III	Total
Equity Securities	\$ 333,815,156	\$ -	\$	-	\$ 333,815,156
Regulated Investment Companies	6,416,964	-		-	6,416,964
Cash	24,351	-		-	24,351
Securities Lending Collateral Funds	-	58,734,201		-	58,734,201
Total	\$ 340,256,471	\$ 58,734,201	\$	-	\$ 398,990,672

NOTE 4. SECURITIES LENDING

At July 31, 2009, the fair value of securities on loan is \$59,932,709, initial collateral received is \$61,694,964, and the fair value of reinvested collateral held is \$58,734,201. All of the collateral was received as cash and is invested in the Mellon GSL DBT II Collateral Fund (Collateral Fund), the Mellon SL DBT II Liquidating Fund (Liquidating Fund), and the Mellon GSL DBT II Liquidating Trust (Liquidating Trust).

In early November 2008, the IMB was notified that certain securities issued by Sigma Finance, Inc. (Sigma) were transferred from the Mellon GSL DBT II Collateral Fund on October 1, 2008, to the Liquidating Trust. Units of the Liquidating Trust were transferred to the IMB's securities lending cash collateral account. For all of the IMB investment pools that participate in the securities lending program, the value of the units in the Liquidating Trust on an amortized cost basis was \$10,973,960 as calculated by the IMB's proportionate interest in the Mellon GSL DBT II Collateral Fund as of the close of business on September 30, 2008. Sigma was subsequently placed into receivership and the IMB is exposed to a potential loss of the full value of the Sigma investment. In October, the IMB recorded a reserve for these potential losses in each investment pool in proportion to its participation in the securities lending program at September 30, 2008. The reserve recorded for the Pool is \$2,247,392.

Effective April 20, 2009, the assets of the Collateral Fund with maturities greater than one day were transferred to the Liquidating Fund. As securities mature in the Liquidating Fund, the proceeds are transferred to the Collateral Fund. The combined value of the holdings in the Collateral Fund and the Liquidating Fund is used to determine the fair value of reinvested collateral.

Additionally, the distribution of securities lending income has been restricted beginning October 1, 2008. At July 31, 2009, the accumulated undistributed securities lending income is \$697,444, the other accumulated undistributed income is \$15,998,529, and the total undistributed income is \$16,695,973.

NOTE 5. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance:	
Net asset value at June 30, 2009	\$ 10.18
Net realized and unrealized loss on investment transactions	 0.88
Net asset value at July 31, 2009	\$ 11.06
Time-weighted Total Return *	8.6%

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB International Qualified Pool (Pool) and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

Funds are invested in Silchester International Investors' Value Equity Group Trust. The Pool is expected to produce investment returns that exceed the Morgan Stanley Capital International's Europe Australasia Far East (EAFE) index by 200 basis points on an annualized basis over three to five-year periods, net of external investment management fees. Only "qualified participants" (as defined by the *Internal Revenue Code*) may invest in the Pool.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments in other funds are valued at the reported unit values of the individual funds as provided by fund's management.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

FAS 157 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB International Nonqualified Pool (Pool) and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

Funds are invested in Silchester International Investors' Value Equity Trust. The Pool is expected to produce investment returns that exceed the Morgan Stanley Capital International's EAFE index by 200 basis points on an annualized basis over three- to five-year periods, net of external investment management fees. The Pool exists for participants who are not "qualified" (as defined by the *Internal Revenue Code*).

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments in other funds are valued at the reported unit values of the individual funds as provided by fund's management.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

FAS 157 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

]	Level I		Level II		Level III	Total
Investments in Other Funds	\$	-	\$	_	\$	109,276,251	\$ 109,276,251

NOTE 3. FAIR VALUE MEASUREMENTS (Continued)

The reconciliation of the beginning and ending balances of Level 3 investments for the period ended July 31, 2009 was as follows:

10110 w 3.		Inv	ents in Other unds
	Balance at June 30, 2009	\$	101,245,849
	Net realized gain		14,652
	Net change in unrealized appreciation/(depreciation)		8,074,640
	Net purchases/(sales)		(58,890)
	Net transfers in/(out) of Level 3	-	-
	Balance at July 31, 2009	\$	109,276,251
NOTE 4.	FINANCIAL HIGHLIGHTS		
	Per Unit Operating Performance:		
	Net asset value at June 30, 2009		\$ 27.84
	Income from investment operations:		
	Net investment loss		(0.02)
	Net realized and unrealized loss on investment transaction	ıs	2.22
	Total from investment operations		2.20
	Net asset value at July 31, 2009		\$ 30.04
	Time-weighted Total Return *		7.9%
	Supplemental Data:		
	Net assets, end of period (\$000's)		\$ 109,270
	Ratio to average net assets:		
	Expenses **		0.73%
	Net investment income **		-0.73%
	Portfolio turnover rate		0.00%

* Return data is net of fees for the fiscal year-to-date and is not annualized

** All ratios are for the fiscal year-to-date annualized

NOTE 5. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool.

<u>Participant</u>		Account Value
Workers' Compensation Old Fund		\$ 37,244,679
Revenue Shortfall Reserve Fund B		25,693,903
Revenue Shortfall Reserve Fund		17,815,625
Coal Workers' Pneumoconiosis Fund		8,795,904
Prepaid Tuition Trust Fund		7,748,357
Board of Risk and Insurance Management		4,097,762
Public Employees' Insurance Agency		3,295,643
Wildlife Endowment Fund		2,711,875
Retiree Health Benefit Trust		 1,865,847
	Total	\$ 109,269,595

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB International Equity Pool (Pool) and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

This Pool invests in the equities of international companies. Assets are managed by AXA Rosenberg Investment Management, LLC, Brandes Investment Partners, LLC, LSV Asset Management, and Pictet Asset Management Limited. The objective of the Pool is to exceed, net of external investment management fees, Morgan Stanley Capital International's All Country World Free Ex US index over three- to five-year periods.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments are carried at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. Foreign currency forward contracts are valued at either spot or forward month-end exchange rates. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB International Equity Pool (Pool) and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

This Pool invests in the equities of international companies. Assets are managed by AXA Rosenberg Investment Management, LLC, Brandes Investment Partners, LLC, LSV Asset Management, and Pictet Asset Management Limited. The objective of the Pool is to exceed, net of external investment management fees, Morgan Stanley Capital International's All Country World Free Ex US index over three- to five-year periods.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments are carried at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. Foreign currency forward contracts are valued at either spot or forward month-end exchange rates. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Foreign E xchange F orward C ontracts - A foreign e xchange forward contract is an agreement b etween t wo p arties t o exchange d ifferent c urrencies at a s pecified e xchange r ate at an agreed upon future d ate. The managers enter i nto such contracts to hedge the assets and liabilities related to securities denominated in a foreign currency. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. These contracts have relatively short durations and are valued at the prevailing market exchange rates at month end. An unrealized gain or loss is recorded as the difference between the amount valued at month end and the amount to be received or paid at the expiration date. The unrealized gain or loss is reclassified to realized gain or loss when the contract expires.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends of net investment income or capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

	Level I	Level II	L	Level III		Total
Equity Securities	\$ 1,576,976,912	\$	- \$	-	\$	1,576,976,912
Regulated Investment Companies	21,650,611		-	-		21,650,611
Foreign Exchange Futures Contracts	(17,719)		-	-		(17,719)
Cash	8,559,142		-	-		8,559,142
Securities Lending Collateral Funds	-	125,661,39	98	-		125,661,398
Total	\$ 1,607,168,946	\$ 125,661,39	98 \$	-	\$	1,732,830,344

NOTE 4. SECURITIES LENDING

At July 31, 2009, the fair value of securities on loan is \$122,165,410, initial collateral received is \$130,673,882, and the fair value of reinvested collateral held is \$125,661,398. All of the collateral was received as cash and is invested in the Mellon GSL DBT II Collateral Fund (Collateral Fund), the Mellon SL DBT II Liquidating Fund (Liquidating Fund), and the Mellon GSL DBT II Liquidating Trust (Liquidating Trust).

In early November 2008, the IMB was notified that certain securities issued by Sigma Finance, Inc. (Sigma) were transferred from the Mellon GSL DBT II Collateral Fund on October 1, 2008, to the Liquidating Trust. Units of the Liquidating Trust were transferred to the IMB's securities lending cash collateral account. For all of the IMB investment pools that participate in the securities lending program, the value of the units in the Liquidating Trust on an amortized cost basis was \$10,973,960 as calculated by the IMB's proportionate interest in the Mellon GSL DBT II Collateral Fund as of the close of business on September 30, 2008. Sigma was subsequently placed into receivership and the IMB is exposed to a potential loss of the full value of the Sigma investment. In October, the IMB recorded a reserve for these potential losses in each investment pool in proportion to its participation in the securities lending program at September 30, 2008. The reserve recorded for the Pool is \$3,486,232.

Effective April 20, 2009, the as sets of the Collateral F und with maturities greater than one day were transferred to the Liquidating F und. As securities mature in the Liquidating F und, the proceeds are transferred to the Collateral F und. The combined value of the holdings in the Collateral F und and the Liquidating F und is u sed to determine the fair value of reinvested collateral.

Additionally, the distribution of securities lending income has been restricted beginning October 1, 2008. At July 31, 2009 the accumulated u ndistributed s ecurities l ending i ncome is \$ 1,928,731, o ther a ccumulated u ndistributed in come is \$180,282,671, and total accumulated undistributed income is \$182,211,402.

NOTE 5. FOREIGN CURRENCY FORWARD CONTRACTS

At July 31, 2009, open foreign currency forward contracts are as follows:

				Receivable		Payable	Payable

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB Short-Term Fixed Income Pool (Pool) and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The main objective of the Pool is to maintain sufficient liquidity to fund withdrawals by the participant plans and to invest cash contributions until such time as the money can be transferred to other asset classes without sustaining capital losses. JP Morgan Investment Advisors, Inc. manages the Pool. The Pool's investment performance, net of external investment management fees, is expected to meet or exceed the Salomon ninety-day T-bill index plus fifteen basis points.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments are carried at amortized cost. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

FAS 157 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.
- Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Repurchase Agreements - In connection with transactions in repurchase agreements, it is the IMB's policy that its designated custodian take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of the repurchase transaction at all times. If the seller defaults, and the fair value of the collateral declines, realization of the collateral by the IMB may be delayed or limited.

Security Loans - The IMB, through its agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by initial collateral of at least 102 percent of the market value of the securities loaned. Cash collateral received is invested in the Mellon GSL Reinvestment Trust. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as securities lending income. The agent fees and broker rebates are reported as expenses, and unrealized gains or losses resulting from changes in the value of the investment of cash collateral are reported as part of the net increase or decrease in the fair value of investments. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations.

Asset-Backed Securities - The Pool invests in various asset-backed securities, mortgage-backed securities, and structured corporate debt. The securities are reported at fair value. The Pool invests in these securities to enhance yields on investments. Changes in market interest rates affect the cash flows of these securities and may result in changes in fair value. The overall return or vield on these securities depends on the changes in the interest and principal payment pattern and market value of the underlying assets.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Interest Income - Interest income is recognized as earned on the accrual method.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Dividend Income - Dividend income is recognized on the ex-dividend date.

Amortization - Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security. The amortization of asset-backed securities considers the effect of prepayments on the life of the security. Historical prepayment speeds are obtained from market data vendors and are updated annually. The effect of changing prepayment assumptions is reported in the Statement of Operations in the year of the change.

Distributions to Participants - The net investment income of the Pool is declared as a dividend and distributed daily to the participants based upon their pro rata participation in the Pool. The distributions of net investment income are credited to the participants' accounts in the form of dividend reinvestments in the Pool and are presented first as distributions to participants, and then as reinvestment of distributions on the Statement of Changes in Net Assets.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

	Lev	el I	Level II	Lev	el III		Total
Regulated Investment Companies	\$	1	\$ -	\$	-	\$	1
Short-term Issues		-	212,934,187		-	21	2,934,187
U.S. Government Agency Issues		-	19,496,785		-	1	9,496,785
Total	\$	1	\$ 232,430,972	\$	-	\$ 23	2,430,973

NOTE 4. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance:	
Net asset value at June 30, 2009	\$ 1.00
Net asset value at July 31, 2009	\$ 1.00
Time-weighted Total Return *	0.0%
Supplemental Data:	
Net assets, end of period (\$000's)	\$ 232,426
Ratio to average net assets:	
Expenses **	0.09%
Net investment income **	0.19%
Weighted average days to maturity	42
Maximum weighted average investment maturity per Board guidelines	60 days
Money market yield ***	0.21%

* Return data is net of fees for the fiscal year-to-date and is not annualized

- ** All ratios are for the fiscal year-to-date annualized
- *** The money market yield represents the rate of income, net of expenses, earned over the past month and is not intended to indicate future performance. The return is annualized over a 365-day year, assuming no reinvestment of earnings.

NOTE 5. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool.

<u>Participant</u>	Account Value
Teachers' Retirement System	\$ 81,750,024
Workers' Compensation Old Fund	55,074,254
Revenue Shortfall Reserve Fund B	22,708,270

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB Total Return Fixed Income Pool (Pool) and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The main objective of this bond pool is to earn superior returns with low volatility by actively investing in the extended fixed income markets. Western Asset Management Company (Western) manages the Pool. The Pool's investment performance, net of external investment management fees, is expected to meet or exceed the Barclays Capital US Universal index.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments are carried at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. Futures and option contracts are valued at the last settlement price established each day by the exchange on which they are traded. Interest rate and credit default swap values are based on market values received from third parties or are determined by valuation models. Foreign currency forward contracts are valued at either spot or forward month-end exchange rates. Investments in other funds are valued at the reported unit values of the individual funds as provided by fund's management. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

FAS 157 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.
- Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Foreign Currency – Amounts denominated in or expected to settle in foreign currencies are translated into U.S. dollars at exchange rates reported by the Bank of New York Mellon on the following basis:

- a. Market value of investment securities, other assets and liabilities at the closing rate of exchange at the valuation date.
- b. Purchases and sales of investment securities, income and expenses at the rate of exchange prevailing on the respective dates of such transactions.

The IMB isolates that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from market prices of securities held.

Reported net realized foreign exchange gains and losses arise from sales of portfolio securities, sales and maturities of shortterm securities, sales of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities including investments in securities at month end, resulting from changes in the exchange rate.

Option Contracts - The IMB may purchase or write equity, bond, currency, or index option contracts that have recognized liquidity and are actively traded on major exchanges or are executed with major dealers. These option contracts give the purchaser of the contract the right to buy (call) or sell (put) the security, or settle cash for an index option, underlying the contract at an agreed upon price (strike price) during or at the conclusion of a specified period of time.

Premiums paid upon the purchase of an option contract are recorded as an asset and subsequently adjusted to market value. Upon exercising a purchased option, a gain is recorded equal to the difference between the market value of the underlying instrument and the strike price of the option, minus premiums paid. If the option expires unexercised, a loss is recognized in the amount of the premiums paid for the option.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Premiums received when option contracts are written are recorded as a liability and subsequently adjusted to market value. If a written option contract expires unexercised, a gain is recorded equal to the amount of the premiums received. The difference between the premiums received and the amount paid to effect a closing transaction is also recorded as a gain or loss. When a written option is exercised, a loss is recorded equal to the difference between the market value of the underlying instrument and the strike price of the option, minus premiums received.

Written option contracts are used to enhance investment returns and reduce portfolio convexity when implied volatility is high. Purchased option contracts are used to increase portfolio convexity when implied volatility is low, to implement certain yield curve strategies, or to hedge sector exposure.

When writing put options, there is risk that a loss may be incurred if the market price of the underlying instrument decreases and the option is exercised. This loss is determined by market conditions and cannot be specifically limited. The risk associated with writing call options is the loss of potential profit if the market price of the security increases and the option is exercised. Purchased put or call options bear the risk of loss of the premium paid if market conditions are not favorable to exercise the option. There may also be risk that the value of the option contract does not correlate perfectly with movements of the underlying instrument due to certain market distortions.

The IMB limits its exposure to credit risk by only buying or selling options traded on major exchanges, or executed with major dealers. There is a risk of the inability to enter into a closing transaction if a liquid secondary market does not exist. The IMB maintains sufficient levels of cash or cash equivalents to meet cash flow obligations.

Security Loans - The IMB, through its agent, the Bank of New York Mellon, loans securities to various brokers on a temporary basis. Each transaction for U.S. securities is secured by initial collateral of at least 102 percent of the market value of the securities loaned. For international securities, the collateral is at least 105 percent of the market value of the securities on loan. Cash collateral received is invested in the Mellon GSL Reinvestment Trust. The IMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. The income earned by the IMB is reported in the Statement of Operations as securities lending income. The agent fees and broker rebates are reported as expenses, and unrealized gains or losses resulting from changes in the value of the investment of cash collateral are reported as part of the net increase or decrease in the fair value of investments. The IMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Operations.

Futures Contracts - A futures contract is an agreement between a buyer or a seller and the clearinghouse of a futures exchange in which the parties agree to buy or sell a commodity, financial instrument or index at a specified future date and price. Upon entering into a financial futures contract, the IMB is required to pledge to the broker an amount of cash, U.S. government securities, or other assets, equal to a certain percentage of the contract amount (initial margin deposit). Cash (variation margin) is received from or paid to the broker for the fluctuations of the underlying securities or index. The IMB records the cash received or paid for the variation margin as a realized gain or loss.

Interest rate futures may be used to enhance portfolio yields, to hedge an existing position, or as an alternative investment of cash. Stock index futures may be used to provide immediate exposure to fluctuations in the market values of the stocks in the underlying index and to provide liquidity for cash flows.

The market risk associated with holding interest rate and stock index futures results from changes in the market value of the contractual positions due to changes in the value of the underlying instruments or indices. Hedging risk associated with these futures contracts arises because the value of the futures contracts may not correlate perfectly with changes in the values of the underlying instruments or indices.

Other risks associated with futures contracts are liquidity risk and credit risk. Liquidity risk arises when there is insufficient trading in a particular futures contract. Credit risk arises from the potential inability of counterparties to meet the terms of the

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

contracts. The IMB's managers generally only utilize futures contracts that are traded on major exchanges or are executed with major dealers. The major exchanges assume the risk of a counterparty default and generally require an initial margin deposit of cash or securities.

Foreign Exchange Forward Contracts - A foreign exchange forward contract is an agreement between two parties to exchange different currencies at a specified exchange rate at an agreed upon future date. Western enters into such contracts to hedge the assets and liabilities related to securities denominated in a foreign currency. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. These contracts have relatively short durations and are valued at the prevailing market exchange rates at month end. An unrealized gain or loss is recorded as the difference between the amount valued at month end and the amount to be received or paid at the expiration date. The unrealized gain or loss is reclassified to realized gain or loss when the contract expires.

Interest Rate Swaps – Interest rate swaps represent agreements between counterparties to exchange cash flows based on the difference between two interest rates, applied to a notional principal amount for a specified period. Interest rate swaps do not involve the exchange of principal between the parties. Interest is paid or received periodically.

Credit Default Swaps – Credit default swaps are agreements between counterparties to transfer the credit risk of referenced debt securities. The buyer of the credit default swap gains protection against a negative credit event such as a default or credit rating downgrade and the seller assumes the credit risk and is obligated to pay upon the occurrence of such an event.

Asset-Backed Securities – The Pool invests in various asset-backed securities, mortgage-backed securities, and structured corporate debt. The securities are reported at fair value. The Pool invests in these securities to enhance yields on investments. Changes in market interest rates affect the cash flows of these securities and may result in changes in fair value. The overall return or yield on these securities depends on the changes in the interest and principal payment pattern and market value of the underlying assets.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Amortization - Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security. The amortization of asset-backed securities considers the effect of prepayments on the life of the security. Historical prepayment speeds are obtained from market data vendors and are updated annually. The effect of changing prepayment assumptions is reported in the Statement of Operations in the year of the change.

Distributions to Participants - The monthly net investment income of the Pool is declared as a dividend on the last day of the month and distributed to the participants of the Pool on the first day of the following month. Distributions are paid in the form of reinvestments in the Pool and have been included in distributions to participants and reinvestment of distributions as presented on the Statement of Changes in Net Assets.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

	 Level I	 Level II	 Level III	 Total
Equity Sescurities	\$ 662,154	\$ -	\$ -	\$ 662,154
Regulated Investment Companies	535,570,440	-	-	535,570,440
Options	(8,821,746)	-	-	(8,821,746)
Foreign Exchange Futures Contracts	(327,984)	-	-	(327,984)
Cash	16,701,759	-	-	16,701,759
U.S. Government Agency Issues	-	535,753,424	-	535,753,424

Commingled Funds	-	1,021,977,882	-	1,021,977,882
Securities Ledning Collateral Fund	-	42,632,472	-	42,632,472
Futures	-	10,658,684	-	10,658,684
Interest Rate Swaps	 	 (2,220,956)	 -	 (2,220,956)
Tota	\$ 543,784,623	\$ 2,262,090,599	\$ -	\$ 2,805,875,222

NOTE 4. SECURITIES LENDING

At July 31, 2009, the fair value of securities on loan was \$44,322,512, initial collateral received was \$44,855,136, and the fair value of reinvested collateral held was \$42,632,472. All of the collateral was received as cash and was invested in the Mellon GSL DBT II Collateral Fund (Collateral Fund), the Mellon SL DBT II Liquidating Fund (Liquidating Fund), and the Mellon GSL DBT II Liquidating Trust (Liquidating Trust).

In early November 2008, the IMB was notified that certain securities issued by Sigma Finance, Inc. (Sigma) were transferred from the Mellon GSL DBT II Collateral Fund on October 1, 2008, to the Liquidating Trust. Units of the Liquidating Trust were transferred to the IMB's securities lending cash collateral account. For all of the IMB investment pools that participate in the securities lending program, the value of the units in the Liquidating Trust on an amortized cost basis was \$10,973,960 as calculated by the IMB's proportionate interest in the Mellon GSL DBT II Collateral Fund as of the close of business on September 30, 2008. Sigma was subsequently placed into receivership and the IMB is exposed to a potential loss of the full value of the Sigma investment. In October, the IMB recorded a reserve for these potential losses in each investment pool in proportion to its participation in the securities lending program at September 30, 2008. The reserve recorded for the Pool was \$1,703,359.

Effective April 20, 2009, the assets of the Collateral Fund with maturities greater than one day were transferred to the Liquidating Fund. As securities mature in the Liquidating Fund, the proceeds are transferred to the Collateral Fund. The

NOTE 4. SECURITIES LENDING (Continued)

combined value of the holdings in the Collateral Fund and the Liquidating Fund was used to determine the fair value of reinvested collateral.

Additionally, the distribution of securities lending income has been restricted beginning October 1, 2008. The accumulated undistributed securities lending income will be distributed once the actual loss on Sigma is realized. The accumulated undistributed securities lending income for July 31, 2009 was \$421,974.

NOTE 5. FUTURES CONTRACTS

At July 31, 2009, open positions in futures contracts denominated in US dollars were as follows:

Expiration_		Open Contracts	Position	J	Value at uly 31, 2009	Value Upon Entering Contract	Ne	Cumulative t Gain (Loss) ace Inception
Mar 2010	433	Euro 90 Day Future	Long	\$	107,183,737	\$ 107,100,400	\$	83,337
Jun 2010	448	Euro 90 Day Future	Long		110,465,600	110,644,800		(179,200)

Sep 2009	(565)	US 5yr T-Note	Short		(65,191,289)	(67,366,251)		2,174,962
Sep 2009	(1,118)	US T-Bond	Short		(133,042,000)	 (130,266,844)		(2,775,156)
				\$ 1	1,122,225,549	\$ 1,111,566,865	\$	10,658,684

At July 31, 2009, the Pool had pledged cash of \$4,697,328 to cover initial margin requirements on open futures contracts, and the net variation margin receivable of \$2,186,845 represents one day's settlement on open futures contracts.

NOTE 6. SWAPS

At July 31, 2009, open positions in interest rate swaps are as follows:

	Notional	Maturity		Receiving			Paying		
Counterparty	Value	Date	Rate	Туре	Base	Rate	Туре	Base	Fair Value
Barclay's Capital	96,500,000	2/15/2025	1.00%	Floating	3 mo. Libor	4.30%	Fixed	N/A	(2,921,383)
Barclay's Capital	65,300,000	2/15/2025	1.00%	Floating	3 mo. Libor	4.30%	Fixed	N/A	1,983,763
Greenwich Capital	10,560,000	12/18/2018	1.00%	Floating	3 mo. Libor	4.34%	Fixed	N/A	(561,135)
Greenwich Capital	35,200,000	7/16/2019	1.00%	Floating	3 mo. Libor	3.64%	Fixed	N/A	280,646
Greenwich Capital	17,600,000	7/16/2039	1.00%	Floating	3 mo. Libor	4.09%	Fixed	N/A	(232,008)
Morgan Stanley	138,800,000	11/30/2013	1.00%	Floating	3 mo. Libor	2.90%	Fixed	N/A	(750,839)
	\$ 363,960,000								\$ (2,200,956)

At July 31, 2009, the Pool had pledged cash of \$8,910,000 as collateral on open swap contracts.

	Total Short Positions				(8,930,962)	(9,464,980)
	Total Option Contracts				\$ (7,385,478)	\$ (8,821,746)

At July 31, 2009, open option contracts were as follows:

A summary of the activity in short (written) option positions for the year ended July 31, 2009 is as follows:

		Puts	Calls		
	Number of	Premiums	Number of	Premiums	
	Contracts	(Received)/Paid	Contracts	(Received)/Paid	
Options outstanding at June 30, 2009	(4,775)	\$ (4,118,647)	(3,126)	\$ (4,427,335)	
Options written	(2,775)	(1,074,319)	(1,351)	(1,011,326)	
Options closed	1,122	433,232	-	-	
Options expired			1,126	1,267,433	
Options outstanding at July 31, 2009	(6,428)	\$ (4,759,734)	(3,351)	\$ (4,171,228)	

NOTE 8. FOREIGN CURRENCY FORWARD CONTRACTS

At July 31, 2009, open foreign currency forward contracts were as follows:

				Recei	vable	P	ayable	Unrealized
Position	Foreign Currency	Inception Date	Expiration Date	(in foreign currency)	(in U. S. dollars)	(in foreign currency)	(in U. S. dollars)	appreciation (depreciation)
Long/Hedge	Japanese Yen	4/28/2009	8/19/2009	2,696,608,000	28,330,188	5 206 (72	28,023,985	306,203
Short/Hedge	Euro Currency Unit	4/28/2009	8/19/2009		7,002,944	5,386,673	7,637,131	(634,187)
					\$ 35,333,132		\$ 35,661,116	\$ (327,984)

NOTE 9. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance:	
Net asset value at June 30, 2009	\$ 11.90
Income from investment operations:	
Net investment income	0.02
Net realized and unrealized gain on investment transactions	 0.46
Total from investment operations	 0.48
Less distributions from net investment income	 (0.02)
Net asset value at July 31, 2009	\$ 12.36
Time-weighted Total Return *	 4.1%
Supplemental Data:	
Net assets, end of period (\$000's)	\$ 2,360,163
Ratio to average net assets:	
Expenses **	0.24%
Net investment income **	2.35%
Portfolio turnover rate	1.89%

* Return data is net of fees for the fiscal year-to-date and is not annualized

** All ratios are for the fiscal year-to-date annualized

NOTE 10. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool. The balances do not include the dividend declared by the Pool on the last day of the month and reinvested to the participant's account on the first day of the following month.

Participant	Account Value
Teachers' Retirement System	\$ 738,049,239
Public Employees' Retirement System	856,401,351
Workers' Compensation Old Fund	194,000,254
Public Safety Death, Disability and Retirement Fund	96,166,328
Revenue Shortfall Reserve Fund B	33,970,393
Revenue Shortfall Reserve Fund	23,476,894
Coal Workers' Pneumoconiosis Fund	89,046,312
Judges' Retirement System	23,455,292
Prepaid Tuition Trust Fund	25,551,343
Death, Disability and Retirement Fund for Deputy Sheriffs	20,667,287
Board of Risk and Insurance Management	45,356,296
State Police Retirement System	10,827,339
Public Employees' Insurance Agency	53,847,527
Wildlife Endowment Fund	8,121,039
Retiree Health Benefit Trust	136,656,805
Emergency Medical Services Retirement System	 4,569,230
Total	\$ 2,360,162,929

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by West Virginia Code §12-6-1 to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The Core Fixed Income pool (Pool) began operations on March 2, 2009.

The accompanying financial statements reflect only the investments and investment related operations of the Pool and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The main objective of this core bond pool is to generate investment income, provide stability and diversification, but not at the expense of total return. JP Morgan Investment Advisors, Inc. manages this pool. This pool's investment performance, net of external investment management fees, is expected to meet or exceed the Barclays Capital US Aggregate index.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments are carried at fair value, which is determined by a third party pricing service based on asset portfolio pricing models and other sources. Commissions on the purchases of securities by the IMB are a component of the security price quoted by the seller and are included in the investment cost.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

FAS 157 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Asset-Backed Securities – The Pool invests in various asset-backed securities, mortgage-backed securities, and structured corporate debt. The securities are reported at fair value. The Pool invests in these securities to enhance yields on investments. Changes in market interest rates affect the cash flows of these securities and may result in changes in fair value. The overall return or yield on these securities depends on the changes in the interest and principal payment pattern and market value of the underlying assets.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Interest Income - Interest income is recognized as earned on the accrual method.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Amortization - Discounts and premiums on securities purchased are amortized over the life of the respective securities using the scientific method of amortization. This method maintains a constant book yield over the life of the security. The amortization of asset-backed securities considers the effect of prepayments on the life of the security. Historical prepayment speeds are obtained from market data vendors and are updated annually. The effect of changing prepayment assumptions is reported in the Statement of Operations in the year of the change.

Distributions to Participants - The monthly net investment income is declared as a dividend on the last day of the month and distributed to the participants of the Pool on the first day of the following month. Distributions are paid in the form of reinvestments in the Pool and have been included in distributions to participants and reinvestment of distributions as presented on the Statement of Changes in Net Assets.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

	Level I	Level	l II	Leve	1 III		Total
Regulated Investment Companies	\$ 547,108	\$	-	\$	-	\$	547,108
U.S. Government Agency Issues	-	284,40	03,308		-	-	284,403,308
U.S. Treasury Issues	-	74,68	30,971		-		74,680,971
Corporate Issues	 -	90,47	76,633		-	_	90,476,633
Total	\$ 547,108	\$ 449,56	50,912	\$	_	\$ -	450,108,020

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by West Virginia Code §12-6-1 to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The TRS Annuity pool (Pool) began operations on December 10, 2008.

The accompanying financial statements reflect only the investments and investment related operations of the Pool and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool holds an investment contract strictly for the benefit of the Teachers Retirement System (TRS). The IMB assumed responsibility for this investment as part of the restructuring of the Teachers Defined Contribution (TDC) plan, a separate retirement plan outside of the IMB, whereby certain TDC participants elected to transfer the ownership of their individual TDC retirement accounts to the TRS in exchange for current participation in the TRS defined benefit plan. The contract was issued by the Variable Annuity Life Insurance Company (VALIC) and was not liquidated as part of the restructuring, and was transferred in kind to the IMB on December 10, 2008. Effective April 23, 2009, the IMB elected to liquidate this contract and will receive five equal annual payments of \$55,058,102. The first payment was received on May 4, 2009 and subsequent payments will be received on May 4, 2010, 2011, 2012, and 2013. The contract and the payments include a guaranteed annual interest yield of 4.5%.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. The VALIC contract is a private contract between the issuer and the IMB and is not a marketable security. It is carried at fair value.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

FAS 157 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investment securities are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Interest Income - Interest income is recognized as earned on the accrual method.

Distributions to Participants - The Pool does not routinely distribute dividends or net capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

	Level I	· ·	Level I	I	Level III	Total
Annuity Contract	\$	-	\$	-	\$199,660,442	\$ 199,660,442

The reconciliation of the beginning and ending balances of Level 3 investments for the period from June 30, 2009 to July 31, 2009 was as follows:

	Annuity		
	Contract		
Balance at June 30, 2009	\$	198,915,431	
Net realized gain/(loss)		-	
Net change in unrealized appreciation/(depreciation)		-	
Net purchases/(sales)		745,011	
Net transfers in/(out) of Level 3		-	
Balance at July 31, 2009	\$	199,660,442

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB Private Equity Pool (Pool) and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool was established to hold the IMB's investments in various types of private equity funds. Franklin Park Associates, LLC has been retained by the IMB to provide consulting services for this asset class.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments, which are not publicly traded, are carried at estimated fair value as provided by the funds' management. The IMB may, in addition, consider other factors in assessing the fair value of these investments. The IMB believes that the carrying amount of such investments is a reasonable estimate of fair value as of June 30, 2009. Because these investments are not marketable, the estimated value is subject to uncertainty, and therefore, may differ from the value that would have been used had a ready market for the investment existed.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

FAS 157 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.
- Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investment Gains and Losses - Gains and losses on the sale of investments in other funds are recognized at the time of sale by the average cost method. The calculation of realized gains and losses is independent of the calculation of the net increase or decrease in the fair value of investments. Realized gains and losses on investments held in more than one fiscal year and sold in the current year may have been recognized as an increase or decrease in the fair value of investments reported in the prior year.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends or net capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes.

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

	Level I		Leve	1 II	Level III		Total
Regulated Investment Companies	\$	21,431,466	\$	-	\$	-	\$ 21,431,466
Investments in Other Funds		-		-	514,982	2,778	514,982,778
Partnerships		-		-	67,29	7,355	 67,297,355
Total	\$	21,431,466	\$	-	\$ 582,28	0,132	\$ 603,711,599

The reconciliation of the beginning and ending balances of Level 3 investments for the period ended July 31, 2009 was as follows:

		vestments in Other Funds	D	artnerships
Balance at June 30, 2009		504,142,661	<u> </u>	62,982,211
Net realized gain/(loss)	*	-	*

NOTE 4. COMMITMENTS

The IMB, with the assistance of its consultant, began implementing its plan to invest in private equity partnerships in February 2008. As of July 31, 2009 the IMB had made commitments to fourteen private equity general partnerships totaling \$540,000,000. The IMB had funded \$85,391,015 of these commitments at July 31, 2009, leaving unfunded commitments of \$454,608,985.

NOTE 5. FINANCIAL HIGHLIGHTS

Per Unit Operating Performance:	
Net asset value at June 30, 2009	\$ 7.39

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by *West Virginia Code §12-6-1* to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB Private Real Estate Pool (Pool) and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

Investment Company GAAP		State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool was established to hold the IMB's investments in private real estate funds. Courtland Partners, Ltd. has been retained by the IMB to provide consulting services for this asset class.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments, which are not publicly traded, are carried at estimated fair value as provided by the funds' management. The IMB may, in addition, consider other factors in assessing the fair value of these investments. The IMB believes that the carrying amount of such investments is a reasonable estimate of fair value as of June 30, 2009. Because these investments are not marketable, the estimated value is subject to uncertainty, and therefore, may differ from the value that would have been used had a ready market for the investments existed.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

FAS 157 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends or net capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

	Level I	Level II		Level III		Total	
Regulated Investment Companies	\$ 21,078,734	\$	-	\$	-	\$	21,078,734
Investments in Other Funds	 -		-		16,617,753		16,617,753
Total	\$ 21,078,734	\$	-	\$	16,617,753	\$	37,696,487

The reconciliation of the beginning and ending balances of Level 3 investments for the period ended July 31, 2009 was as follows:

	Investments in Other Funds			
Balance at June 30, 2009	\$	16,301,689		
Net realized gain/(loss)		-		
Net change in unrealized appreciation/(depreciation)		316,064		
Net purchases/(sales)		-		
Net transfers in/(out) of Level 3		-		
Balance at July 31, 2009	\$	16,617,573		

NOTE 4. COMMITMENTS

The IMB, with the assistance of its consultant, began implementing its plan to invest in private real estate in February 2008. The IMB committed \$130,000,000 to four real estate investment funds/partnerships. The IMB had funded \$25,057,175 of these commitments at July 31, 2009, leaving unfunded commitments of \$104,942,825.

NOTE 5. FINANCIAL HIGHLIGHTS

NOTE 1. DESCRIPTION OF THE ENTITY

The West Virginia Investment Management Board (IMB) was organized on April 25, 1997, as a public corporation created by West Virginia Code §12-6-1 to provide prudent fiscal administration and investment management services to designated State pension funds, the State's Workers' Compensation and Pneumoconiosis funds, and certain other State government funds.

A Board of Trustees, consisting of thirteen members, governs the IMB. The Governor, the State Auditor and the State Treasurer are ex officio members of the Board of Trustees. The Governor appoints all other Trustees for a term of six years.

The IMB operates on a fiscal year beginning July 1 and ending June 30.

The accompanying financial statements reflect only the investments and investment related operations of the IMB Hedge Fund Pool (Pool) and do not reflect any activity of the other investment pools under the control of the IMB or activity occurring with the Administrative Fund of the IMB or any other assets or liabilities, or restrictions thereon, or the various investment pool participants. Accordingly, these financial statements are not intended to and do not present the comprehensive financial position and operations of the IMB or any of the investment pool participants.

These financial statements have been prepared on a basis of accounting following U.S. generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB) applicable to investment companies, which is a comprehensive basis of accounting other than GAAP for state and local governments established by the Government Accounting Standards Board. The IMB has selected this basis of accounting because it believes that the disclosures required for investment companies better reflect the purpose and operations of the Pool.

A summary of the differences between financial statements prepared in accordance with GAAP for investment companies and GAAP for state and local governments are as follows:

	Investment Company GAAP	State and Local GAAP
Management Discussion and Analysis	Not required	Required
Schedule of Investments in Securities	Required	Not required
Statement of Operations	Required	Not required
Investment Risk Disclosures	Not required	Required
Financial Highlights	Required	Not required

There are no differences in the reported amounts of assets, liabilities, net assets, investment operations, distributions, or unit transactions between GAAP for investment companies and GAAP for state and local governments.

The Pool was established to hold the IMB's investments in hedge funds. Albourne America, LLC has been retained by the IMB to provide consulting services for this asset class.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting - The IMB invests funds of the State and its component units, all of which are government entities. Investments, which are not publicly traded, are carried at estimated fair value as provided by the funds' management. The IMB may, in addition, consider other factors in assessing the fair value of these investments. The IMB believes that the carrying amount of such investments is a reasonable estimate of fair value as of June 30, 2009. Because these investments are not marketable, the estimated value is subject to uncertainty, and therefore, may differ from the value that would have been used had a ready market for the investments existed.

Fair Value Measurements - In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The IMB adopted FAS 157 for fiscal year 2009.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

FAS 157 established a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under FAS 157 are:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2 Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3 Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Investment Transactions - Investment transactions are accounted for on a trade date basis.

Use of Estimates - The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Dividend Income - Dividend income is recognized on the ex-dividend date.

Distributions to Participants - The Pool does not routinely distribute dividends or net capital gains.

Expenses - The IMB's Trustees adopt an annual budget and fee schedule for services to be provided to all of the investment pools under its management. Each investment pool is charged for its direct investment-related cost and for its allocated share of other expenses. These other expenses are allocated to the individual pools based on asset size. The IMB pays all expenses on behalf of the Pool.

Income Taxes - The IMB is a public corporation organized under laws of the State of West Virginia and exempt from federal and state taxation. Accordingly, the financial statements have been prepared recognizing that the IMB is not subject to federal or state income taxes

NOTE 3. FAIR VALUE MEASUREMENTS

The table below summarizes the valuation of the investment securities in accordance with FAS 157 fair value hierarchy levels as of July 31, 2009:

	Level I	Leve	el II	Level I	II		Total
Regulated Investment Companies	\$ 20,955,361	\$	-	\$	-	\$	20,955,361
Investments in Other Funds	 -		-	1,135,058	3,464	1	,135,058,464
Total	\$ 20,955,361	\$	-	\$1,135,058	,464	\$1	,156,013,826

NOTE 3. FAIR VALUE MEASUREMENTS (Continued)

The reconciliation of the beginning and ending balances of Level 3 investments for the period ended July 31, 2009 was as follows:

	Investments in Other Funds	
Balance at June 30, 2009	\$	1,112,575,678
Net realized gain/(loss)		-
Net change in unrealized appreciation/(depreciation)		23,438,102
Net purchases/(sales)		(955,316)
Net transfers in/(out) of Level 3		-
Balance at July 31, 2009	\$	1,135,058,464
NOTE 4. FINANCIAL HIGHLIGHTS		
Per Unit Operating Performance:		
Net asset value at June 30, 2009		\$ 9.26
Net realized and unrealized loss on investment transactions		0.19
Net asset value at July 31, 2009		\$ 9.45
Time-weighted Total Return *		2.0%
Supplemental Data:		
Net assets, end of period (\$000's)		\$ 1,175,863
Ratio to average net assets:		
Expenses **		0.09%
Net investment income **		-0.09%
Portfolio turnover rate		3.52%

* - Return data is net of fees and is for the fiscal year-to-date and is not annualized

** - All ratios are for the fiscal year-to-date annualized

NOTE 5. SCHEDULE OF PARTICIPATION

The following schedule provides the value of participants' accounts in the Pool.

Participant	Account Value
Teachers' Retirement System	\$ 408,598,566
Public Employees' Retirement System	398,737,435
Workers' Compensation Old Fund	138,732,777
Pneumoconiosis	46,015,395
Revenue Shortfall Reserve Fund B	44,672,098
Public Safety Retirement System	37,257,495
Revenue Shortfall Reserve Fund	30,896,750
Public Employees' Insurance Agency	23,540,913
